# Foot demands peerages for 2 Labour ex-whips

By Anthony Bevins, Political Correspondent

that two former Labour whips himself out of the list. should be made peers lies at the centre of the difficulties over the dissolution honours list.

The Prime Minister has been of nationally-recognized merit and substance-

But informed sources said yesterday that while the Labour leader had modified his pre-vious request for 27 peerages, bringing it down to single figures, his latest list neverthe-less included Mr. Albert Stallard, aged 61, the former MP for Camden, St Pancras, North, and Mr David Stoddart, age 57, the former MP for Swindon.

Although both men, first elected to Parliament in 1970, served as government whips, they had no ministerial experience beyond brief service as parliamentary private sec-retaries to ministers of state, and there is some surprise that their names persist in spite of the fact that some former ministers have been deleted from Mr Foot's nominations.

It was suggested last night, for example, the Mr Frederick Mulley, the former Secretary of State for Education and of Defence, no longer featured on the list put to No 10.

Mr Mulley, who was 65 yesterday, was MP for Sheffield. Park, for 33 years. He was a member of Labour's National Executive Committee for 20 years and is a former chairman of the Labour Party. A number of senior Labour figures will share his dismay that Mr Foot should now choose to ignore his natural claim to elevation. Mr Albert Booth, another former Labour Cabinet minister

Mr. David Stoddart (left) and Mr Albert Stallard.

Mr Michael Foot's insistence Parliament, yesterday

He said in a BBC radio interview: "I am an unqualified opponent of having a non-elected second chamber and I arguing that dissolution peer-think it is quite wrong that any ages have in the past been of our legislaltion should be reserved for those who have controlled by people who are reserved for those who have controlled by people who are served Parliament with distinction, and that they should atte." He also said that he hoped therefore be awarded to people to win back a seat in the Commons.

But there are other former Cabinet ministers who are expected to be awarded peerages under Mr Foot's patronage. including Mr Joel Barnett, aged 59, the former Chief Secretary to the Treasury, and Mr David Ennals, aged 60, the former Secretary of State for Social

Services. Whether Mr Foot will follow precedent to the extent of recognizing the contribution of former Labour ministers such as Mr Douglas Jay, aged 76, Mr Rederick Willey, aed 73, and Mr Arthur Bottomley, aged 76, remains open to question.
It is understood, however,

that he seems set to prefer Mr Stallard and Mr Stoddart to a number of former junior ministers, who failed to find their way back to Westminster in last month's general election.

One senior Labour figure commented last night that this element of Mr Foot's judgment reminded him of the Wilson years. Mr Stallard, who did not stand for reelection, served as Mr Foot's odd-job man during the election campaign.

Official sources, confirmed last night that they expected the problems of the list to be resolved early this week. It will be made clear that

while Mrs Margaret Thatcher does not approve of Mr Foot's choice of names, he must take responsibility, in the last resort. for his own selection of nominations. If he insists upon without a seat in the present Mr Stallard and Mr Stoddart, they will be submitted to Buckingham Palace for ap-

> Three former party leaders in the Commons, Sir Harold Wilson, Mr Jo Grimond and Mr Gerard Fitt, will be given peerages in their own right, which raises the possibility that the Liberal-SDP Alliance might be allowed to make another party nomination.

# Russia keeps open its missile options

launch a new arms reduction

Despite the failure of the Warsaw Pact to reach agreement publicly on a policy of retaliation against Nato over medium-range missiles, the Soviet Union has informed its allies that it will station missiles in Eastern Europe if it feels it necessary, diplomats said here yesterday.
President Andropov is ex-

pected to make this clear to Chancellor Helmut Kohl during the West German leader's visit to Moscow, which begins today. Diplomats noted that since the meetings of the Soviet leadership three weeks ago the Russians had "blown hot and

cold", alternatively stressing confrontation and conciliation with the West. The communique issued after the one-day Warsaw Pact, summit last week was concili-atory in tone, and Russia has

since accepted the Spanishsponsored compromise on human rights at the Madrid review conference on European security. .

Sources said that the Kremlin wished to present itself as moderate and reasonable, and might use the Kohl visit to

Some diplomats believe that the Russians might reduce the 162 British and French missiles, thereby presenting the West with a fait accompli and forcing it to reconsider the Nato deployments.

However, Red Star. the armed forces newspaper, announced on its front page on Saturday that General Martin Dzur, the Czech Defence Minister, would visit the Soviet Union in the first 10 days of

This is seen as a warning that retaliation remains an option, and that Moscow will confirm its intention to move rockets into East Germany and Czechoslovakia if final efforts to persuade the West Germans to alter their stand fail.

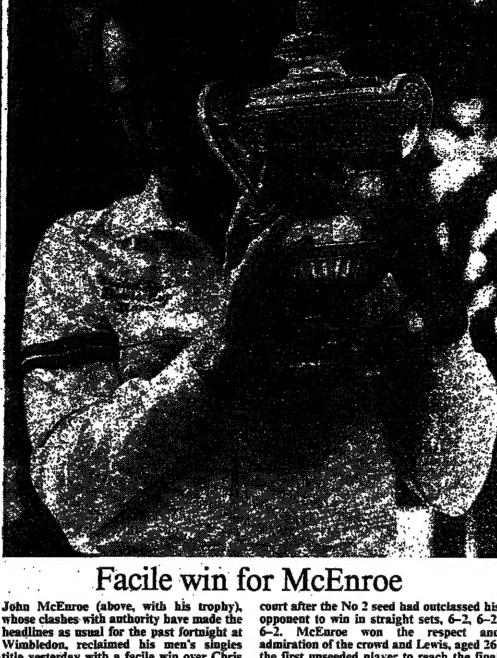

The foreign ministers of Poland and Bulgaria said after talks in Sofia over the weekend that it was "imperative" for the Warsaw Pact to adopt mea in response to Nato.

Hopes of an early return of the Financial Times receded yesterday as the deadline for a settlement passed without agreement. Negotiations broke up at lunchtime with both parties agreeing to reconvene within "a day or two".

Management and National Graphical Association (NGA), the union representing the 24 machine minders at the centre of the strike, "needed time to discuss what had been said to them", an official of the Advisory Conciliation and Arbitration Service (Acas) said. Last night neither side was

prepared to comment on the acceptablility of any proposals put to them by Mr Andrew Kerr, who is chairing the mediation committee. The company has already ndicated that it would abide by

the chairman's recommen dations, so it will be the union. and its representatives at the newspaper who will need to be Clearly the talks are poised

on a knife edge. But the Acas statement yesterday that nego-tiations will be resumed in "a day of two" will fuel uncertainty bout the chances of resuming publication before the end of the week. The machine minders are

laiming extra shifts and an increase in weekly pay from £304.67 to £322. When the dispute is sorted

out the company will start talks on a deal which would include the Sogat '82, the rival union. Management is anxious to avoid a "leapfrog" dispute whereby Sogat, whose members work as machine assistants in the press room, would use an NGA settlement as a lever. By today the FT would have lost 29 issues at a cost of £4m to

#### Shultz on mission to end Lebanon crisis From Michael Hamlyn, Islamabad

new impetus into the stalled Lebanon peace talks. He announced last night in

Islamabad that he would talk with King Fahd of Saudi Arabia loday, and then would move on to Beirut, Damascus and Israel. The main focus of his tour

will be on Syria. "We want to review the bidding", Mr Shullz said. At this point "we don't have a reading on the Syrian situation, and so we very much vant to get one." During the Secretary of State's tour of South-cast and

South Asia he has been receving daily reports from the team of American negotiators at present in the Middle East, led by Mr Philip Habib, But none of the negotiating team has so far been to Syria, during this round of

"Our objective remains the same". Mr Shultz said. "We want to discuss with them how to get there, what the current situation is and how it may have changed. I might say also. the peace process and its importance remain very much

Mr Shultz emphasized that he was not undertaking a shuttle of Beirut.

review the bidding."

# Mr Georgo Shultz, the US form of diplomacy. He was Secretary of State, leaves today anxious to return to Washingfor a round of visits to the ton soon. American officials

the United States by late Thursday or early Friday for Mr Shultz to report his findings to President Reagan.

Earlier yesterday Mr Shultz drove through the gaunt splen-dour of the Khyber Pass, and in brilliant weather pecred down into Afghanistan from a lookclose to the frontier. At Nasirbagh refugee camp, he was greeted by Afghan refugee leaders, who asked him to supply them with weapons to fight the Russians.

■ WASHINGTON: The main purpose of Mr Shultz's visit to the Middle East is to find out whether Syria is now prepared remove its forces from Lebanon. At the same time he is anxious to calm growing tensions in the area caused by fighting between rival factions the Palestine Liberation Organization. (Nicholas Ashford writes)

The United States is also concerned that Israel is planning a partial pull back of its troops from Lebanon that would leave a power vacuum in the mountainous region south

● DAMASCUS: Mr Shultz will face "increased Syrian determination" – backed up by the Soviet Union - to reject the withdrawal of its troops from Lebanon when he visits the Middle East, Damascus radio said yesterday (Reuter reports).
"Washington's attempts to break the Arab ranks, find new agents, mobilize all the forces of treason and exert pressure and

direct threats to Syria will meet only with increased Syrian determination," the radio said in commentary.

# Scargill predicts strike over annual pay talks From Paul Routledge, Labour Editor, Perth

National Union of Mineworkers, said yesterday. Mr Ian MacGregor, who

takes over the National Coal Board chairmanship in two months, has effectively scrapped the annual wage round at British Steel and the miners fear that, with Cabinet backing, he will adopt a similar policy

for the coalfields. it would mean the end of the annual pay confrontation in the mining industry, which led to the strikes of 1972 and 1974. and a sharp diminution in the power of the mineworkers

union.

Mr Scargill insisted last night: The mineworkers would obviously resist any attempt to dismantle the pay structure that has operated since nationaliza-

"We would resist it because any such move, would have a detrimental effect and further exacerbate conditions within the industry. It would put man against man, pit against pit and

area against area.
"If Mr MacGregor puts forward that proposal, he could provide exactly the cornerstone that we need to unite ur membership in a vote against the board's policy on wages and

"I think it could galvanize the mineworkers in a way that has not been seen for a period of time, simply because there would be a ready identification of purpose. It would affect all miners irrespective of the way in which it was presented by the

board."
The union's policy making conference opens in Perth today over the weekend, the conference business committee has

Government moves to abo- been hammering out a wages

lish national wage bargaining in the coal industry would galvanize the miners into striking over pay and pit closures. Mr over pay and pit closures. Mr of a "substantial" increase in for a "substantial" increase in Arthur Scargill, president of the wages to put miners at the top of the iindustrial carnings

This is a compromise between the left, which ironically does not want to saddle union negotiators with a large cash claim as they have done for the last decade, and the Durham colliers who want a new minimum of £125 a week in the industry, effectively a 30 per cent rise all round.

The Treasury has indicated that pay settlements in the public services and nationalized industries should be lower in the coming winter than the 3.5 per cent target fixed, but not achieved, in 1982-83.

Figures of 2 to 3 per cent across industry are favoured by employers in the private sector, but the union has set its sights on 10 times that figure to match increases given to some workers employed at Selfridges, the big London store, last week.

The argument over the wage rates which will be operative from November 1 is, however, largely overshadowed by the debate about the state of the industry and coal board plans to close as many as 70 pits with the loss of more than 60,000

Yorkshire miners yesterday made plain their support for industrial action after a secret ballot. Mr Jack Taylor, the area president, said: "We hope this week to galvanize our unity so as to defend living standards and the mining communities. If we do not do that, I think the union will die of shame."

if a strike ballot were held in the traditionally militant Yorkshire coalfield now, "we would Continued on back page, col 5

#### £50m coal scheme for Ulster

The Government is expected to give approvallater this month for the first phase of a £50m coal mining project which could create 500 jobs and make Northern Ireland self-sufficient in coal for the next 25 years. The project has been pu

forward by Sheffield-based Burnett & Hallamshire Holdings, which has discovered more than 3 million tonnes of low-grade lignite deposits on a 300-acre site near Belfast. Burnett plans to build a £10m

pilot plant employing 50 people later this year, and hopes to have the full-scale plan in operation by 1987. A separate Government de

rision on the conversion of the 600MW oil-fired power station at Kilroot to coal is vital if the Burnett scheme is to succeed.

Business News, page 17

#### Break even forecast by MacGregor

British Steel has cut its losses from £9m to £2m a week since the beginning of the year and according to Mr Ian Mac-

Gregor, the outgoing chairman. But "substantial" additional job losses, possibly as many as 10,000 of the corporation's 78,000 workforce, will be needed to consolidate improvements in efficiency.

The more efficient British Steel is, the fewer people who turn out the product he said. Mr MacGregor, who is taking

over as chairman of the National Coal Board, said in a veiled message to miners that the demoralized crew he had inherited at the BSC created a corporation of which to be proud.

#### Discord threatens to sink Leander Club members, Chris Baillien, won

By Richard Dowden

The Leander Club may be going under. The world's oldest and most distinguished rowing institution is in serious financial difficulties and its membership is divided on what to do about it.

At the annual general meeting last month, the club's committee proposed an increase in the membership fee from £38 to £69 and the membership rejected it. If agreement cannot be reached at a special meeting in September, the committee will

resign.
If there are no other ominations for the committee and no one has come forward with alternative plans so far, the club will have to be handed over to its trustees. Leander men (no women

without champagne.
"We have probably produced more international oar-smen and Olympic medallists than any other club in the country", one of its members members) are the lords of said this week. One of the oarsmen. Henley without club's most distinguished

president, decided that the 1,800 full members would have to be charged a more realistic subscription to help keep the club affoat and to pay off some of the £100,000 overdrafts. As president of the Amateur Rowing Association for 12

years, and chairman of the committeee of management at Henley Royal Regatta for 10 years, Mr Garton is the admiral of British rowing. His opponents, who object to such a dramatic rise in the fee, are led by Mr Peter Coni, who succeeded Mr Garton as chairman of the Henley

Management Committee.
Mr. Coni declined to comment to The Times, but sources within the club describe his supporters as a vociferous minority who have produced no alternative plan to the committees. The row involve the whole of Britain's

rowing establishment

#### Rally for Sands at Mountbatten death harbour

The Government of the Irish Republic is considering banning commemoration rally for Bobby Sands, the hunger striker, at Mullaghmore harbour, co Sligo, where Lord Mountbatten of Burma was killed by an IRA bomb in 1979. The Cabinet can outlaw the

march and rally if it believes it would lead to violence. Dr Garret FitzGerald, the Prime Minister, was said to be revolted by the proposal. Sinn Fein supporters have

arranged the march for next Sunday. Among the reported speakers are Mr Neil Blaney, an MEP and former republic Cabinet minister, Mr Owen Carron, defeated in the Westminster elections in Fermanagh and South Tyrone; and Mr Jose McGirl, a former Sinn Fein MP.

· A showdown between Austin Rover and its 5,000 assembly workers at Cowley is expected today when the company announces an imminent deadline for the introduction of "bell-to-bell" working with the abolition of washing-up time.
The deadline is likely to

expire within 48 hours and the company expects the workforce to accept the new working practises. The ultimatum will be discussed at a mass meeting at which union leaders will recommend a strike.

The Cowley assembly ant is the only Austin Rover factory still refusing to give up washingup time. The men there stopped work for four weeks over the issue two months ago.

If they agreen to work a 39hour week, they will receive a £50 productivity bonus on Thursday.

#### **Bedsit girl** drops out

Santuzza Hendrick, aged 16, who was given a £43 a week bedsit to help her studies has dyed her hair pink and turned up for only two of her eight Olevel examinations at Priory School, Exeter.

Her mother. Mrs Julie Hendrick, who was against the girl being given social security money to leave home, said: She has become a dropout and changed her whole lifestyle" Mrs Hendrick plans to go to court to apply to have her daughter put into Farringdon community home, which also provides education.

#### Doctors abort one twin

Doctors at King's College Hospital, London, have developed a technique to abort one of twip foetuses in cases where one has been diagnosed to be handicapped and the other normal. The operation, called selective foetocide, has been carried out on six women, the latest a Scottish woman who was expecting twins, one of them with a fatal deformity.

The mother will continue to carry both babies, until her pregnancy is complete. The dead baby will cease to grow, and the live one will progress

#### Disabled man's solo to Azores

Mr Michael Spring, who is disabled, was delighted yesterday when he completed a solo voyage to the Azores in only 16 days instead of the 30 days he had allowed for.

Mr Spring, a computer operator from Solihull, never managed more than one hour's sleep at a time during his voyage. He was in constant pain from his disability and was anxious about being run down by a passing ship.

# Many prison governors oppose death penalty

By Peter Evans, Home Affairs Correspondent

be against hanging, according to staff soundings I have taken. One wrong you are on the way to

If hanging were reintroduced, many governors would prefer to have nothing to do with it. According to the governors' branch of the Society of Civil and Public Servants, two thirds of staff in governor grades have joined the service since the abolition of capital punishment.

One said: "Hanging would be against my terms of service. They are not to hang people but rehabilitate them. You cannot rehabilitate people when they

Knowledge that mistakes have been made about the guilt of alleged murderers in the past is another powerful influence on governors' consciences. They would find it difficult to face a man in the condemned cell still protesting his innocence.

The tension that used to build up in prisons before a hanging would be even more explosive these days when there is a hard core of terrorist prisoners out to exploit griev-ances, particularly if an IRA man was about to be hanged.

A governor with long experience said: "Prisons would be impossible to run. Pentonville rioted after one hanging."

A graphic description of the build-up of tension before a hanging was given by a member of staff who had been involved. The countdown began after the finding of the guilt and went on through the appeal hearing. which usually took about 12

"You got a polarization between the prison population "You and staff as representatives of the state which had decreed a person should die. You got violence between individual prisoners and members of staff, or between prisoners, or even

Most prison governors would group violence against groups of

"Almost every execution I have known has been acsaid: "If you tell a governor to do what he believes is morally companied the night before by prisioners beating doors or

smashing windows. "The morning of the ex-ecution you could feel the silence as prisoners ticked off the minutes to the execution. Where prisons had chiming

clocks, their tolling was stilled"

Mr Sidney Powell, secretary of the governors' branch of the Society of Civil and Public Servants, told The Times that if governors were given the option of opting out on conscience grounds, the remainder would become known as pro-hanging with inmates in the tightly-knit world of prison. In any case, the long-term relations between staff and prisoners would be

Mr Powell believes hanging would not deter terrorists, who would feel they were dying for a cause and might even welcome martyrdom. While a prospect of hanging might convince some people not to carry arms, those who did so would not be put off using them, in his opinion.

In 36 years' service in prisons, first as a uniformed officer and now in the governor grade, he had had better opportunity to study the minds and reactions of dangerous men than many others concerned in the debate on capital punish-

Mr David Waddilove, gover-nor of Pentonville from 1958 to 1961, who supervised two hangings, thought the death penalty was not a deterrent. He said on the BBC Radio 4 programme You the Jury: "The onger I was in the prison service, the less effective I thought it was".

But an officer who was involved in at least one hanging told me he had no qualms of conscience about it. It was part of his job as a servant of the

#### The innocent men who could have hanged

A briefing paper on capital punishment by the National Association for the Care and Resettlement of Offenders (Nacro) says that in the 13 years before the abolition of the death penalty serious doubts were raised in at least three cases as to whether the right man was convicted. Timothy Evans, who was hanged largely on the evidence the mutiple murderer Christie, was granted a

Since abolition, a series of cases have increased awareness of the risk of mistaken convictions; Nacro says. Re-

cent cases include: Patrick Meehan, who was pardoned by the Secretary of State for Scotland after serving six years for a murder to which another man confessed.

Albert Taylor, whose con-viction was quashed after he had served five years of a life sentence for the murder of hisfiancée's younger sister, when further evidence came to light which helped to strengthen his John Preece, who was freed

and awarded £70,000 compensation after being convicted of murder on the subsequently discredited evidence of the Home Office forensic scientist Dr Alan Clift.

Michael McMahon and David Cooper, whose convic-tions for the murder of a Luton sub-postmaster were upheld by Court of Appeal four times, but who were released by the Home Secretary because he accepted there were serious doubts as to their guilt

Retiring: Mr John Hunt, first male head of Roedean, with his wife Sarah outside the school.

# Man who succeeded in a woman's world

By Lucy Hodges, Education Correspondent

Roedean School is looking for a new head, on the early retirement of Mr John Hunt, aged 51, who 13 years ago became the first man to be appointed head of a girls' feepaying school.

The question is being raised whether Roedean, which has 430 girls, all boarders, will choose another man. Mr Hunt thinks there is nothing wrong with a man being in charge of an all-female institution so long as the school is large enough to include senior women staff who can take care of the pastoral

He is bold enough to say that "in a large school like this, with a clearly defined structure, a man can often contribute different qualities, perhaps objectivity, and the fact that you are within your own family circle can be helpful to the community as a whole".

Mr Hunt, who has a young wife, whom he met at Stowe, and two sons, aged nine and

That line of argument does

not go down well with headmis-tresses, who have had to watch men being given plum jobs that once would have gone automatically to women at a time when opportunites for women are supposed to have improved. Mrs Pauline Mathias, head-mistress of More House School in Knightsbridge, London, and president of the Girls' Schools Association, thinks it is import-

ant that girls should be able to see women in positions of authority as heads of schools. Part of the trouble, as Mr Hunt sees it, is that fewer competent women are coming forward for headships. "There are fewer career-minded women who are free to oursue the kind of ambition which used to be

normal in budding headmistresses", he said. Women staff in girls' schools

eleven, clearly sees the fact that he is a family man as crucial to the ich seed to get their feet on the careers. boys' schools. Women heads of department often prefer to remain on the academic side of the school and more female staff in independent girls' schools are getting married and working with their husbands than used to be the case, Mr Hunt says. They are also much

> Mr Hunt, who is retiring so that he can pursue research into Dutch settlers in South Africa and manage his Scottish estate, leaves a successful school.

less likely to want to live in the

Despite fees £3,900 a year, Roedean has no difficulty in attracting girls and turns away many applicants. Its academic results are good and its sixth form is large, with 130 pupils.

Mr Hunt likes to emphasize that the school continues the

He says that the school suffers little from parents sweeping their daughters away at the end of the fifth form to attend a boys' public school sixth form. Like most heads of girls' schools, he is suspicious of cation practised by boys' public

He also shows solidarity with the headmistresses over the attitudes of the boys' public schools towards them. He believes the Girls' Schools Association should join with the Headmasters' Conference.

It is no secret that the public school heads view merger with reluctance, Mr Hunt says: "It is rather arrogant, if you have a lot of girls in a particular school, if you are not prepared to talk to another organization which has the care of the majority of girls purpose for which it was the care of the majority of girls founded in 1885. It was the first of that age group under its

#### Liquid fuel process aided by waste

By the staff of Nature

Two chemical engineers from the University of Connecticut may have found a way to use ligam, a major waste product of timber production and some kinds of agriculture, to convert coal into a liquid

If coal could be liquefied economically, it could replace oil and petroleum products, such as diesel oil and petrol for transport. And if lights were used in the process, a use would have been found for the 20-50,000 million tons of it that have to be disposed of throughout the world every

Those are the aims of Dr Robert Coughlia and Dr Robert Coughlia and Dr Faegh Davoudzadeh, who have just reported their initial laboratory experiments on the projects. They found that in experimental reactions a half and half mixture of lignin and coal could be liquefied much more efficiently than either alone, even without a catalyst.

The two researchers tried s number of different strategies. The most successful involved heating an ounce of lignin with an conce of coal to a temperature of 400°C and a pressure of 130 atmospheres. Of the liqueli-able part of this mixture (that is excluding coal ash), some four-fifths was converted to liquids. Lignin alone was only one-third converted and coal alone one-

twentieth converted. The effect of the lignin, the researchers believe, is to stop molecules after they have been broken up by the heat, leaving short organic molecules that form liquids when the mixture is Source: Nature June 30 (vo

# Man seen running over moor may hold key to Peak District murder

the moors just before the discovery of Miss Susan Renhard's body near Castleton, Derbyshire, the police said yesterday. He was hot and sweating and continually looking round him as he rushed across the moor near the ruins of Peveril Castle.

Det Sup Peter Burgess, of Derbyshire CID, said the man was now high on the list of suspects. "His actions could be described as those of someone who has done something. We would appeal for anyone who thinks they know who he was to

come forward." The man is described as being in his late teens or early twenties, quite tall with frizzy black hair. Up to seven people saw him as he ran across the moor towards Castleton on the other side of the dale. One said he ran across the top of the moor and enter a copse, scattering sheep as he went.

Within half an hour Miss Renhard's body had been found. She had been suffocated. The police suspect a sexual mouve to the killing. Miss Renhard, aged 21, of

West Hagley, West Midlands, was staying at the National Park Lose Hill Study Centre when she went out alone to take photographs. Two people have told the police that they saw her alone in Cavedale on the afternoon of her death.

Detectives are now planning reconstruction of the murder scene, bringing together witnesses from all over the country. They will take up positions in the dale and try to recall exactly what they saw on

the afternoon of the killing. Ten miles away in Glossop. Derbyshire, the hunt continued Fowers, aged 16, who disappeared from a party last

Rough Justice.

was stabbed in her flat in 1977,

Among the weaknesses of the prosecution case was that dark and grey hairs were found in the girl's hand. They did not come from Russell. The defence suggested that the murderer was a Hungarian, with grey hair, who disappeared soon after the murder and was later found dead in a derelict house.

The Home Office refused an exhumation order, but the case will go to the Court of Appeal on the basis of evidence relating first to Russell's broken ankle from a third floor window - and a waistcoat. The murderer was seen to wear a waistcoat with a shiny back and buckle and Russell had no such coat.

Justice criticized the length of time, 15 months, it took to the decision after it forwarded documents to the Home Secretary.
It also criticized as inad-

The case of Mervyn Russell, equate government proposals to deal with alleged miscarriages of justice. The government has rejected the idea of an independent review body, proposed by a select committee of MP's and

is to exercise his power of reference back to Court of Appeal more readily and to instruct the Court of Appeal to be more prepared to receive evidence or order a retrial.

But Justice says that leaves the original criticisms of the system unmet, with the Home Secretary still using the police for investigating complaints of wrongful conviction, unless an allegation of police malpractice

"Is it reasonable to expect the police diligently to investigate a complaint which may reveal that they, or their colleagues, were incompetent or negligent or simply wrong?"

As for the Court of Appeal, that already has powers to quash a conviction on the grounds that it is unsafe or unsatisfactory. "But it has continued to regard the verdict of the jury as sacrosanct, however perverse it may appear to others, and to hold the defendant responsible for the tactics of his lawyers, however mistaken they may appear to be with hindsight."

Twenty-sixth annual report from Justice (95a Chancery Lane, London WC2; £1).

Mr Joseph Weston, coordi-European Court of Human nator of the field sale, said that Rights that the British motor-enough offers were left to justify

buying a further six acres of land near the outstanding butterfly reserve at Bernwood Forest, which is just north of the present western extremity of the M40. The Government's route cuts through the edge of the forest complex. Like Otmoor, it is on a section where ministers admit that traffic will justify only four lanes

"Hopefully we have built a legal barrier across Otmoor, Mr Weston said, Planning law requires ministers who want to acquire land by compulsory purchase for road-building to try to tell the owners. But Mr Weston said he would not keep the signed offers to buy from people who had bought the

Mr Baldry, a barrister who is president of the M40 support group, said that if the sales proved a serious obstacle he would take parliamentary action. Much of the proposed motorway would pass through

#### Lettuce gets crisper, **US** style

Soggy salads should soon be a thing of the past as the result of the successful introduction of American Iceberg lettuce the Fresh Fruit and Vegetable

Information Bureau says.
The Iceberg, which has crisper and more densely packed leaves than its standard English counterpart, was developed in the Salinas Valley in California. The first supplies were flown to Britain in 1977 and, despite its price, it proved increasingly popular.

The question was whether it could be grown in the colder and wetter English climate. The secret appears to have been found and this summer more than 16 million lettuces are expected to be harvested from 2,000 acres. Imported leebergs cost

between 70p and 90p each, but home grown specimens reaching the shops later this month should be down to between 50p

#### Arm patients 'satisfactory'

Mr Roy Tapping, the Oxford-shire farm worker who had his arm sewn back on last Monday after it was torn off by a baling maching, was said to be in a satisfactory condition at Stoke Mandeville Hospital yesterday. Mr David Ruffle, whose arm

was sewn back on after a planing maching accident; was in a very satisfactory condition in Odstock Hospital, Salisbury.

#### **Boy rescued** from lake bed

A boy aged 16, was saved by pupils on a life-saving course after he disappeared while swimming in the West Lake at Colwick Park, Nottingham.

The boys from Trent College Long Eaton, near the city, found Mark Harley of Primrose Crescent, Carlton, Nottingham on the lake bed; he had stopped breathing and was revived by artificial respiration and oxygen on the bank.

#### £30m cost of ticket frauds

London Transport expects to lose about £30m this year - 6 per cent of its income before subsidies - through ticket frauds by passenger and staff. Fraud by passengers is likely to cost £22.5m and bus and Tube staff are expected to take a further £7.5m.

A report on automatic Tube fare collection will be presented to the Greater London Council

# Pershing 2 casts a long shadow over Kohl's Moscow trip this week

Chancellor Helmut Kohl arrives in Moscow today for a four-day visit to the Soviet Union, the longest he has undertaken since his election. He is accompanied by about 250 journalists from Bonn, one the biggest delegations ever to accompany a German Chancel-

But in spite of the heightened expectations in the West and hopes that the Russians will outline to him significant concessions at the Geneva arms talks, no breakthrough is ex-pected either by Dr Kohl, or by Soviet experts here. The Chancellor, as he has repeatedly insisted, is not going as an interpreter or an intermediary and has not been given any mandate to negotiate on behalf of the Americans. Nato or the European Community. The Russians have also shown no signs of moving away from their insistence on including British and French missiles in the intermediate nuclear balance, a topic on which Dr Kohl has no

authority to speak.

Indeed, he did not originally intend to talk about missiles. As a newly elected Chancellor, he wanted to get to know the Soviet leaders personally and represent to them his country's interests. These include the continuation of good relations between East and West Germany, the further development of West German trade with the Soviet Union - increasingly important to the economies of both countries - and the continued emigration of Soviet

Germans, ever fewer of whom are now being allowed out. But the imminent deployment on West German soil of 108 Pershing 2 missiles, the new Nato weapon the Russians most fear, has overshadowed all else. And because of the deadlock at

Geneva and the fact that any West German Chancellor, of whatever party, is seen in the Kremlin nowadays as their natural – and only – West European negotiating purtner. the Chancellor has willy-nilly become a central figure in the East-West arms negotiations.

And this has been fully recognized by the Americans, who sent their top arms negotiators to Bonn to brief the Chancellor last week, President Reagan sent a letter extolling Dr Kohl's "important mission", and Vice-President George Bush publicly wished him good

However, Dr Kohl has little

of comfort to tell the Russians. He will make it abundantly clear that his country cannot be deflected from its Nato commitments nor inveigled away from its newly reforged friendship with the United States. Deployment will go ahead, if neces and the Russians should not count on encouraging the opposition to change the position of the newly elected

While pointing out that he and his Foreign Minister are committed to continuing good neighbourly relations with Moscow, Dr Kohl will also

the East, or blackmailed by hints that Bonn's relations with East Berlin will suffer. (He has skilfully made it hard for the East Germans to break off contacts, even if instructed by Moscow to do so.) Aiready his entourage has suggested the talks will be tough.

anof disc

pin semi

For their part, the Russians also have little to offer Dr Kohl. They have watched his stature as a statesman grow, and see little chance of using West Germany to ung the Nato seams apart. They may try to appeal above his head to West

European, especially German, public opinion, but know the strength of Dr Kohl's majority.

And on the emigration of the two million Russian Germans, the Kremlin has evidently taken the same line as it has on Jewish emigration: this is not a matter for outside bargaining, and the country can no longer afford to allow these well qualified people

Mr Andropov, however wants a success as much as Dr own uncertain political domi-nance at home. A Soviet agreement to bring the Euro-pean security conference in Madrid to a successful con-clusion could be one such that West Germany is still the key to East-West relations, it will have increased Dr Kohl's

#### Canberra's powers Giant space stations the

Soviet aim From Richard Owen

Moscow
The Soyuz-Salyut mission, which enters its second week today, shows that the Soviet Union is pressing ahead with an ambitious space programme based on giant orbiting stations, despite doubts about the long-term effects of prolonged weightlessness.

Soyuz T9, manned by Colonel Vladimir Lyakhov and Eliohe Froinger Alaksondray

Flight Engineer Aleksandrov was launched last Monday and docked with the Salyut 7 orbiting space station on Tuesday. A previous attempt to dock with the Sadyut 7 in April failed.

Experts pointed out that the orbiting station consisted not only of the original Salyut 7 but also a large module, Cosmos 1443, which was launched in March and linked or with the orbiting Salyut 7 up with the orbiting Salynt 7 by remote control. The two units together now form a space station 100 ft long.

On Thursday the cosmonants entered the Cosmos 1443 module and are now using its scientific equipment for experiments as well as expanding their living quar-

Cosmos 1443 was originally described merely as a cargo or supply craft. Tass called it a "space tugboat". But it is clearly more than that, since it consists of an orbital module with manocuvring jets and a descent module which can detach itself and return to Earth with up to 500 kilograms (more than 1,100lb) of instruments and experimental

Tass said that the "orbital complex" formed by Salyut 7, Cosmos 1443 and the Soyuz tons, and was part of a programme leading to a system of "near-terrestrial space experimental laboratories". 19 craft weighed nearly 50

when an individual seeks to find out what information the Government is holding on him in its files. Mr Mark MacGuigan, the

Justice Minister, told reporters that the legislation was founded on three principles: that Canadians should have a right of access to information in government records; that exceptions be as limited and specific as possible; and that Government lecisions on disclosure should be subject to independent

Anyone who feels he has been denied information unjustifiably can appeal to an independent, Government-appointed infor-mation commissioner or privacy commissioner. Beyond that, he can appeal to the Federal

#### Malaysia to take charge of news

From M.G.G. Pillai Kuala Lumpur

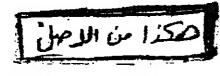

Foreign news agencies will not be allowed to deal directly with local newspapers, radio and television stations from May next year, when they will have to go through Bernama, the national news agency.

The announcement by Datuk Adib Adam, the Information Minister, had been expected for some time. Only Agence France-Presse distributes its news and commercial services

through Bernama at present. The Malaysian plan was first spelled out at a meeting of the Organization of Asian News Agencies, in Kuala Lumpur, in October, 1981. The consensus among the news agencies then was that Bernama would not be able to cope with the takeover.

Informed sources said yesterday that the Malaysian Cabinet discussed the subject well before Saturday's formal announcement. Bernama will be the sole distributor of both news and commercial news and services, and will coordinate the provision of all telecommuni-cations facilities required for news and other services.

affected by the announcement, since it is the only one providing news and commercial services to a wide-ranging list of

#### Tearful hostages fly in

Ten Portuguse, including five children, march for 53 days to the anti-government arriving in Lisbon yesterday after their release by Angolan guerrillas who held them captive for more than three months. The 10 - some of African descent, others who had lived in the former Portuguese colony for many years - looked tired but in good health on their arrival from Johannes-

burg (Reuter reports). Several of the hostages had been captured with 66 Czechoslovak technicians and their families in a raid by Unita guerrillas on an industrial complex near the Angelan port of Mocamedes on March 12. Others had been seized at Lumaum in January and forced to

guerrillas' central camp.

Forty-five of the Czechoslovak hostages returned home last Friday.

International Red Cross officials who negotiated their release said 20 Czechoslovaks and 10 Portuguese were still in Angola. Unita, which has been fighting the Marxist Angolan Government since independence in 1975, said the remaining hostages were being held to be exchanged for jailed rebels and possibly for one Irish and six British mercenaries imprisoned by the Angolan

#### **Diplomats** optimistic over Sudan captives

Nairobi (Reuter, AP) -Western diplomatic sources are optimistic about the future of five foreign aid workers held hostage in southern Sudan, after long talks by radio between missionaries and their captors.

The sources in Nairobi said yesterday that missionary negoliators and a Sudanese intermediary radioed a rebel camp at Boma from the southern prov-incial capital of Juba, 120 miles to the south-west, and spoke to one hostage and the rebels for more than an hour on Friday Previous radio contact with the rebels, members of the hitherto unknown Liberation Front of Southern Sudan, has been brief and the sources described the latest communication as positive in tone. They said the hostages - two Americans, a Canadian, a West German and a Dutchman were

all in good health.

The five were abducted last week by secessionist rebels who want an independent state called Kisua. They have threatened to kill the hostages if their demands for international pub-licity, 2 \$60,000 (£40,000) ransom and clothes are not met

by Wednesday.

The guerrillas have not repeated their threat to kill the hostages, but diplomatic and missionary officials believe the ultimatum stands. There seems to be a tacit understanding that the death threat remains in force", a missionary spokesman said yesterday.

#### Opponents of apartheid

#### Only 11 still banned in South Africa

From Our Own Correspondent, Johannesburg

Only 11 people in South Africa, mostly blacks but also some whites, are still languishing under banning orders, the peculiar form of punishment devise by the South African authorities for those whose opposition to apartheid is deemed to be a danger the state.

Banned persons may not be quoted in South Africa, usually cannot meet more than one person at a time, must report at prescribed intervals to the police and may not leave their home towns without permssion. In its most severe form, banning can involve banishment to some remote part of the country and virtual house

Under the nwe Internal continue Security Act which became law 1950s. in July last year, all existing banning orders, of which there

between 60 and 70. Mr Louis Le Grange, the Minister of Law and Order, decided only to issue 10 new each case by the Directive of Security Legislation. Among those who have been rebanned is Mrs Winnie Mandela, the wife of Mr Nelson Mandeia, the imprisoned African National Congress president.

Mr Woods: Still nonquotable.

The eleventh person still banned is the Rev Beyers Naude, the rebel Dutch Reformed Church minister who ran the anti-apartheid and now prohibited Christian Institute. He was the only person who had already been banned under

Among persons whose banning orders were not renewed son of Mr Walter Sisulu the imprisoned ANC leadeer, and his mother Mrs Albertina Sisulu: Mr Joe Thiolog and Mr Mariemuthu Subramoney, prominent black and Indian journalist: and Mrs Fatima Meer, a Ghandi scholar and Indian activist banned almost continuously since the late

About 95 people who are no whereabouts is unknown, continue to be non-quotable in South Africa. They include Mr Donald Woods, former crusad-ing editor of the Daily Dispatch of East-London and friend of Steve Biko, the black consciousness leader who died in detention in 1977, Mr Woods now lives in Britain, Exiled leaders of the ANC also fall in this category.

The practice of banning has been repeatedly and sharply criticized abroad, and many observers believe the South African Government has been under strong pressure from numbers of people affected. The Reagan Administration has been attacked at home for its policy of "constructive engage ment" with Pretoria.

The 10 rebanned persons are Mrs Winnie Mandela, Mr Johnny Issel, Mr D. D. Makan-da, Mr M. K. Madlingozi, Mr I. G. Nathaniel, Mr J. B. Cekisani, Mr A. Cassim, Mr Rowley Arenstein, Mr F. G. Mswane and Mr Matata Tsedu.

#### **Bulldozers** evict squatters from Harare camp

Harare (Reuter) - Bulldozers sent by the Zimbabwe Government razed a squatter settle ment on the outskirts of Harare leaving 3,000 people homeless, the *Herald* newspaper reported

The squatters, on a private farm, had defied orders by the local Government and Town Planning Minister, Mr Enos Chikowore, to evacuate the area by midnight on Thursday.

The Government said unauthorized dealers had been making fortunes from selling plots to people desperate for

The national news agency said that Mr Chikowore personally supervised the demolition

#### Ships' captains asked to pick up boat people

From Alan McGregor Geneva

An appeal to captains of merchant vessels in the South China Sea not to sail past Vietnamese boat refugees in distress has come from the United Nations High Commission for Refugees in Geneva. It says their small craft are frequently being ignored by shipping, irrespective of their obvious plight.

A year ago, according to UNHCR, some 20 per cent of the refugees - or about a thousand a month - were being rescued at sea by commercial shipping. The percentage fell to nil in February this year, though since then it has risen slightly. Boat people departures from

## Greenham camp in US

From Trevor Fishlock, New York

peace camp at Greenham Common, American women are sctting up a similiar encampment close to an army nuclear missile store in New York state.

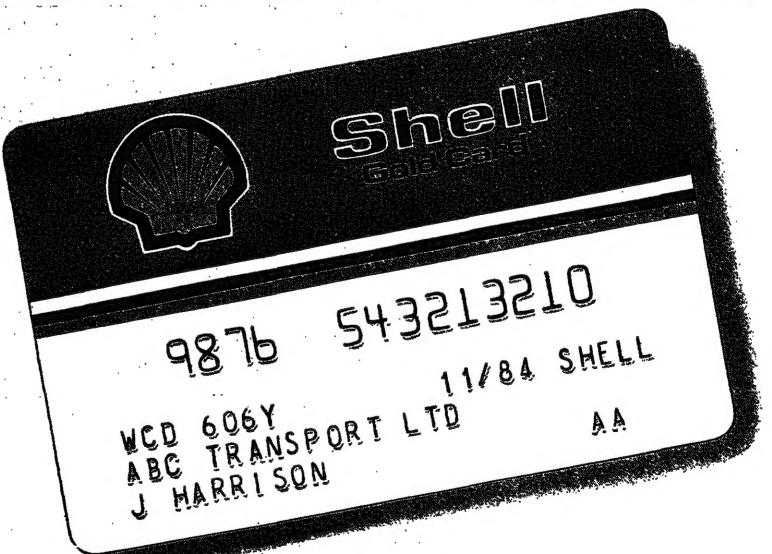

They will stage a night-and-day vigil until September as a protest against the sending of Pershing and cruise missiles to five European countries at the end of this year.

The American women have experience of the Greenham Common demonstrators and bought a 51-acre site beside the leading to disarmament.

Inspired by the women's army depot at Selenca for £25,000. As owners they are less likely to be ejected.

They call their settlement the Women's Encampment for a Future of Peace and Justice and were aiming to open it today. Several hundred women are expected to take part in the protest and, just as at Greenham Common, men will not be allowed to join them.

Most American anti-nuclear weapon activists do not favour unilateral disarmament. They want a bilateral arms freeze Introducing Shell Gold Card.

#### Antenanarivo (NYT) - The Africans but used the idea as a grounds of Madagascar's Presidential palace here are shared by trees and Soviet anti-

aircraft guns, and a Presiden-tial bunker is being built on the city's outskirts. Before President Didier

Ratsiraka ventures from his palace and heads for the airport, soldiers are reportedly ordered into place, one every 50 yards along the 10-mile drive. The President, a Western diplomat said, is paranoid about security. His predecessor

was assassinated just a week

after he took office. Diplomats say the President, a committed socialist, believes South Africa will miss no opportunity to bring him down. This, they say, is why the antiaircraft guns are on the grounds of the palace. They say this also is why he obtained Soviet-supplied MiG21s a few years ago, Soviet tanks and four MiG17s piloted by North Koreans. The MiG17s, how-

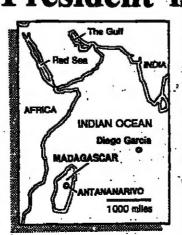

ever, no longer fly. A Presidential confidant said Mr Tatsiraka was not really worried about the South pretext to bring in the MiGs and tanks. These provided the core of an arms deal with the Soviet Union reportedly valued at \$300m (£185m), a sum just \$20m less than Madagascar's export earnings for 1982, as calculated by

But the confident said the President was not so sure of his own people that he felt immune from assassination. He trusted nobody.

In recent years the President's cause for alarm apparently has grown as Madagascar's economy has slid into decline.

President Ratsiraka, a former naval commander who was educated in France, rose to prominence as Foreign Minister in 1972 when Philibert Tsiranana, Madagascar's first President after independence in 1960, was swept aside on a popular wave of diseatisfaction, and power was handed over to General Gabriel Remanantson.

The new regime, reacting to Mr Tsiranana's hatred of the

communist world established ties with the Soviet Union, China and other communist countries. Madagascar also withdraw from the group of countries whose currencies were tied to the French franc, and embarked on a period of rapidly deteriorating relations with the United States and other Western countries.

In 1975 General Ramanantson handed over power to Colonel Richard Ratsimandrava, a radical who held office for only six days before being assessinated. Mr Ratsiraka assumed power as President a few weeks later, advocating socialist policies.

In the view of . Western nists, his policies contributed directly to Madagas-car's economic decline. The economists said peasants growing rice, the nation's staple food, were not rewarded sufficiently for their work and reverted to subsistence farming. The development turned Madagascar from an exporter to an importer of rice.

Last year the island imported 350,000 tons of rice. Simultaneously, the President embarked on a policy called investment to the limits, pouring money into unproductive, but prestigious ventures. The results include a tunnoing factory without hides, 2 fertilizer plant that does not produce the kind of fertilizer Madagascar needs and a hattery plant that has fallen idle because there is not enough money to buy the raw materials.

Madagascar soon acquired a Madagascar soon acquired a foreign debt whose repayments are the equivalent of two-thirds of all export receipts. Mr Ratsiraka was forced to turn for financial help to former enemies in the West – the United States, France, Britain and West Germany

and West Germany.
Discontent spread among
Madagascar's 16 million people. Nevertheless, Mr Ratsiraka won reelection last year, getting what was officially anounced as 80 per cent of the vote. Western diplomats said that without vote-rigging and other actions he might have received 60 per cent or less, but enough to win

But the results were widely interpreted as being tinged with protest. The results were most striking in the capital. Votes were divided evenly between the President and his only opponent, Mr Monja Jaona, an octogenerian Maoist.

No political activity is permitted outside a revolutionary front set up by the President. But within the front there are seven political parties

512 374 ASTON AND THE STREET

Driving isn't getting any easier. So, at Renault, we decided to produce a car that's designed to meet your real needs. And bring back some enjoyment to motoring.

The new Renault 11.

fire to

Ritual killer

र १५८०१त

Punk Pasi

It comes in five versions, with a choice of 3-door and 5-door body styles.

All are hatchbacks, with prices starting at just £4,350.\*

#### Appearances aren't always deceptive.

The Renault 11 certainly looks tough enough.

So do some other cars.

But, unlike some other cars, this car has toughness and safety built in.

The body is given full anti-corrosion treatment before it's even made.

(All the metal used is pre-protected by a special rustproofing process called cataphoresis.)

Extra protection is provided by shock absorbing bumpers and re-inforced side panels.

The design also includes safety deformation (or crumple) zones.

Put simply, the Renault 11's sporty good looks are built to survive.

#### The real drag about driving.

The Renault 11's advanced aerodynamic body shape has a drag co-efficient of just 0.35.

On paper, that's terrific.

In reality, it means that the 1397cc TSE model, for example, is capable of speeds of over 100 mph.

Whilst, at the same time, it helps keep your petrol costs down to a minimum.

You can get as much as 55.4 mpg at 56 mph from the GTL model.

And as much as 38.2 mpg driving in and around town.

#### Now, a word of comfort.

Conditions outside a cartend to dictate what conditions are like inside.

Knowing this, we've tried to make you feel as comfortable as we can.

In the top models, the ingenious, monotrace design of the front seats lets you adjust them through an arc until you find the ideal position.

Meanwhile, in the back, your passengers can be comfortable too.

They can stretch out their legs either side of the single monotrace runner.

Also, some models have split rear seats, which you can fold down individually to provide extra luggage space.

#### Technically, it's now all possible.

The level of technical equipment in the new Renault 11 is exceptional.

There's everything from central doorlocking and electric front windows to a 'lights left on' warning buzzer and an oil level indicator on the dashboard.

Everything you need to make life easier. And, we believe, make the business of driving today more of a pleasure.

1100cc and 1400cc. From £4350.

Renault recommend est lubricarits. \*Price refers to Renault 11 TC (correct at time of going to press) includes 15% VAT, Car Tax and iront seat belts. Number plates and delivery extra. Car featured Renault 11 TSE. Government Test figures: Renault 11 GTL constant 56 mph, 55.4 mpg (5.1 L/100km), constant 75 mph, 40.9 mpg (6.9 L/100km), simulated urban cycle 38.2 mpg (7.4 L/100km). In the first of a three-part series, Frances Gibb looks at the way the system was devised - and how it works - to discover why the bill for legal aid has doubled in the past five years

# Making crime pay

Legal aid, conceived to give everyone

One prosecuting solicitor in the access to the law regardless of means, is

North of England says: "The scheme crying out for reform. The Lord Chancellor believes the service is "cascading out of control", and demand threatens to outstrip supply, despite the theory it is there for all who

It is now one of the fastest growing branches of the welfare state - the cost has doubled in five years - and cracks

are beginning to show.

To its critics, legal aid at best means waste; at worst, abuse by any or all of those involved: defendants, police, lawyers, court staff. And it is the criminal legal system, where police accuse lawyers of having their hands deep "in the legal aid trough", that is

Criminal legal aid now accounts for the lion's share of the spiralling costs. It totalled more than £100m last year compared with £500,000 in 1961, £63m in 1979/80 and £85m in 1980/81: an increase the Lord Chancellor has described as "cascading out of control". In Scotland, in just one year, 1981, legal aid rose from £17m to

Although few firms of solicitors specialize in criminal legal aid, it is possible to build up a practice entirely on such work. This has happened chiefly in the big cities such as Liverpool. As Tony Judge, editor of the Police Federation's magazine, puts it. "There are a few firms that have learned to squeeze the udders that milk

Criminal legal aid can be wasted, or misused, in a number of ways. Solicitors, for instance, can make claims for work not done. Last year in Scotland eight Ayrshire solicitors were reported for allegedly making false claims. But such allegations can be difficult to substantiate. The Law Society in Scotland proceeded against only two of them, the rest were "too trivial or lacked evidence". Of those two, one was found guilty of pro-fessional misconduct and fined £2,500.

Second, there is the duty solicitor scheme, which the government is proposing under the Legal Aid Act 1982 to make nationwide, in all courts. This scheme, under which a solicitor is "on call" at a court for defendants who need advice or representation, can provide a young solicitor with a steady source of income.

the plans to build a full-scale replica of the Second Globe in Detroit

And in London, the tireless Sam

Wanamaker presides over plans to rebuild not only the first Globe but

was designed to remove touting. But there are solicitors who get themselves on the bandwagon of the scheme and can build themselves up into a criminal practice, professing criminal advocacy.

Such solicitors might not always be experienced or able, he points out. "The quality of some is less than desirable, although in a number of areas the solicitors who get on to these schemes is carefully monitored. But elsewhere they get on the rota to improve their status; it maintains their presence before the court."

they work well. But one of the abuses is the taxi-rank system: you keep the cab with by court clerks. Solicitors would waiting as long as you can while the have to spend considerable time money builds up, and get as many adjournments as possible."

have to spend considerable time making the same inquiries "to very little practicable benefit."

And there is not always sufficient check on who is receiving advice. Mr Timothy Lawrence, secretary of the if the duty solicitor did not have to London Criminal Courts Solicitors' assist with the whole case but only Association, observes: "Certain solicidealt with defendants "for the day as tors will offer advice or give consulbest he could manage." tations to almost everyone, including all drunks and prostitutes, who know exactly what they are doing and don't need the advice.

The problem has been made worse by the practice in some courts of asking the duty solicitor to see everyone whether in custody or not, he says. "And now, with the proposal that this should happen more, we are concerned there will be no incentive for defendants to see a solicitor of his choice, out of court. The abuse is confined to a minority,

however, and most solicitors are anxious that both abuse and waste be curbed. The London Criminal Courts Solicitors' Association is making representations to the Law Society over the society's draft proposals for a several other factors such as rate of country. It says that many local law societies not only lawyers but police. and magistrates' courts do not see the need for a 24-hour scheme in their area. Such schemes, it says, should be limited to providing "first aid" to defendants unable to consult a solicitor of their choice.

To provide representation for someone before the court for fine defaulting rate for magistrates' courts is 14 per is "quite inappropriate and impracti- cent and I per cent for crown courts.

Moore, and so on." The climax will be a reception at Buckingham

inquiries in such cases could be dealt

The association adds that a cut in public spending would only be possible if the duty solicitor did not have to

#### For years there has been concern at the disparity in the courts

Another problem would be the effect on the quality of advice. Solicitors on only present regular court work.

is granted or refused by magistrates.
But for some years there has been concern at the striking disparity in probably better than many large court refusal rates between courts, even in the same area. Nationally the refusal

Another prosecuting solicitor in the cable", it continues. In central London
Home Counties says: "On the whole, the substantial daily number of means has shown variations of between 3 per cent to more than 40 per cent.

In practice aid is granted by court clerks, although magistrates must authorize refusals. Two tests are applied: interests of justice, with such factors considered as likelihood of custodial sentence, risk to a defendant's job, or whether a complex point of law is involved. Nearly all crown court cases come into at least one of these groups.

Second, there is a means test. How this works depends very much on the court. The court can order contributions or down-payments, but only 10 per cent of defendants contribute to their costs. A contribution may be ordered even if there is an acquittal. The Lord Chancellor's Department

admits the means test is currently "in chaos". Free legal aid will be given to someone on supplementary benefit, or duty rotas were already criticized as facing a charge such as murder. But inadequate and inexperienced by after that it will depend on net magistrates, it says. Some have long disposable income (less tax, dependsince given up regular advocacy, if they ants' allowances, rent) set against the ever did it, and their rota turn is their likely costs of the case. likely costs of the case. To see the system in practice, The

Duty solicitor schemes apart, the Times spent a day at one of the three criminal legal aid Bill is affected by busiest magistrates' courts in the Manchester City which nationwide duty solicitor scheme, grant, court administration and listing, grants 13,000 legal aid applications a expressing concern at the implications. and efficiency in case preparation by year and sees 30,000 to 50,000 cases through its 20 courts a year. With the The aid, available for defendants average cost of a summary trial now only and not for private prosecutions, £150 and a committal £210, its legal

complexes, highlights clearly the typi-cal problems faced by court administrators at courts of this size throughout there are always some who will abuse the country.

Each day one of four special court clerks sifts the legal aid applications. Manchester's grant rate, at 90 per cent for magistrates' cases, is high. The problems are soon apparent. At least one-third of the forms give insufficient detail. Lawyers say they have not enough the heare of improving their it in the hope of improving their chances of legal aid. Others are reluctant to give details of previous convictions, possible defence or likely plea prior to the court case. All these forms have to be sent back.

The touchstone in granting, one clerk said, is the offence rather than the defendant's means. Someone at risk of custody gets legal aid. But someone facing a £5 fine for cycling without lights who is pleading guilty will not; a solicitor can do little in mitigation. "It's no use spending £100 of tax-

payers' money to drop a fine by £10, especially if there might be £50 costs."

There is plenty of room for abuse.
"Not guilty" pleas tend to get aid, as do elections for crown court trial. A few solicitors therefore encourage going for jury trial and a not-guilty plea, even though half of these pleas change just before trial. Although clerks know the likely solicitors, they cannot take a risk and not grant aid in case an innocent defendant has by chance gone to that firm in good faith.

There is also the problem of a few solicitors defending hopeless cases, just because the money is not from the client's pocket; and a few, the clerks say, who exaggerate travelling time to court (the rate is £16.50 an hour), or put in exaggerated claims for waiting time on different cases when the cases

were in one court on one day.

But with the number of changed pleas and repeated adjournments for hearings, the chief headache for a court such as Manchester is listing of cases. Waiting time in magistrates' courts now runs to £9.5m a year, one of the biggest sources of waste. Mr Philip Dodd, who as clerk to the Manchester City justices runs the courts, says fists now must be deliberately overloaded to try to counteract the number of cases that will collapse through changed pleas. But there are still often empty courts, because the parties and magistrates cannot be assembled at a moment's notice.

#### At £9.5m, waiting time is now one of the biggest wastes

We listed a five-day committal the other day because just one of several defendants was contesting it. In the end he changed his mind and it lasted one hour. So we had four and a half days with an empty court."

Manchester now faces some 40 contested commitals a month; many of which then collapse through changed plea or adjournment. The court recently investigated a number of cases in an effort to find the cause of delay. One reason was the failure of police to prepare papers in time; but defence solicitors were as much to blame. The police, being centralized, are easier to control; less so hundreds of defence

The lawyers involved in repeated delays, which keep clients out of custody and provide more work, are to be called in for a "talk" and possible referral to the Law Society. Magistrates, meanwhile, are being urged to cut down on adjournments. It is pitched warfare between the courts and certain solicitors", Mr Dodd says, "Most are ethical and act properly, but the system."

be distinguished from theirs. Early

efforts have not been too convinc-

ing, but increasing sophistication

ones, but also to individual roles. They provide the statistics with an

ease and reliability not previously available; but it is up to scholars and

critics what they do with them. Concordances of the work of individual compositors of early

printed text open up the possibility of solving some long-standing problems. By comparing the known

preferences of a particular composi-tor with the spelling and punctu-ation in the Folio tests of Hamlet

and Othello, Gary Taylor, of OUP's Shakespeare department, has been able to show that these texts were set

from manuscript copy, not from printed texts. Such work could not be undertaken without the com-

puter, and has significant impli-cations for the editor.

The most exciting work in textual studies during the last few years has

been devoted to showing that the two basic early texts of King Lear, the quarto of 1609 and the Folio of

1623, do not, as had been supposed.

both derive from a single play, but that the quarto gives the play in the form in which Shakespeare first conceived it, and that the Folio represents his substantial revision.

Last year, CUP printed the first of two volumes by P. W. M. Blayney, a

wonderfully detailed analysis of the printing of the quarto in the light of all the other work done by the same printer; and later this year OAP will

publish The Division of the

Kingdoms, another substantial volume devoted both to proving the

two-text hypothesis and to examing some of its critical implications.

King Lear will never be the same

increasingly used in Shakespeare stu-dies. There are

computer-generated concordances, not

only to original texts, and to edited

may yield better results.

#### moreover... Miles Kington

# Calling all Moreover shareholders

Do you sometimes get a bit uneasy when you start reading a page of this newspaper and find it is a huge advertisement in a takeover campaign? When someone called Thomas Lonrho is when someone catted I homas Lontho is appealing to you not, for heaven's sake, to sell your share in P & Q to the House of Tilling? And you haven't heard of any of them, and wouldn't sell your shares to them either, judging from the kind of ads they put in The Times?

We at Moreover House intend to put a stop to that

How? It's quite simple. We are making a takeover bid for the Monopolies Commission. This is a small but powerful organization in London which could, if it wanted to, put a stop to all this takeover nonsense. At the moment we believe its efficiency and profitably are way below espacity, and that its management would benefit powerfully from our expertise.

Under the stewardship of Moreover Holdings; the Monopolies Commission could make a whacking great profit by accepting commissions direct from all firms involved in mergers. Our message to shareholders in the Monopolies Commission is: Accept the Moreover bid!

Moreover would make a mess of it. That is the message from the Monopolies Commission.

All right, so Moreover Holdings are a thrusting new group who have already taken over part of *The Times* newspaper. They have hugely successful enterprises in Hongkong, Singapore and Moscow, as well as a thriving hot-dog stand in the Cayman Islands. They have sole worldwide rights in General Galtieri's springs.

writings.

So what? They are also a fly-by-night organization whose methods have attracted the attention of the police in such places as Moscow, Hongkong and Singapore. The public health authorities in the Cayman Islands have twenty prosecutions pending. And General Galtieri's works are considered to be a fake by none other than Lord Dacre.

Run properly. Moreover could be a credit to British business. That is why the Monopolies Commission is, for the first time, making a takcover bid.

If you own Moreover shares - sell out to

If you own Moreover shares - sell out to Monopolies!

The Monopolies Commission really has got its knickers in a twist, hasn't it? Did you ever see anyone so scared in all its life?

What it needs is someone grown up to run it. And that means Moreover Holdings.

On the day we take over there will be unlimited salmon for everyone. That's a promise. Stand by us and we'll stand by you. Don't accept the Monopolies bid. A message from Monopolies.

Blimey, so they're offering bribes now, are they? A free lunch if we get taken over. Could you really trust a shady, corenot outfit that made offers like that?

Here's what we say to Moreover shareholders. Accept our bid, and we'll give each and every one of you a small company of his own to play with. We have more than a few left over from previous cases.

Can't say fairer than that, can we?

A final message from Moreover. Money isn't everything, you know. The quality of life counts as well.

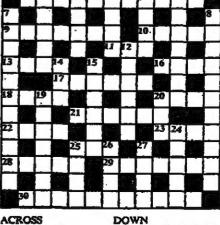

And talking of private life, we have some very curious information about the lifestyle of the people who run Monopolies. Red hot, some of it. Not the sort of stuff you'd like to get out.

So remember if the Monopolies bid is successful, Moreover Holdings will not be afraid to spill the dirt. This is a blackmail attempt by Moreover

Holdings, the group that nobody messes around with.

[A message to Moreover Holdings and the Monopolies Commission. This take-over battle is now closed. Ed.]

Palace. Also according to the Newsletter, a hundred guests "will be selected by the Palace from a list (half British and half American) submitted with the amounts each person will have pledged." Labours found There's always the Shakespeare new documents may turn up. In 1904 a

copy of the pre-viously unknown

existence, or does a copy turk in some unsuspected spot? Even a Missing bowl Shakespeare manuscript may survive somewhere. But at this stage in the game, discoveries are likely to be a matter of luck, by-products of other work, not the result of a systematic search.

can Shakespeare Newsletter reports some details, such as the fact that that "large donors" will be treated the play "had been acted not passing in the preceding four days to "a two or three times before." Maybe

the man who saved the child was the the second Globe Theatre. Orrell one who, according to another letter, reconstructs Hollar's methods and "had his breeches set on fire, that arrives at a surprisingly procise would perhaps have broiled him if he had not by the benefit of a provident wit put it out with bottle-ale".

In his will, Shakespeare left a "broad silver-gilt bowl" to his daughter Judith. Silver-gilt bowls of the period are far more likely to have been treasured than literary manuscripts. This one may easily be a valued antique, perhaps in a church, college, or museum, its associations unknown.

Hollargram

Scholars are still trying to discover exactly what sort of theatre it was that burned down in 1613. The latest study, just published by C.U.P., is The Quest for Shakespeare's Globe, by John Orrell, of the University of Alberta. He has have stood on the tower of Southwark Cathedral to make his panoramic drawing which includes

arrives at a surprisingly precise calculation of the theatre's dimensions. He reckons, too, that it could hold 3,350 people - well above twice the capacity of the Royal Shakespeare Theatre or the Olivier

Recycled Textual studies feed new editions as

do the thousands of other books and articles that appear every year. There seems to be a 30 year cycle for major editions: the Cambridge began to appear in 1863, the old Arden in 1899, the New Cambridge in 1921, the new Arden in 1951, and the Oxford in 1982. Cambridge also has a new edition in hand.

French farce

Shakespeare's conferences, giving specialists the chance of both formal and informal discussions of the latest research, are held regularly in developed fascinating new ways of England, America, France, Germanswer the questions. It is difficult interpreting old evidence, working any and Japan, and sporadically with a dramatist whose whole aim out that Wenceslaus Hollar must elsewhere. Usually they include one is to sound like people other than or more performances of plays. At a himself, and it means that many conference in Toulouse this April, I authors besides Shakespeare have saw a production of The Winter's to be investigated if his work is to

Tale, in French, by local amateurs, which reduced an initially respectful audience to helpless mirth in its later stages when the actors, having failed to memorize their parts, resorted to miming an entire, long scene to tape-recordings of their own voices. The British Consul loyally declared that Toulouse audiences were not yet ready for Shakespeare. But next evening six professionals, all nen, gave a Coriolanus - also in French - which for inspiration, dedication and intellectual energy would have been hard to beat

**Christopher Marlowe** 

Fringe following

Studies in the authorship of Shakespeare have tended to belong to the eccentric fringe. Calvin Hoffman is still determined to show that Christopher Marlowe, whose death is recorded in 1593, stayed alive and went on to write Shakespeare's plays. Where that leaves the Swan of Avon is not quite clear. But genuine question marks hang over some plays - early ones like Henry VI and Titus Andronicus, Late ones like Timon of Athens and Henry VII. The emergent science of stylo-metrics, which uses the computer in the attempt to analyse and identify an author's stylistic traits, may help to

marks

is the goofy looking woman who faints on the staircase when her

family suddenly notices that the newly washed clothes are soft and

sweet-smelling. One wonders what kind of a laundress she was before the purchase of P & G's fabric

Did the towels come out of the washing machine crunchy as barbed wire? Was her husband ostracized because his shirts smelt like Jeyes

conditioner resulted in such bectic

Fluid? And why does a little gratitude knock this woman uncon-

scious? Are her husband and children such ingrates that a rare

word of approval from them causes her to behave as if she's discovered the Esso tiger flexing his claws in her laundry basket? Clearly her home-life is obnoxious and I am not

surprised that young women sur-veyed by the Holder and Scorar

research consultancy singled out the Lenor commercial as being particu-

larly offensive. Holder and Scorar's research has convinced them that most soap.

powder operas need a new script. Kay Scorar, one of the firm's founders, said: "It's not only women

who are antagonized by these commercials, the ordinary man in

the street is beginning to find them offensive on behalf of his wife. "Our

surveys produced three main criticisms of the commercials: they

portray life-styles which no longer

exist, they attribute emotions to situations where emotions aren't

involved and they're very unorig-

A study of the Portrayal of

Women in Advertising, carried out

for the Equal Opportunities Commission by Manchester University's,

marketing department, reported that

".... the treatment which incorporated a less restricted, mod-

ern female role-portrayal was con-sistently found to enhance the

advertising". Not much notice has been taken of this finding.

Such is the advertisers' evident,

longing to see women back where they belong - right there stoking the show former tennis star Christine Truman in the unlikely role of obsessive housewife, smirking ... proudly as she holds her glowing tecshirt up to the light. The downbeat message of this commercial is that, championship seasons dwindle and die, but washdays go on forever. In real life, tennis players past their peak don't seem to end up as Mrs whiter-than-white. They become sports commentators, design consultants and writers of scandalous:

The men who advertise detergents are not alone in suffering from a ... witless kind of nostalgia regarding the lives of women. In the early days of the advertising industry, when the

agencies hummed and buzzed with thrusting young men in buttondown shirts and horn-rimmed glasses, the Average Housewife existed in her millions. Today, even though the full-time 4

housewife is rarely sighted - only one in five households contains a married woman who doesn't go out to work - the advertisers planning

new campaigns still seek her out, ignoring the views of the women-who now outnumber her: working

wives, single mothers, unmarried

women, divorcees and widows. It is this group of women who, according

to the Holder and Scorar research.

# MODERN TIMES

lorgover lorgover licholder

sideways look at the British way of life

My pub-gaming went out when the micro-chip came in Put that down to the age of the player if you must, or to the age of the splendid old wooden machines which I, helped by a thousand other pairs of hands, shook into submission. Fully ten years ago it became clear to the compulsive user of the skittle-billiards or bar football table that there was a revolution in the beery air, an electronic prince waiting in the snug.

The first signs of change were the ever less. frequent visits of the maintenance men. In my local, admittedly, they never exactly got the comeon; they were usually taken for closet weights and measures men, and the ribby alsatian would stand

guard with his tongue steaming as if to say: "You lay one finger on that table, and I'll have your ....

But it was not only in this pub that the footy and the billiards seemed to rot into relics; it was happening everywhere. Fewer and fewer balls came down the chute; the red got stuck and you had to improvise with a daubed white; soon you could see the lead beneath the rents in the felt, gouged and regouged by drunken cue-tips; finally the time mechanism went wrong and you could get an endless game for nothing, which devalued the whole thing and turned it into just another beer table. From there it was a matter of time before the poor old hulk, sans coins, sans cues, sans balls, sans everthing, was dragged into the

shadows and forgotten.
The poor old footy went the same way, the little wooden players got terminal cramp, hung on their spindles with their feet in the air, and the table duly joined the billiards in the morgue. In a matter of weeks, the click of ivory and the blast of little Bobby Charlton's double-footed drive was replaced by a muted but carrying, bleep from a black screen in the corner of the saloon. A white fleck was dancing from side to side and being parried (or not) by two vertical cursors. The shrieks of the players made an odd contrast with their motionlessness

Nostalgia, you say, and I plead guilty to the charge; it is true that not all pub games are yet in the province of the microcircuit. There are bold, even growing pockets of resistance around the darts board, domino table and, of course, fruit machine. Yet this last category seems to me the most abject of the lot. For a start, the world of coinciding raspberries and bells that don't line up has always attracted the wide boys and taken all credibility from the rotating bands. There is no pitting of hand and eye against a moving ball nothing but addiction to someone else's easy profit. I know I am in a minority, but when I want to lose money by watching patterns blur before my eyes, I would rather take a cab from Redbridge to

Richmond at three in the morning. I would like to rationalize my frumpy distate for the beeping and bleeping games by saying that they are more predatory, more nakedly aggressive than the old mechanical genre. Indeed, at the risk of falling flat on my face. I shall try. The latest, most

sophisticated model is a thing called Pac-Man. Each player controls, or attempts to control, an army of snapping, disembodied heads, all seething their way round a maze and the aim is, put at its simplest, to swallow your opponent. At advanced hours of the evening the screen is usually surrounded by partisan well-wishers encouraging their man to "Eat! Eat!" or "Swallow! Swallow! Swallow!" One of my more imaginative friends, himself an irredeemable addict, reckons the appeal of the game lies in its reconstruction of childhood nightmares, and who am I to argue?

You may say, in return, that there was nothing particularly gentlemanly about rattling your opponent's wrists with the force of your centre forward's shot, or causing him to lose his entire score by toppling the black mushroom, but then think of those moments of finesse and gentle tension as the red ball lipped into the 200 hole. . .

For me, though, the most heinous game of the lot - mercifully scarce - is a calibrated strength tester with a trigger mechanism, which the labourers of Camden Town squeeze like putty. You see, I just can't shift it.

Alan Franks

# Eaten up with Pac-Man

It's actually a very old game indeed in Oxfordshire and the surrounding counties—and there are a couple of isolated pockets elsewhere, in Kent for example. There's a very similar game played in northern France. It used to be played with real dolls, like the one in Worzel Gummidge, but you don't see them any more. You have six or eight in a team and each player has six sticks-a little larger than a truncheon-which they throw down a pitch at a small wooden doll sitting on an L-shaped piece of iron (on a pole), which swivels as you bit it. The object of the game is to hit the doll off cleanly, always throwing underarm, without first touching the iron: the chap at the other end of the pitch (the caller) calls "iron" if you do that; it's called a blob if you don't hit anything. If wood hits wood cleanly the player scores one point. .

You play three legs and a beer leg. Does the team drink while playing? Mine never stops! They're a very good but social team; by the third leg they're beginning to deteriorate rapidly. Personally speaking I've never seen a side get them all off at: once, that would be a remarkable feat . . . but one of the most incredible games I ever played was one where not one member was under sixty. It's not a game of strength, but a very canny game. And if the wind's blowing it's very tricky.

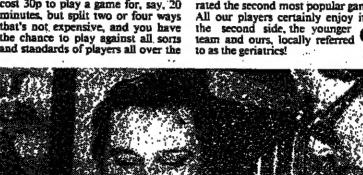

I was brought up in Northum-berland where it's very import-ant for a man to be a good darts player and a good drinker. I started playing in youth clubs when I was fourteen or fifteen. I was fairly good from the off, yes - good hand/eye coordination. I've never done one hundred and eighty in three though I've seen it many times - my best is one hundred and sixty. The main games in Northumberland are double off/501/double finish; 501/ double finish; Mickey Mouse; Round the Board/Cricket. I played in the college team, usually against teams from local working men's clubs in Madeley, North Staffs ... one of the lads.

Drinking's a very important part of the game - most people play much better when they've had a few pints,

you're far less anxious and your eye gets better as you play on - anything from five to eight pints. . . I enjoy the game because it's skilful, gives you the opportunity to do something in a pub and not just stand around drinking and it's a social game. You can get a group of friends together, men and women, different stan-dards, doesn't matter. You play for money or pints or just the sociability aspect. I've been beaten by my girlfriend once in "round the board" but I think that was a fluke! Ever since I was a lad I've always said that I'd like to be good at golf, snooker and darts, for the esteem really, so that your mates, the locals, say "this kid can do something". Esteem means you're Tomorrow: Suzy Menkes reports on the end-of-term shows by the fashion students

country.

### **POT LUCK**

Bar Billiards, Peter Collett

I started to play when I came to the pub thirteen years ago because it was here really and seemed to be well-liked in this part of the world - it is mostly a game that you find in the south-east. I'd call myself a reasonably good player. We have two teams and we play league here every Thursday during the season - from October to May. We were runners up last year in the Witney league. I think it's a good pub game for several reasons. It may cost 30p to play a game for, say, 20 minutes, but split two or four ways that's not expensive, and you have the chance to play against all sorts

element of chance - you never quite know who's going to be on good or bad form, a bit like tennis and you might find yourself in a totally unexpected position. Pool? I have played but I prefer bar billiards - it's a much steadier game. With pool there's a lot of bash and crash. Billiards requires a fair amount of skill but even a learner can have a good game. I think a lot of landlords who want a quick turpover for their money might prefer pool - which did gain a lot of popularity, but I think it's fading a bit now, though that's just my impression. I hope bar billiards will always be found in pubs - after darts I think it would be rated the second most popular game. All our players certainly enjoy it the second side, the younger team and ours, locally referred to as the genatrics!

And then there's the

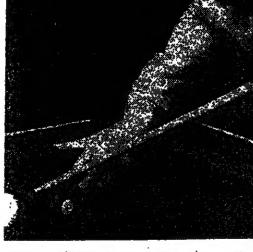

#### wouldn't mind if the Lenor Lady's fainting fit proved to be terminal. Less concerned with

stereotyped guilt So far, in spite of the adverse criticism of their commercials, soappowder sales aren't slumping. This' is largely because Procter & Gamble and Lever Brothers between them own 89 per cent of the washing

powder market. Even so, Kay Scorar thinks that the long term effect of disliked. commercials could be serious for the ... soap giants. "The dominance of ". Lever Brothers over Procter & Gamble might be because Levers advertisements for products like." Persil Automatic are jollier and less. concerned with the kind of stereotyped guilt you see in the Procter & Gamble commercials. Another factor is that in most markets it's the little people who are beginning togrow. Small companies don't have £50m a year to spend, so they have to spend what they've got more wisely. One day a smaller manufacturer might come along with a campaign for a household product that really says something relevant about women's lives, and that could change things. Younger women are being ignored by the giant companies. These women haven't made up their brand choice yet and when they do. they're going to go for what seems relevant to them.

She is taking the long term view, I am still worried about the short term effects of letting the washing line stand as a symbol for marital stability. Procter & Gamble is the top single television advertiser and had it a mind to, it could swamp the screen with women who are happy only as long as their bed linen sparkles like diamonds. I rang up Procter & Gamble to see if the Lenor... Lady was going to run and run. They

#### **HUSTLE PSYCH** Pool, Sara Tilly

I suppose you could call pool the poor man's snooker. The the poor man's snooker. The aim of the game, if you're a good player, is to go for a seven-ball break, finishing with the black: if you're a bad player you cover the pockets and try to slow up your opponent by playing a snooker. American pool is more complex, you have to state your designated pocket before you take your shot and you must stick with it. . . . I've been playing since I was fifteen. I started in a British Legion Chib but started in a British Legion Cub but when I applied to join, my application was refused in a letter saying: "we can't accept you because you're a woman and women are

more likely to rip the cloth." I wanted a game, not war, so I went elsewhere. I suppose I took it up because if you want a drink in a pub and you play a game - any game, you're more likely to be accepted and not look as if you're waiting to be picked up . . . Pool is a predominantly male game and being a female is a great advantage. Men think you're going to be easy to beat. Then you play a shot with bottom surew or check side and they become incredibly tense, frightened of being beaten by a woman. I just poddle along and seven times out of ten I beat them. There are also "psychs", such as chalking your cue when your opponent is in an unbeatable position or murmuring unbucky just when he leans down to take a shot People play because they think it's cool - The Hustler remember? If you can play

-pool you're acceptable in a pub.

# **TEAM ESTEEM**

My brother taught me at the age instilled it in me by gentle persuasion ... numbers and figures always held a great fascination for me anyway, and I picked it up quite quickly. I then inflicted it on my younger brother and friends at school who all started playing. There was a lapse of about four years when I went to college. I drifted into a pub in Stirlingshire one night where they were playing cribbage (you very rarely find it played in Scotland) but when I came to live in England I found it played in pubs more often and once I got know a circle of

#### Will travel . . .

Michael Leapman, whose new book about our proprietor, Rupert Murdoch, was reviewed without enthusiasm in three of yesterday's Sunday papers and who parted company with the Daily Express this weekend, has two causes for meful consolation. First, Murdoch has already ensured that Leapman will make a little pot of money from his book, Barefaced Cheek. To ease his way to company reports, Leapman bought £700 worth of non-voting shares in News International at 96p. They quickly doubled in value, and Murdoch now wants to buy out all minority shareholders at 225p a share. Second, Leapman has the thought that he could always stick to travel writing. In the Sunday Telegraph. travel editor Nigel Buxton, finds plenty to praise in Leapman's recent Companion Guide to New York, 14 pages on from Angus Mande's unadmiring remarks about Barefaced Cheek. Buxton notes a "formidable amount of research, nimble and steadfast legwork, lively humour and general

#### ... to these?

Our archaeological correspondent, Norman Hammond, has dug up a splendid entry for my foreign menus file on Second Avenue in New York City. The Sitara restaurant there lists such appetizing novelties as 5Apron Rice. Malagutani Soup. Mangu Cetny. Crab Meat Shaag and Boti Kebab. This is a game readers enjoy too, of course, and J.R.E. Adams recommends the restaurant on the corner of the Plaza Real, Barcelona, which offers Guts, Slab sepia, Slamps, Shails and Squit to the Romana. From menus on Santorini and Naxos. T.H. Leibowitz culled Lamb cooked to a Peasant, Meat Bullets, and Small Try, while Sarah Gainham found only one dish in latin script she could read in the otherwise cyrillic menu of a motorway restaurant in southern Serbia. It was Hemendex.

The advertising agency appointed by the British Deer Farming Association to suggest a brand name for deer mea could do worse than heed my readers' proposals. One come up with "Bambiburgers"; witty

#### Taking a chance

After pennies from heaven, dollars from Forgency, whose debt-ridden musical "Y" ne "f") is not so poor that it can't shower notes from the ceiling of the auditorium. After the show's lean critical reception, it was a sceptical PHSpy who went to the Piccadilly Theatre to evaluate the extravaganza. I have to report that she and her partner found the £25 dinner/show package good value, even if most of those notes turned out to be Monopoly money...

■ The TV programme Help! on Friday was devoted to hysterectomy self-help groups. Is DIY medicine perhaps getting too ambitious?

#### That won't do

American Express was not amused by the publicity material for the film Funny Money which included an imitation credit card appropriating the "That'll do nicely" slogan for comic purposes. American Express has won a court injunction requiring removal of the slogan and changes in the posters for the film. As the company offices are just across the street from the Classic Haymarket, where the film is showing, there will be no shortage of supervision.

• A lecture by Lord Croham, former head of the Home Civil Service, entitled Change and stress in the structure of British government, was classified by The Treasury's library under "National Health Service."

#### Island hang-up.

This is the sesquicentennial of Charles Darwin's visit to the Faiklands. He did not like them. It rained incessantly, his ponies were always sinking up to their bellies in bogs, and his account concludes: "If any one catches me there again I will give him leave to hang me up as a scarecrow for all future naturalists."

 Oxford University is economizing by sending copies of its regulations only once to undergraduates during their residence, instead of annually as before. Bulldogs bark, but cuts bite.

#### Seat retreat

Patricia Hewitt, who resigned as director of the National Council for Civil Liberties a few months ago because of the prospect of becoming an MP, was so confident she would she started buying a house there. Having lost (by 933 votes), she has now had to call off the purchase.

stone weakling Lin-don Lewis is feeling rather pleased with himself, having just performed a feat of which eight of the Metropolitan Police's brawniest

officers proved incapable - removing a Denver Boot from his car. It occurred to me that it could be a dicey trophy since mere interference with a clamp carries a fine of up to £200, but Lewis assured me he will return it promptly. He says it took him just five minutes to remove the device on Friday afternoon, but adds modestly that he was helped by his nephew, who is nearly one year old. He swears he did not actually touch the clamp, as he removed the whole wheel, replaced it with a spare, and drove off. Now he wants to market an anti clamp spanner at Christmas, but I doubt whether it will catch on.

PHS | the Great Flect Street In The Sky.

# Case proved – by the Scots

For many years there has been talk of introducing an independent prosecuting service into England and Wales such as we have had, essentially, in Scotland for three centuries. There has been considerable resistance to the idea both from the Home Office and the police. But the Queen's Speech contained a firm commitment by the new Conservative government in its first Parliament to institute just such an enlightened reform. Let me reassure thosewho may doubt the efficacy of such a reform that they have nothing to fear.

One of the criticisms still raised by the antagonists in England is that to suggest the measure is necessary casts a slur on the police. But justice must not only be done, it must be seen to be done. And it is a principle of natural justice that no man should be judged in his own cause.

Those with an interest in solving crime should not have to be responsible for deciding whom to prosecute and for what. My view is that any reform which removes a possibility of slighting the police is a good

The second criticism is expense. The Home Office has mentioned a cost of £1,000m a year, and that would indeed be outrageous. In Scotland the whole prosecuting service, including costs of witnesses, costs less than the legal aid for defence, and in any event well under £10m a year. Applying standard formula, a service in

#### by Nicholas Fairbairn

England should run to no more than £100m unless the reform is used to build new empires. That must strenuously be pre-

A third criticism is that English procedure is more complicated than Scottish and the systems will not fit. What a wonderful argument this is for simplifying English procedure, and what a chance to abolish committal proceedings. These are not only out of date but would be irrelevant and superfluous under an independent prosecution system with any presumption of good faith; and no prosecution could be taken or charge preferred unless there was sufficient prime facie evidence to proceed.

Fourth, it is argued that an extra layer of prosecutor will cause delay. Here again, there is a golden opportunity for the English legal system to institute some excellent reforms. Compared to those in Scotland, delays in custody cases are a public outrage. There is little point in having a system of habeas corpus if that process itself takes six months to be heard even after the applicant has been in custody for more than a year, in Scotland no accused person can be held in custody for more than 110 days from his full committal, ie, less than four months in all.

Furthermore, there can be no trial at all on a solemn matter unless it is started

within 12 months. In summary cases of a statutory nature, no man may be held in custody for more than 40 days.

It will be argued that to achieve such a time scale there would have to be a vast increase in the number of courts, judges and staff. That claim, too, must be savagely resisted. When I was called to the Scots Bar in 1957, there were 18 High Court judges, of whom two sat in the Lords. Now there are 22, of whom two sit in the Lords and one is permanent chairman of the Scottish Law

In 1957 there were fewer than 40 High Court criminal trials a year in Scotland and very few appeals. Last year there were 462 High Court criminal trials and 1,579 appeals, not to speak of 13,222 bail appeals and 149 remits for sentence, yet with only three more judges. So the system can be adjusted to cope; when there is an absolute time limit, needs must and needs do.

Let us ensure that in introducing the equity of an independent prosecuting system, the Government takes the opportunity to make other widespread and terse reforms so that, as in Scotland, the system will be swift, simple and cheap. I rather think we shall need some Scottish lawyers to ensure that result.

The author, Conservative MP for Perth and Kinross, was Solicitor General for Scotland 1979-

#### Michael Binyon on the plight of the unwanted Turks

# Germany bribe its guests to leave?

Twenty years ago they were welcomed at airports with bouquets by grateful mayors. A generation later the children of West Germany's pioneer "guest workers" are unemployed and unwanted. Victims of cultural alienation and public hostility, they are confined to decaying inner city ghetros, the

targets of aerosol racism.
Official plans are being drawn up to halve their numbers within five years, and last week the government published its proposals to buy them out - offering 10,500 marks (about £2,500) for each foreigner who voluntarily and permanently returns

No one doubts there are too many foreigners in Germany - almost 4,700,000, representing over seven per cent of the population. Despite the ban almost 10 years ago on the recruitment abroad of any more Gastarbeiter, large families and the low German birthrate are still raising the ratio. With unemployment now topping 2,500,000 and likely to go up again this winter, the authorities have decided to take action before resentment turns to

"We ought to do what the Swiss within the coming year. one educated, otherwise liberal government official said - a sentiment increasingly voiced by the man in the street and gingerly broached by politicians. But it is not so easy. Not all the jobs now done by foreign workers, often highly skilled and holding key positions in industry, can be filled from the army of unemployed. And in any case Germans do not mean all foreigners: they mean the Turks.

The shadows of the past make it hard for the Germans to tackle the issue dispassionately, but the government has recognized that any repatriation must be voluntary and

will cost a lot. The new scheme is ended to help workers from certain non-EEC countries start up businesses when they return home It offers a lump sum of 10,500 marks to each foreign worker, plus 1,500 marks per child and repayment of social security contributions. This applies only to citizens of Korea, Morocco, Portugal, Spain, Tunisia, Turkey and Yugoslavia. It will cost some 220m marks (£55m) and is expected to encourage about 90,000 foreign workers to leave

Herr Norbert Blum, the Minister of Labour and the plan's principal author, flew to Ankara yesterday to explain it to the Turks, who have already expressed strong criticism of what they see as the first step in the attempt to expel the Turks from

Many Germans now find their inner cities transformed. Go to the Kreuzberg district of West Berlin and you are in little Turkey. A smell of kebab mixes with oriental music in the rundown streets and buildings. Men with broad, dark faces and black moustaches, women with white headscarves and ankle-length

dresses, children with brown eyes and cropped hair remind you of Istanbul or the smaller towns of Anatolia. The shops are full of Turkish books, cinemas show Turkish films, the grocers stock fine, dark coffee, lentils and flat bread.

The last - and largest - group to arrive, the Turks came at a time when the good jobs had gone, and have not been able to adapt. Many come from rural backgrounds in Anatolia, have never lived in cities and cling to Islam and traditional ways of life. They are stuck at the bottom of the social stratum, still live in ghettos where they feel a sense of security and identity and can hear their language spoken

The Turks have experienced all the problems and prejudices of immigrants in Britain, Emotionally they remain Turks, and dream of returning home. But in reality they have become strangers to their own country, and everyday life in Germany contradicts their aspir-ations. Their children fall between two cultures, speaking neither Turkish nor German well, are under-achievers at school, cannot get good jobs and in their frustration fall prey to crime and prejudice. As unemployment strips away the veil of affluence, they are increasingly seen as competitors for jobs, and race relations grow uglier.

The government knows it has to move fast to defuse this human time bomb. Some 600m marks (£150m) is being spent on special teachers and welfare workers to integrate the second generation. Tough, controversial laws are being introduced to restrict the age at which children can join foreign parents here to six.

Already the penalties for illegal immigration have been increased. Police raids on foreigners' houses have been stepped up. Dozens of Filipino girls have been arrested in the street and summarily deported if their papers were not in order. The law on asylum is also being revised to prevent its use for economic rather than political purposes.

But, as everyone now recognizes, it will take time and money to reverse the steady flow to Germany of those seeking jobs and wealth during the boom years of the 1960s. As one observer put it: "We wanted a labour force, but we got human

# Bernard Levin: the way we live now

# Plus your daily Page 3 shop steward

Lord McCarthy, one of the few great comic figures of our day, has produced a report, commissioned by the TUC, which envisages the foundation of a daily newspaper, tabloid in shape and also, it seems, in character, to supply the desperate yearning of the nation, as expressed in the incessant raging of enormous mobs (some of them comprising mearly three people), for a newspaper which will follow unswervingly the political line of the Labour movement, to ensure which admirable aim its editor would answer to the General Secretaries of the TUC and the Labour Party".

The money for the paper - Lord

McCarthy estimates that it would cost £6.7m to launch and £13.3m a year to run - would have to be provided initially by the trade unions, but his lordship has calculated, on the backs of I know not how many envelopes, that the paper would break even with a circulation of 300,000, and with a circulation of 500,000 would make a profit of some £6.4m a year, news at which Mr Rupert Murdoch, to name but a few, is said to have laughed for quite a long time in a notably hollow (some reports say positively sepulchrai) manner.

Now in the first place, I have to remind the younger members (if any) of the General Council that there used to be just such a daily newspaper, it was called the Daily Herald, and the TUC owned a controlling interest in it. At times, the people in charge would give away such goodies as encyclopacdias; life insurance, sets of the works of Dickens and I think even threepiece suites, to anyone who would agree to buy the paper for six months, but in the end it was clear that giving away the Koh-i-Noor itself could not have eluded the Herald's inevitable fate, and in due course it went off, unmourned, to

In the second place, I believe it is impossible (I have just spent a couple of hours with brows fiercely furrowed in the attempt) to think of any conceivable principle on which to base a newspaper more absolutely certain to ruin it than an official and institutionalized commitment to a particular party line. (Even those who run the Morning Star, which has not the slightest trace of any real existence except as an arm of the Communist Party, have at last, as the paper faces an ever more desperate financial situation, recognized this truth and publicly disagreed with their masters, an assertion of independence as as-tounding - and for exactly the same reason - as would be the news that the Pasha's cunuchs had risen in revolt, seized the harem and raped the occupants.

most politically gleichgeschaltet of our national newspapers. It certainly supports the Conservative Party, and at general elections does so without qualification or indeed scruple. But three crucial provisos must be made. First, support for the Conservatives is not the reason for its existence; second, and consequently, it can and does, between elections, attack Conservative governments, ministers and policies (look at the campaign it launched against the deportation of that unfortunate Romanian); third, if it were not an entertaining and readable newspaper apart from its political views, it would rapidly die, and deserve to.

Take the Daily Mail, perhaps the

Why do you suppose that the Daily Mirror cut so pitiful a figure in the recent election, printing stuff day after day that Cudlipp would have spiked instantly before going on to sack the executive responsible for thinking it up and the journalist who wrote it? Because the people who took the decisions at the Mirror felt bound to adhere to the paper's invariable Labour allegiance while knowing perfectly well that most of the party's policies consisted of mad and dangerous rubbish and that many of its candidates were totalitarien thugs.

And now, if you please, we are to

have a daily newspaper that hopes to survive with an editor who must "answer to the General Secretaries of the TUC and the Labour Party". Contemplating the idea of a newspaper in such macabre bondage makes the flesh creep; when, in addition, one thinks of the two men who actually hold those posts at the moment, the frisson becomes a fit of uncontrollable shivering. I have no doubt that Mr Len Murray and Mr James Mortimer are kind to animals, scrupulously honest in making out their tax returns, and moderate in their consumption of alcohol, but originality, imagination, flair, breadth of mind, sharpness of intellect, resolute independence of character, a sense of humour and the gift of expressing themselves lucidly in their native tongue are not very high on the list of their remaining

Imagine what the reader (readers, if there should ever be as many as two) would find in a newspaper supervised by such a pair! Articles 3,000 words long by Mr David Basnett on the history of the Union of General and Municipal Workers; the serialized memoirs of Mr Frank Allaun; a daily humorous column by Mr Merlyn Rees; a weekly page of statistics relating to national insurance by Mr Frank Field; a regular column consisting of the Wit and Wisdom of Mr Ray Buckton; another on the Capitalist Press by Mr Tom Baistow, a weekly article by Mr Tam Dalyell on the sinking of the Belgrano: a series of Profiles of the Deputy General Secretaries of all

the unions affiliated to the TUC;

sermons by Monsignor Bruce Kent on such texts as "Love your enemies - with the exception of the Americans, of course"; a daily parliamentary sketch by Mr Paul Boateng; a restaurant and wine column by Mr Dennis Skinner, a strip cartoon about police brutality, devised by Mr Michael Meacher, Mr Ernie Roberts as Fellow-Travel Emie Roberts as Fellow-Traves
Editor; cricket reports by Lord
Kaldor; medical advice by the
general secretary of Cohse, legal
advice by Lord Kagan, personal
advice by Miss Joan Maynard
("Dear "Worried About Getting Pregnant', I am sending you under plain cover the Collected Works of plain cover the Collected Works of Lenin"); and of course a regular crossword-puzzle; first prize, a volume of the speeches of Lord McCarthy; second prize, two vol-umes of the speeches of Lord McCarthy McCarthy.

It doesn't bear thinking of More to the point, it doesn't bear buying either, and although I have no great regard for the business sense of the members of the TUC's finance and general purposes committee (who will have, in the first instance, to take the necessary steps towards putting the project into practice), I do not think that they will do anything but bury the whole idea as expeditiously and discreetly as

Anyway, what would they call it? The Daily Labtuc? The Daily Clause Four? The Daily Proletariat? The Murray and Mortimer? The Party Line? The Morning Dependent? The Reference Back? But stay - these suggestions are nothing but persiflage, and I must not be thought lacking in constructive ideas. If the TUC should, after all, stump up £6.7m to launch a colossal and inevitable failure, why not call it the Daily Herald?

# Class warfare at County Hall

I have no proof that Mrs Thatcher and the Socialist Workers Party are in cahoots, but the circumstantial evidence is building up. Their ideologies may be miles apart, but as Hitler and Stalin found over Poland, if the pickings are tempting enough that is a difficulty that can be

The pickings in this case consist of the Inner London Education Authority. Look at the background. For years both have planned the takeover of the authority, both hated its leadership (or at least the leadership it had until recently) and coveted its strength. Both have found it impossible to stop thinking how much better they could use its buge resources.

A really dedicated conspiracy theorist might trace the beginning of the collusion to the William Tyndale affair eight years ago. But more compelling evidence has come in the last three years as successively the far left has strengthened its hold on the Inner London Teachers' Associ-ation (ILTA - the London branch of the NUT) and the Conservative government has taken one step after another to limit the freedom of local government - especially in London.
They fluffed it in 1980. The Conservative attempt to dismantle the authority was hopelessly badly managed; and, for their part, the far left never managed to subvert the "Save ILEA" campaign from being a genuinely broad-based, non-political

Now Mrs Thatcher has gained a "mandate" to reorganize the auth-ority and (more importantly) to fix its spending at whatever level she chooses. And the SWP is the controlling influence and office holder on the ILTA. The opposing ideologies are in good shape, marshalling their forces and ready

The Government having prepared its attack from without, ILTA is busy undermining from within. The ground it has chosen is the issue of redeployment - a crucial management tool in an education authority, but especially one with a rapidly falling population and shifting needs like London. Under the slogan"No compulsory redeployment". ILTA is abandoning agreements painstaking-ly worked out between the authority and the unions over the last five years and inciting its members all over London to take industrial

Its action is unofficial, since the NUT nationally has not sanctioned it and indeed its general secretary has circulated members, begging them to call it off. Obviously to him, as to the rest of the same world, strikes against the most generous authority in the country, in schools whose ratios and resources would turn teachers outside London green with envy, at a time when the threat of a Conservative clampdown is looming ever larger, is the biggest

The industrial action takes two forms; a Day of Action-style walk-out, and no cover. The latter means

colleagues. Both mean children missing lessons and being semi home. Fortunately only a small minority of ILEA's 1,100 schools have been affected so far; how far it spreads will depend on how farmly the authority reacts. As yet it has taken no disciplinary action at all.

The position of the present ILEA leadership is desperately difficult. They are predominantly those of the "no enemies on the left" persuasion. who have gained their positions within the London Labour movement through sustained attack on the "compromising moderates" in the parry. They are accountable to general management committees which often contain a large number far left London teachers. Additionally they may have com-mitted themselves when they were selected to acting only in accordance with the general management committees' instructions.

They know that allowing the present situation to drift is damaging children's education, damaging the management of the service, and damaging the authority's credibility, but they dare not act against their own power base. They have offered more talks, extra supply teachers. better primary ratios, rehearing appeals for individual schools staffing. ILFA have rejected them.

They think they know when they are on to a good thing. It is enough to make you weep with despair and frustration. For the first time in a century, we have a government which has abandoned the goal of improving educational opportunities for the majority.

This tragic and retrograde step has been made acceptable by an insidious campaign to discredit local authority schools. The remarks of government ministers appear to endorse the Daily Mail's view that they are wasteful, indisciplined places which get poor results and are staffed by a bunch of over-paid, lazy, and are staffed by a bunch of over-paid, lazy, teft-wing agitators. Probably, the implication is, it would be better to make sure that all the brighter. children, the "children who really matter" (to use the immortal phrase of a former deputy leader of the ILEA Conservative group) are somehow selected out of this independent mediocrity into

Everything the ILTA is doing at present is reinforcing this image. And those of us who have loved and served ILEA for years, who know that the picture in the vast majority of schools is wholly different, that the resources, though generous, are not misused, that many of the teachers work all the hours God gives, that here and there out of the turmoil and difficulty of recent years is developing a quality of education that is truly astounding, what can we do? Are we just to stand by and allow the conspiracy to succeed?

The author, an SDP member of the GLC/ILEA, has been a parent and governor at an ILEA comprehensive

#### Gerald Kaufman

# How Israel could now justify itself

Park, London, sounds an incongruous location for a memorial to the greatest atrocity in the history of a large number of people congregated last Monday for the ceremony marking the establishment of the Holocaust Garden. Forty years after it happened, Hitler's almost success-ful attempt to obliterate the Jews and many others victims, too - is at last permanently and officialy commemorated in our capital city.

It was remorse for the Holocaust that led directly to the establishment of the State of Israel, and it is the Holocaust that is still regularly cited by the Israeli Prime Minister as the justification for Israel's continuation: a people who suffered that Xnspeakable agony earned with blood the right to their own land. In the view of many others, the

time has long passed when there is any need to offer reasons for Israel's continued survival. It is there, a going concern, with a lively and active population and, as every one of its neighbours can testify, one of the most powerful armies in the

Israel's very presence in the Middle East is such a potent fact that there is a certain absurdity in its leaders' pleas that the Palestine Liberation Organization should concede its right to exist, as though that right will somehow remain in doubt until the PLO gives permission for it. The tiniest and least viable member of the United Nations - the Maldive Islands manages to get along quite easily without constantly having to offer justifications for being what it is, where it is. Statehood for the Israelis, how-

ever, is not as simple as that True, they have all the appurtenances of an independent country: a lively and rebellious parliament, an inefficient bureaucracy, an airline (functioning intermittently), an orchestra (several, in fact, all of high quality). Yet they are denied the normality of humdrum, everyday existence that is unquestioned in the Maldives. Many other countries do not refuse to recognize the Maldives, or even think very much about whether they ought to recognize them. Those which do accord the Maldives recognition do not refuse to site their embassies in that country's capital (provided, of course, that they trouble to be represented there at all). Those which do not accord the Maldives recognition do not state of war with them. Israel has Manchester, Gorton.

The Dell, near Rotton Row in Hyde undeniably enforced its presence. but it has not acquired undeniable international acceptance.

Such acceptance is sorely needed. mankind. It was there, however, that Lack of a reasonable relationship with its neighbours, not to mention countries farther afield, has under-mined the potentiality for economic viability of a nation which possesses prodigious technical skills but is bereft of any but the most exiguous natural resources. Financially, Israel is a client state of Washington; its fabric would collapse the moment the Americans withdrew the under-pinning provided by their taxpayers' lavish generosity.

Internally, the country is torn by dissent caused by the controversiali-ty and inefficiency of a government which, unlike the governments of its neighbours, has a mandate provided by a legitimate election but seems to have lost the capacity to fulfil that mandate in even the most elemen-

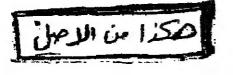

tary administrative terms.

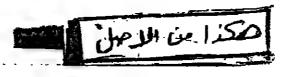

Israelis are confident of the legitimacy of their statehood; but the nature of that statehood would be enhanced if its legitimacy was more widely endorsed. In previous decides, their government and people could point to their country's pioneering achievements, the extra-ordinary status of its trade union movement as a social and economic entity, its vibrancy as an example of dynamic democracy, the remarkable quality of such political leaders as David Ben Gurion and Golda Meir. Israel once basked in the goodwill

of its emulators; today it enjoys little goodwill and few of the latter. When there is so much internal disagreement, its government can scarcely expect outsiders to marvel at its most recent activities: the shoddily bungled invasion of Lebanon, the tatters of a failed monetarist policy. the discredited leadership of a prime minister detested even by many of his own countrymen.

Israel may no longer need to cite the Holocaust as a justification for its existence, and indeed it is almost an affront to the victims of the Holocaust to use their travail as a justification for anything. At the same time, there is a sense in which, in that nation's 36th year of statehood, the case for Israel needs." to be made all over again. A start in making that case could be achieved by the democratic removal of a government whose greatest harm to its own people has been to enable the question of national legitimacy even to be reopened.

constantly declare that they are in a The author is Labour MP for .

the finishing touches to the negotiations between Lebanon and Israel (or words to that effect), he was greeted with general scepticism. But he turned out to be right. So it will be wiser to reserve judgment on the news that he is returning to the region this week, on the way back from his Asian tour, in an attempt to break "the log jam" blocking efforts to achieve a withdrawal of all foreign troops from Lebanon. But it is difficult to know what to

make of it.

The main purpose of his visit, our Washington correspondent reports, is to find out whether Syria is now prepared to remove its forces from Lebanon. On the face of it this seems very surprising, since the Syrian Government has been informing the world in the most categorical terms that it will withdraw its troops from Lebanon only if those of Israel are first removed unconditionally. But Mr Shultz perhaps knows something that the rest of us do not. Reports from Jerusalem say that in the course of the past week American pressure on Israel has suddenly switched direction. Whereas hitherto Washington had been urging Israel not to withdraw prematurely, thereby removing the only leverage available to secure Syrian withdrawal, now - it appears - Mr Philip Habib is telling the Israeli cabinet it should go ahead with implementing the Lebanese agreement, since only after an Israeli withdrawal will there be any hope of getting Syria and the Palestinians to follow suit.

Three possible reasons suggest themselves for this remarkable change of tack. The first is that the Americans have now given up any hope of obtaining Syrian agreement to the simultaneous withdrawal which Isra l is demanding. The second is to at they are now also convinced Israel will not be prepared to prolong fore be willing to consider a the present situation much request from the Lebanese

When Mr George Shultz arrived longer. For the first time since Government for withdrawal of in the Middle East at the end of General Sharon crushed resist-April saying he had come to put ance in the Gaza Strip in 1971 the Israelis now face, in southern Lebanon, an organized and effective guerrilla campaign which is having a disastrous effect on their morale and obliging them to alienate even those sections of the local population that originally welcomed them as saviours.

Domestic pressure for withdrawal is getting very strong, and the government is seriously considering responding to it by ordering a partial withdrawal to new lines which could (it is hoped) be effectively sealed against infiltration and behind which a mose thorough and durable occupation regime could be introduced. That proposal is one which Washington has consistently opposed, arguing that it would amount in all but name to a permanent partition of Lebanon.

Mr Habib may simply have been instructed, therefore, to try to convince the Israelis that, if withdrawal there must be, it is better to go all the way and implement the agreement with the Lebanese Government. But he would hardly have much hope of convincing Mr Begin's Government of this unless he could hold out some hope of Syrian withdrawal, On the face of it there is no hope, since the Syrians bave condemned the Lebanese-Israeli agreement out of hand and have made it quite clear that its implementation would not provide the conditions for their own withdrawal. But it is just possible that some message has reached Mr Shuitz and this would be the third reason for the change in the American attitude - to the effect that if Israeli forces really are withdrawn from Lebanon Syria might be willing to overlook the fact that this withdrawal had taken place under the terms of an agreement of which she disapproved, and might there-

her own forces.

It is just possible, but it hardly seems very likely, and the Israelis would no doubt require very firm assurances that there was more to it than American wishful thinking. But it is at least something that Mr Shultz will be going back to Damascus to hear what President Assad now has to say. He will no doubt savour the irony that he is persona grata there when Mr Yassir Arafat is not; and that very fact will no doubt be taken by Mr Arafat's supporters as vindicating their claim that Syria's real purpose in subverting the Palestine Liberation Organization is to prepare the ground for some squalid piece of horse-trading with the

United States and Israel. But all this high diplomacy should not obscure the very real suffering being experienced by ordinary people in the areas concerned. Among the least enviable in present circumstances are the Palestinian civilians in the Israeli-occupied area of Lebanon. Not only are they the most frequent targets for arrest and prolonged detention by the Israeli forces, because the most obvious suspects when ambushes and acts of sabotage occur. They are also, especially in the Sidon area, the targets of a constant campaign of harassment and intimidation, including in many cases assassination. from a variety of right-wing Lebanese groups to which the Israelis apparently turn a blind eye so long as they stop short of repeating last year's wholesale massacre in Beirut.

There is real fear that such a massacre will occur as soon as the Israelis withdraw. That must at all costs be avoided, either through the Israelis disarming the groups in question before they leave, or through the multinational force being ready to move into the areas in question very rapidly in sufficient numbers and prepared to shoot. One Sabra-Chatila is already far too many.

#### PARLIAMENTARY PAY ROUND

The more charitable or appreciative also have arguments for not giving them any more, or not much more anyway.

 $X = \{ \frac{1}{2}, \frac{1}$ 

There is the argument of inflationary guilt. Inflation is what makes necessary the periodical topping up of MPs. pay. Inflation is a scourge on everybody's back. The House of Commons is uniquely responsible for its presence among us. To deny them relief from its effects is not only just but prudent, since it may stimulate them to do something about it. Since however the present, or rather the previous, House has presided over a substantial drop in the rate of inflation the argument has rather less force than on previous occasions; indeed, if the argument admits carrots as well as stick, it may point to a suitable reward.

Then there is the market argument. People fall over each other to be nominated for a party and then elected to the House of Commons. The calibre of candidate is no worse or mixed than it has always been - it would be quite difficult at any rate to prove otherwise. There is no reason in economics to pay more and therefore, according to one way of thinking, no reason at all.

But the strongest argument, certainly in the minds of ministers, is the argument of bad. example. Because of the stickiness that always retards the movement of MP's pay, an increase, when it is mooted, looks large; larger than whatever going rate the Government of

A policy on alcohol

Sir, Your Social Services Correspondent, Pat Healy, in so ably summarizing the secret Central Policy Review Staff report on

alcohol policies in the United

Kingdom (June 27) has done a real

service to many working in the field

of alcohol misuse. The resolution passed by the National Association

of Health Authorities is only the last

of a long list of organizations asking

for publication of this 150-page

drawn to this important, balanced

and informative research many

months ago, when our Working Party on Alcohol Related Matters

obtained a copy of the report from

Sweden where, as stated in the

miess policy for pay in the coming round are under 4 per cent in the public sector and in the private sector substantially less than the 7.5 per cent recorded in the last round.

Beside that the 30 per cent recommended for MPs (most of it for "catching up") looks positively indecent. Sensitive to appearances, the Prime Minister announced just before the election that she and her ministers would forgo the even larger rises recommended for them, and they are now working on their backbenchers to get them to forgo most of the increase the review body has told them they

deserve. MPs vote their own remuneration just as they settle the redistribution of their seats from time to time. Because they acknowledge themselves not to be the best judges of how to carve up the constituency map, they invite the recommendations of an independent commission. So it is with pay. The research, analysis and initial judgment are farmed out to the Review Body on Top Salaries. But the reports of that body fare less well at the hands of ministers and members than those of the senior and statutory boundary com-

missions. MPs now draw £14,500 as well substantial allowances. Lord Plowden's committee looked back to the last full review in 1979 (£12,000 recommended) which the House endorsed while deferring its implementation. To keep pace with the movement of or to inhibit the performance of earnings the 1979 award trans- their multiple activities.

for its publication was circulating in the House. It had obtained the

agree with all three observations.

of Parliament.

It is never the right moment to the day has for everybody else. lates into £19,500 today; in give MPs more money. Those That is how it is today. The relation to prices it translates who affect a low opinion of the norms peeping out of this into £18,500. Consultants who species do not think they are Government's supposedly nor- did a job comparison exercise came and with £18.700, which is towards the bottom of the range they considered. When the MPs themselves were asked what they ought to get the median level suggested was £21,000; the median estimate of what they would be earning if they were not MPs was £23,000 (MPs of course do not lack confidence). Lord Plowden's committee weighing one thing with another plumped

for £19,000. The review body's broad criteria are for a salary that provides adequate remuneration for a member with no other source of income and so keeps open the door for all to enter who will; a salary that is not so large as to invite accusations of privilege or to be an attraction into politics by itself; a salary that is trimmed to take some account of the other rewards and satisfactions of that line of life and its "public service" element.

The criteria are about right, conforming to current ideas of an open and mobile democracy. And the review body's guess as to how to express those nebulous considerations in hard cash is better educated than most. The very real objection that so large a jump would unsettle everyone else who looks to the Government for their pay can be addressed by approaching the figure of £19,000 in two or three annual stages, as has happened before. It is no bad thing for the pay of MPs to lag behind a bit, but not so far as to force them to look for extra- parliamentary pay

#### Tax on good will

From Mr R. T. J. Holl-Allen Sir, Mr Herbert (June 22) is not alone as a professional who not only works for the good of others in his spare time as well as being taxed on his allowances by the Inland Revenue. Members of the medical profession employed in hospitals have been in a similar situation for a

considerable time. Firstly, many exceed their contractual hours, not only looking after patients, but also attending the innumerable committees that are necessary for the reasonable running of the Health Service.

Secondly, most are taxed now or their reimbursement of expenses at the highest tax band to which they are subject. Similarly, the districnurses, who provide considerable support and care to patients in their own homes, are taxed also on their

#### LETTERS TO THE EDITOR

#### Labour's share in dissolution honours

From Lord Winstanley Sir, I gather that I am shortly to acquire some new colleagues in the

House of Lords. It seems odd that Michael Foot. who fought the election under a banner calling for the abolition of the Lords, should now be asking for the appointment of 27 new peers to

serve in it, but the reason is not hard to find. In the first two divisions in the House of Lords in this new Parliament, the Labour Party mus-

tered 38 members against the Government, whereas the Alliance had the support of 46 - without any bishops or malcontented Tories. In other words, in arithmetical terms, the Opposition in the House of Lords is now the Alliance and not the Labour Party.

Of course, the Labour Party has peers in reserve - but the trouble is they always are in reserve: they never turn up. Some of these "absent friends" were once excellent people but they were only sent to the Lords when they had outlived their

So, what will we get this time? Which Labour pensioners will arrive now to swell the "official." Opposition ranks? We must wait and see. In the meantime, I maintain that if the Prime Minister now uses her powers to swell the ranks of the Labour Party in the House of Lords and thus distort the representation of the four different parties on the Opposition side of the House, that would be an affront to the electorate and should be treated as such.

Surely, in simple justice, new peers should be created in the dissolution honours list in direct roportion to the votes recently cast for the four parties - in other words in a ratio of two Tories to one Labour, one Liberal or one SDP. Any other formula might strengthen the support for the campaign to abolish the place and, frankly, I might join it.

Yours sincerely WINSTANLEY, House of Lords.

From Mr H. P. Hall Sir, Perhaps the Prime Minister should do what colonial governors were told to do.

Colonial legislatures consisted of elected members and nominated members appointed by the governors after the elections had been held. However, the governor could not appoint anyone who had stood for election but had been rejected by The UK practice is often the

reverse. Those rejected by the electorate are often returned to Parliament as peers, - and in some cases appointed ministers, to govern those who rejected them!

Perhaps we should practice what we preached to the colonies? Yours faithfully, H. P. HALL 77 Moss Lane, June 29.

#### Dismissal of Mr Pym

From Mr N. L. Cragoe Sir. Mr Francis Pym's quite understandable burt is of the same order as that suffered by all those suddenly declared redundant, either for the job in hand or for differences in policy, but he should not allow it to mislead him to the conclusion that compassion is the prerogative of the "wets" and lack of feeling or

ruthlessness, even, that of the "dry". I would assert that the precise opposite is the case and that all our post-war history asserts the same. There is no compassion in pretending that jobs exist when they do not; that paying ourselves too much in their performance and, indeed, in the performance of real jobs as well, even makes sense when clearly it does not, that government, the taxpayer, the IMF each has a limitless purse when no such thing is

The pursuance of these left wing notions since 1945 has meant inflation, rising living costs, falling living standards, an enlarged poverty trap, a reduction in the value of savings, a dearth of investment decisions, an increasing-

world and, I would suggest, most important of all because it leads to these same results, an appalling poverty of the imagination, so that we lived in a quiet despair until recently. This poverty of imagination has

ly uncompetitive position in the

been rampant in the boardrooms, in the ranks of senior management, among politicians and trade union leaders, in the churches and in the Civil Service, wherever you looked; and to imply now with Mr Pym that people cannot stand on their own feet - other, that is, than those genuinely halt and lame - is at once to perpetuate the insults our people have suffered from the do-gooder in Whitehall who knows best and, also, a self-fulfilling prophecy as, again, history amply OUT DOST-WAT

No, Mr Pym - cushion your hurt as others must theirs - and come into the real world where no one owes us a living and God – still! – helps those who help themselves. Your obedient servant N. L. CRAGOE, Management and Business Studies, 50 Pall Mall, SW1.

of the commissioners on the Brandt report or, more selfishly perhaps,

#### Falklands airfield

From Mr Paul Sinha Sir, The valour, tenacity and operational brilliance of British arms in the Falklands campaign will

remain beyond doubt and beyond praise. In themselves, however, they cannot justify the Government's decision to provide £215m (a conservative estimate, excluding hard-top hangars) for a new airfield on a remote site for which the Navy can scarcely provide the ships, the Army doesn't want and the RAF (operationally speaking) cannot

Any reasoned prediction indicates that eventually some British government will negotiate some accor dation with, say, Argentina, Chile and Uruguay, providing for some kind of UN trusteeship for the islands, the islanders and their surrounding waters guaranteed under international law.

To provide such a body, at that stage, with the virtually free gift of a vastly expensive, laboriously con-structed British airport would prove to be a monumental political

boomerang, to put it mildly.

If the Government has spare packets of £215m available for major civil engineering projects -though it assures us, endlessly, that it has not - it may be better advised to re-examine the recommendations

our own crumbling sewers or unelectrified railways. Yours faithfully, PAUL SINHA, Speldhurst, Brittains Lane, Sevenoaks, June 28,

#### **Invisibles surplus**

From Mr William Clarke

Sir, In your admirable attempt to put the gloom about Britain's manufacturing trading deficit into perspective (leading article, June 27), you rightly pointed out the surplus currently being shown in two other areas; oil and invisibles. But you put the invisibles surplus at "around £2,500m"; in fact your case is stronger than you made out.

The private sector invisible surplus in 1982 was £5,420m, over double your figure. The figure you quoted included the whole of the Government's expenditure overseas on defence, aid, and our contri-bution to the EEC budget. Yours faithfully, W. M. CLARKE. Director General Committee on Invisible Exports, Stock Exchange, EC2.

worldwide phenomenon which will

not be corrected until there is a more thorough exchange of information and personnel. Meanwhile, British

subjects abroad who come into

conflict with the law have the

benefit of the humanitarian and

#### Crime and punishment

From Rear Admiral E. N. Poland Sir. The international ramifications sir, The international ramineations of a return to capital punishment are seldom considered. John Smith, serving a sentence of 35 years in Iraq for bribery, owes his life, to some extent, to the absence of the death penalty in this country. Two Iraqi officials involved in the case were executed, whilst in England Salih Hassan, the assassin responsible for the death on a London street of the former Iraqi Prime Minister, was iailed for life

This judicial imbalance is a

enlightened standards supported by British jurisprudence. Yours faithfully, E. N. POLAND, Vice-President, International Prisoners Aid Bryant's Cottage, Burgate, Fordingbridge, Hampshire. June 27.

#### Cuts in OS services From Mr J. G. Dunbar

Sir, In her letter of June 28 the President of the Council for British Archaeology, Scotland, draws attention to the recent transfer of responsibilities for archaeological tasks formerly carried out by the Ordnance Survey to the three Royal Commissions on Ancient Monuments and expresses concern about current arrangements for the supply of information for OS mapping purposes in Scotland.

Difficulties in providing an adequate archaeological mapping service are not confined to Scotland, but arise equally in England and Wales, for in all three countries Government ministers have so far authorised the transfer to the commissions of less than two thirds of the posts employed by the OS itself on these tasks at the time when the review committee recommended the transfer in 1979.

In seeking to continue, within the

limits of a diminished resource, the valuable work previously done by the OS, each commission must assess its own priorities. In our case we see the first need as being the rationalisation of the archaeological information system - a view evidently shared to some extent by Mrs Proudfoot - and nearly all the transferred posts have accordingly been allocated to this task.

The amalgamation of our own records with the important archaeological indices and map collections formerly held by the OS will greatly enhance our capacity to provide accurate information about Scotland's historic sites and monuments to all those who require it. This work involves the introduction, within the National Monuments Record of Scotland, of effective arrangements for the validation and supply of existing archaeological data of all kinds, not only for OS mapping purposes (including the 1:50,000 series), but also for dissemination to the various agencies in the heritage field, as well as to educationalists, visitors and the general public.

manpower,

. G. DUNBAR, Secretary, of Scotland, 54 Melville Street, Edinburgh.

#### Social consequences of divorce reform

From Dr Neville Davis

Sir, Mrs Dicks's emotive complaints (June 30) bear witness that considerations of justice have played little part in the formulation of her views on post-divorce adult maintenance.

For the law to impose a penalty on an individual by requiring him (rarely her) to maintain a former spouse ad infinitum if the maintained person fails to re-marry, natural justice requires the demon-stration of culpable fault. Such fault would have to be of appreciable magnitude to incur a penalty of this

If society wishes such penalties to be imposed, then it must accept the return of a strictly fault-based divorce law, with the reintroduction of the matrimonial offence. This, I suspect, it is unlikely to do.

In its absence there can be no justification for inflicting lifelong penalties on ex-husbands. Reason dictates that adult maintenance may be paid for an appropriate period of rehabilitation, and of course any children of the marriage must be supported and safeguarded. Child maintenance orders should be enhanced by a additional childminding allowance to the parent having care and control, usually the mother, this allowance payable throughout the period during which her attention to the needs of the children precludes her from seeking nployment.

In today's world, the concept of the working wife seems to be acceptable to both sexes. Equally, any husband worth his salt recognises and accepts his share of the parenting needed by the children. Contrary to Mrs Dicks's assertions, the consolidation of these attitudes is more likely to ensure the survival of the marriage rather than to result in its breakdown.

None the less, when a marriage has broken down and has been ended by divorce under a "no fault" law, when the needs of the children have been met and the rehabilitation period is at an end, the argument for continuing adult maintenance is weak on the grounds of need, unemployment, ill-health or anything save the emotivity which it invariably arouses. And where is the justice in that? As unpalatable as it may be to Mrs Dicks, some women's organisations and the Treasury, such insurance is a matter for the State. Yours faithfully. NEVILLE DAVIS,

Redroofs, Windmill Lane, Arkley, Hertfordshire.

From Mrs Lesley Rimmer Sir, With one child in every five born today likely to see their parents divorce before the age of 16, the idea of giving overriding priority to children in divorce cases has gained, and rightly deserves, widespread support. Unfortunately, however, the public and parliamentary debate about the forthcoming Matrimonial Causes Bill will be handicapped by a

#### dearth of reliable evidence and information.

From Mr Edward McMillan-Scott Sir, It would be easier for the European Parliament to yield Britain's rebate if the money could be dedicated to projects with a "communautaire" flavour.

**EEC Budget rebate** 

Was it sensible, bearing in mind our partners' sensibilities, to spend £296m on telecommunications investment in the regions through British Telecom out of the £1,100m rebate (Commons Hansard, coi 576, December 22, 1982), presumably contributing somewhat to BT's £268m profit for that year? Yours faithfully,

EDWARD McMILLAN-SCOTT. Wick House Farm,

Pershore, Worcestershire.

#### Fair fares

From Mr Alistair Tucker

Sir, Lord Bethell (June 20) is convinced that scheduled west European air travel could be available at around 50 per cent of present tariffs if his Freedom of the Skies campaign is successful.

Many would agree that all European scheduled airliners are not necessarily models of efficiency, but to suggest that they are capable of reducing their costs by 55 per cent or so (in order to provide the lower fares and a reasonable return) and still operate essentially the same

services is surely wrong.
With the costs of fuel, airport and navigation services, and de-preciation and interest alone accounting for some 40 per cent of costs, how can the airlines achieve the massive cost reductions advo-cated by the Freedom of the Skies campaigners? Yours faithfully,

ALISTAIR TUCKER, The Athenaeum, SW1.

The acquisition of new archaeological information by field survey is also of great importance and the commission's standards in this respect are widely recognised. We are adapting and, where possible, strengthening our existing programmes of ground and aerial survey to give maximum benefit for the purposes of OS map revision, but our efforts in this direction have been handicapped by the reduction in the number of posts available to us. Provision of a satisfactory archaeological mapping service therefore depends on the restoration of adequate resources of finance and

Yours faithfully, The Royal Commission on the Ancient and Historical Monuments

In their 1980 report on the financial consequences of divorce, the Law Commission highlighted the problems for law reform of inadequate factual information. commenting that "even the most basic questions about the extent to which the existing private law imposing financial obligations on spouse does, in reality, provide any significant support of their families cannot be answered. We do not know how much maintenance is in fact ordered to be paid by the courts. Still less do we know in what proportion of cases such payments are actually made, and for what

period of time they continue". They described the lack of such information as a "formidable handicap" to the task of law reform, and proposed that two surveys be commissioned to remedy this deficiency. The first would be designed to ascertain public opinion on the major policy issues involved and the second, involving an examination of court records and interviews with a representative sample of those affected, would be designed to elicit reliable information about the operation of the

The opportunity to set such research in motion before under-taking new legislation appears to have been lost - although some valuable information about the way the law does operate has come from study conducted by the Centre for Socio-Legal Studies at the Univer-sity of Oxford, and from the results of surveys commissioned for the Scottish Law Commission.

Clearly research of this nature still needs to be undertaken in this controversial area where many groups have axes to grind. Current debate could be dominated more by ndignation than information, anger than analysis, and by fury rather

than fact. In order to avoid this occurring, the Law Commission recommended that provision be made for continuous monitoring of the operation of amending legislation dealing with the financial consequences of divorce, citing in this context the provisions of section 105 of the Children Act 1975. They require the Secretary of State to lay before Parliament every five years a report on the operation of that Act, and to set in motion such research as is

necessary to produce these reports.

It is to be hoped that the new Bill includes these provisions, for future Parliaments will be presented with further legislation in this complex, but crucial area.

Our society is only just learning to come to terms with the pervasive implications of divorce and if equitable and just reform are to be made, legislation should not occur in a factual vacuum, too readily filled by mere hearsay and hunch.

Yours faithfully,

Deputy Director, Family Policy Studies Centre, 3 Park Road, NW1,

#### Wayward water

From Mr M. G. Harman

Sir, The correction required for the Coriolis effect when shooting in polar regions is perhaps small for the polar bears considered by Dr Laming (June 21), but for other targets it can be appreciable.

J. E. Littlewood records, in his Mathematician's Miscellany, an account of the battle of the Falkland islands (early in the 1914 war) from an officer who was there. The German ships were destroyed at extreme range, but it took a long time and the salvos were continually

falling 100 yards to the left. The effect of the earth's rotation was incorporated in the gunsights. but this involved the tacit assumption that naval battles take place round about latitude 50°N. double difference for 50°S and extreme range was of the order of 100 yards.

Yours faithfully, M. G. HARMAN, Holmwood, 37 Upper Park Road, Camberley, Surrey. June 21.

#### A taste of honey

From Mr William Sergeant Sir, Is Mrs Herbert's (June 17) attempt to discredit rape honey another example of the British disease of decrying anything made

in these isles? The honey produced from oilseed rape is identical to all other honey in the fact that it contains approximately 17 per cent water and 79 per cent sugars (mostly glucose and fructose). The remaining 4 per cent consists of vitamins, pigments, enzymes, minerals, etc. It is this 4 per cent that makes honey from one source different to one from another

Rape honey granulates to a fine paste and has little distinct flavour, which makes it ideal for children, who are often put off honey by its sometimes strong flavours. Yours faithfully, W. R. SERGEANT. Gardener's Cottage,

#### Colour conscious

Stragglethorpe,

4 Pitt Street, W8.

From Mrs James Sutherland Sir, Although Mr Roger Hurrell (July 1), as a self-confessed caravanner, might be biassed, even he might admit that a caravan-sized daffodil would be as much a blot on the landscape as most non-caravanners find a daffodil-coloured caravan. It is a matter of size. Yours faithfully, ANTHEA SUTHERLAND.

#### DR R. BUCKMINSTER FULLER

# Philosopher of a technological future

Dr R. Buckminster Follor, the American inventor, engin-eer, architect-designer and scientifically-orientated philos-opher, died in hospital in Los Angeles on July 1. He was 87. Though not an architect in

the strictest sense, Buckminster Fuller came increasingly in later life to identify himself as such. One of the most controversial architectural figures of our time he produced designs for unprecedented types of structure which reflected his belief and optimism in the benefits of modern technology. Thus his Dymaxion House of 1927 saw the modern home not in terms. of a walled structure but of technology servicing the human life lived within it.

The Dymaxion three wheeled car of 1932 similarly rejected problems of shelter. the traditional coach maker's crast to produce a futuristic design giving itself totally to machine-made streamlining.

Perhaps in the general mindhe will be most readily associated with the geodesic dome, another result of his relentless pursuit of architectural forms along the path of mathematical logic. Thousands of these structures were erected, the most spectacular being the US Pavilion at the 1967 Expo in Montreal,

But perhaps not even such a list of achievements quite suffices to describe Buckminster Fuller's extraordinary impact on applied science and on the popular mind. An oracular speaker about the relationship of architecture to science and technology he and his achieve-ment were of a nature to fire the imagination with an optimism about the benefits of technology to man which remained a potent force in spite of the undoubted and damning evidence of the harm perpetrated in so many other spheres than

As such he attracted enthets such as "the Comprehensive Designer" and "the first poet of technology". His best known book, with the intriguing title Operating Manual for Spaceship Earth, continued in 1969 to preach his vision of a new generation of human beings capable of mastering the ecological challenges facing man. And as if to underscore the civilizing nature of his technological manifesto he endorsed his other achievements by serving as Professor of Poetry at Harvard and publishing verse himself. Richard Buckminster Fuller

was born in Milton, Massachu-setts, on July 12, 1895. He came of old New England stock; and inherited that blend of romantic idealism and yankee practicality which made him the spiritual heir to Benjamin Franklin and Emerson.

His formal education, though Bishop Bowlby said: "We The marriage took place on are not all against the ordination of women, but we bridge of Mr Charles Martin, son of boot building and fishing and fishi it embraced two years at of coastal Maine not only led ary degress from many aca-him to serve as an officer in the demic bodies, was an honorary US Navy from 1917 to 1919, but introduced him to that atmosphere of applied mathematics and related techniques Royal Gold Medal. He had which permeated his later theories and his early inven-tions such as the Dymaxion House with its mast and wire Award. construction, reflected this marine enthusiasm. But that experiment - whose name derived from the words dyna-

mism' maximum' was in a real sense a machine for living in with few of the aesthetic pretensions of its European contemporaries.

His work on it bred in "Buckie" Fuller an inceasing antagonism to traditional building techniques and to an architecture dependent on them, and made him seek more and more for technological and

industrial solutions to the

For 20 years Fuller explored the possibilities of industrial-ised housing but when in 1946 the Wichita project, a sophisti-cated version of the Dynaxion House, which - like the more modest 'prefabs' made in the United Kingdom - was intend-ed to answer the housing needs of the American nation through the conversion of its Second World War factories, was abandoned at prototype stage, he turned to other interests.

Just as his Dymaxion re-searches had led to new thinking in terms of domestic equipment so the Wichita project led to the Geodesic domes, to which he devoted so much of his later life. These spherical structures, of light metal and plastic, based on great circle mathematics (whose practical application was questioned as much by some architects as their structure was by many mathematicians), were in theory without limitation of size and Fuller saw in them a universal and cheap form of shelter to cover everything from

houses to cities.
In practice, their application was expensive and limited to rather special needs, such as the domes he designed for the US Air Force's early warning system establishments in the Arctic region. Others occupied a more central position on the human stage, in particular the 250 feet diameter example which served as the US pavillion at the 1967 international exhibition at Montreal.

It may be thought, however, that Fuller's greatest contribution lay in the field of education. He was a compulsive talker and he canalized this trait into magical extempore lectures of extraordinary duration often of up to a day or more with breaks for meals. Through

these he transmitted an enthusiasm for his ideas to generation after generation of students across the world. Among his many bonours

none perhaps was more appropriate than his appointment in 1962 as Charles Eliot Norton Professor of Poetry at Harvard Fellow of the Royal Institute of British Architects and in 1968 was awarded the institute's been in London only recently. speaking at the ceremony for the RIBA's 1983 Gold Medal

He held a chair at Southern Illinois University from 1959 to 1975, when he was made professor emeritus.

He was the author of many books, the first being Nine Chains to the Moon (1938). Subsequent titles include No More Secon-Hand God and Education Automation. In 1970 appeared the first collection of his writings to be published in Britain, entitled The Buck-minster Fuller Reader.

He married Anne Hewlett in 1917. They had two daughters.

#### MR A. A. FULTON

Mr A. A. Fulton, CBE, who died on June 23 at the age of 83, had been Chief Hydraulic Engineer and subsequently General Manager of the North of Scotland Hydro Electric Board. As one of the original members of the Board's staff he played a significant role in the development of the water resources of the Highlands and Islands of Scotland for hydroelectric purposes, thereby helping to further the economic development of the region.

Angus Anderson Fulton was born in 1900, the son of Professor A. R. Fulton and educated at the High School, Dundee, and at University College, Dundee where he graduated in engineering.

Joining a firm of hydro-elec-tric engineers in 1923 he was in the next fifteen years to gain wide experience of all aspects of the development of water resources for generating electricity in countries as far apart

as Australia, Sweden, where he studied intensively in this

The marriage took place on Saturday at St Etheldreda's, Ely Place, of Mr Mark Pickthall and Miss Annabel Dagnall, Dom Martin Haigh, OSB, officiated.
The bride was attended by Miss Sarah Pickthall and Miss Juliet Hill. Mr Simon Smith was best man. cradle of hydro-electric knowledge, and India. From 1938 to 1944 he was

Engineer and Manager of the Dundee Corporation's water works and in 1944 joined the newly formed North of Scot-land Hydro Electric Board as Chief Civil and Hydraulic Engineer.

Here he was indefatigable in his efforts to develop the potential of hydro-electric generation and today, the North of Scotland and the Islands owe to him the supply of electricity they enjoy. During his period of service the board established no fewer than 30 hydro-electric schemes, in the survey, design and construction aspects of which Fulton played a vital part. At the end of this period electricity supplies had been brought to the remotest parts of the region.

Fulton was General Manager of the Board from 1955 to 1966 when he retired. He had been appointed CBE in 1957 and was an Hon LLD of Dundee

The republic, like the North under Stormont rule, has done little to develop a state in which which is seen as a lifeline to the SDLP. But they are likely to Opponents allege that his take a discreet interest in its deliberations.

Neither have shown any public interest or concern at the reason for the PSF's rise and the danger it poses to the SDLP and the province's future. Some profess to prefer the PSF, rather than the SDLP, winning Parliamentary seats because that way the nationalist case goes unheard at Westminster, Others believe the PSF will fade away like Irish

With violence in Ulster no longer at anything like previous levels. Mr Prior's initiative may be the last attempted by a Secretary of State in the troubled province. If it fails, force dominating. Northern continuing with direct rule, for Ireland's politics is the resurging all its faults, is probably the Provisional Sinn Fein (PSF), posing an electoral challenge to the SDLP. Its rise has coincided finds greatest acceptance in the province by offending the least

Richard Ford

# Pinning hopes on home firms

province's economic planners were strongly criticized for 30 years of consistent misjudgment and lack of business sense in a study by the Northern Ireland Economic Council published last week. They had been obsessed with landing big investment projects from multinational companies and very slow to recognize the growth opportunities presented by smaller, indigenous firms.

This obsession with size had

led to the rapid establishment and growth of Ulster's manmade fibres industry during the 1950s and 1960s, followed by its equally rapid demise after the 1973 oil price shock. The gloomy implications of the Yom Kippur War for the fibre industry and for the tanker-specialized Belfast shipyard, the other main recipient of public cash, had long gone unrecognized by the Stormont authorities. The provincial "branch" ventures of the international giants had been the first to fail when the economic going got tough.

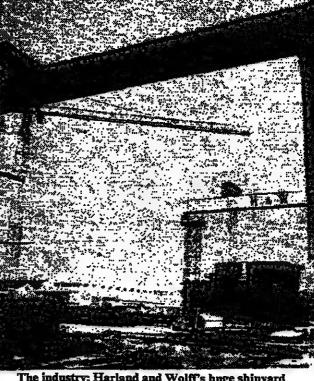

In an otherwise depressing report, these findings were music to the ears of some Ulster intropreneurs who had long beld that the prerequisites to obtaining assistance Stormont were a shiny suit, a transatlantic accent - and to be stepping off an aeroplane at

This policy has now gone into virtual reverse. Although vigorous efforts to market the province internationally still continue - particularly as the US economy is reviving and again looking for investment opportunities overseas - far more attention is being given to smaller firms and to nurturing Northern Ireland's existing industries.

The major part of the industrial development drive is now handled by the Industrial Development Board for Northern Ireland, one year old on September I. The promotion of smaller enterprises, employing up to 50 people, is the responsibility of the separate Local Enterprise Development

Announced in March and still being introduced, the effectiveness of these cannot yet be fully assessed, but IDB and Stormont officials alike claim they are potentially the most attractive on offer throughout the western world. They include 100 per cent

industrial de-rating, making the entire province effectively one Enterprise Zone; discretionary corporation tax relief grants, paid retrospectively, which can cover up to 80 per cent of a company's liability; grants of up to 30 per cent on energy

The industry: Harland and Wolff's huge shipyard

enlarged automation centre at Queen's University; and dis-million in the shorter term, with cretionary grants the first three years' salary for and the safe-guarding of 12,000 high-grade management talents more", says Mr Fell. recruited from outside the province.

been concluded with only one company so far, IDB officials board can as say that this particular incentive has already made an impact on the inward-investment scene. Now that it is in our package, it has brought back into our net a number of US companies who had previously dropped North-ern Ireland from their overseas investment plans", says deputy chief executive, David Fell.

The frailty of Northern Ireland's industrial base can be gauged from a few figures. Of a population of 1.5 million, fewer an 100,000 are in manufacturing employment after the economic blood-letting of the past few years. More than 120,000 are unemployed. The province has only 450 manufacturing companies employing more than 50 workers - of which more than 400 have already been visited by IDB

It is in this existing sector, rather than the far more chancy prospects of big inward invest-ment, that any hopes of an early economic improvement lie.
"More than 100 of the firms we have talked to so far have the number of first-time pros-

conservation schemes; an advis-ory service for manufacturers intentions. If all of them which is to be based on a much proceed, it would result in the towards a prospect of 6,000 new jobs

The IDB's aim is to sit down with every one of the province's Although negotiations on the manufacturing companies twice new corporation tax relief have a year to review its plans and determined way, board can assist. Apart from its role in Aparting Ulster trade determined ways in which the

#### Claims to have saved many existing jobs

missions to export markets, the IDB is currently bringing over senior purchasing executives from 12 major British companies, private and public, to meet Northern Ireland manufacturers and determine how Ulster industry can help meet their requirements. Companies involved in this programme over the next few months include BP, British Airways, British Nuclear Fuels, Blue Circle, Marks and Spencer, House-Forte Trust Woolworth's,

"With major American companies now drawing up their investment intentions for next year, we have had double

pecting visitors in the province over the past few months than in the equivalent period last year", the IDB reports.

Only companies tackling their own problems root and branch are being offered aid, but the board claims to have saved about 1,600 existing jobs in its first few months.

Meanwhile, the signs of revival which the IDB detects are also reflected in the small business sector, where the Local Enterprise Development Unit recently reported a record annual number of job promotions since it was established 12 years ago.

The figure of 2,550 new jobs in LED-promoted small firms created in the year ending March 31 was 900 up on the year before. With 736 in the service sector, it reflected the increasing role of service firms in Ulster's economy. Chief executive George Mackey says that inquiries continue at a high level and increasing numbers of aspiring entrepreneurs are launching their own businesses.

A similar story is told by the managers of Belfast's two-part Enterprize Zone, which is divided between a typically rundown inner-city area and newly reclaimed undeveloped land along the foreshore. Recognizing that the new province-wide incentives have largely vitiated its particular appeal for manufacturers, and recognizing, too. that it is in the business of urban renewal and regeneration rather than simply job creation, the EZ team has concentrated on service firms and "local people doing their own thing", in the words of its manager, Denis Myles.

All available sites in the inner-city area have now been allocated: the first serviced sites on the foresbore are being snapped up by owner/occupiers building their own premises. The EZ team claims that in its first 17 months, it stimulated £12.5m investment, only £2m of which came from the public sector for infra-structual works, and the rest from private

Managers appointed for a similar two-part EZ in Londonderry, which is to be designated in September and become operational next year. Meanwhile, the Belfast EZ managers have joined with the Belfast Harbour Commissioners and other local interests to make a detailed submission to Whitehall for Belfast to be one of the three or four free ports which the Government is expected to designate next year.

Robert Rodwell

# Northern Ireland: Judge us on the facts.

1. One of the longest established industrial centres in Europe.

2. A total of 101 new manufacturing projects have been established in the last 10 years.

3. Over £800m of American investment from corporations like Hughes Tool, Ford, Armco, Hyster, United Technologies, Goodyear, DuPont and many more.

4. Where Mr. Dunlop invented the first pneumatic tyre.

5. Where Mr. Ferguson developed the first low cost farm tractor.

6. Where the world's first mobile cardiac unit was developed.

7. Where many famous ships, including the Canberra, were built.

8. Where the first rig to discover oil and gas in the North Sea was built.

9. Where the world's first vertical take-off jet was developed.

10. One of the best labour relations records in the world.

11. A total labour force of 640,000 experienced and co-operative workers.

12. Wage rates very competitive with anywhere in Europe.

13. Faster rising productivity levels than the rest of the UK since the mid 1970's.

14. Probably the most advanced training facilities in Europe.

15. A generous and comprehensive range of training grants and programmes.

16. A better GCE 'A' Level pass rate than any other region in the UK.

17. Approximately 40% of all schoolleavers go on to further education.

18. Some of the finest research facilities in the UK.

19. Close links between researchbased universities, the polytechnic and industry.

20. Over 2 million square feet of factory space available.

21. More than 700 acres of fullyserviced sites for immediate development.

22. More than 14,000 miles of wellmaintained roads, giving the lowest traffic density in the UK.

23. An average factory-to-ship transfer time of only 21/2 hours.

24. Five major commercial ports.

25. Over 150 sailings a week to Britain and the rest of the world.

26. An International Airport only 1 hour's flying time from London.

27. One of the most advanced public telecommunications networks in Europe.

28. Good-value, high quality, executive housing.

29. Some of the most beautiful, uncrowded and peaceful countryside in the UK.

**30.** United Kingdom's best-served area for leisure facilities.

**31.** One of the lowest crime rates in Europe.

32. A tariff-free EEC market of 320 million people.

33. A package of investment incentives judged by many to be the best overall in the EEC.

34. Up to 50% research and development grants.

35. Up to 75% of factory costs covered by grant and tax relief.

36. Up to 80% refund of Corporation

37. Up to 90% of machinery and equipment costs met by grant and tax relief.

38.100% industrial de-rating: no rates to pay.

39. Northern Ireland can be one of the most profitable production bases in Europe.

The facts speak for themselves, but if you'd like to know more, speak to us. We are the Industrial Development Board for Northern Ireland.

And we can help clear the way for you to take advantage of all the advantages.

Call us now on Belfast (0232) 233233 and ask for John Hughes, or write to him at IDB House, 64 Chichester Street, Belfast BT1 4JX.

The New University of Ulster, in the north-west of the Province, has its main campus at Coleraine, and a second campus at Magee University College, Londonderry. An Industrial Unit was set up within the University in 1980 with an initial funding from The Wolfson Foundation and

has gradually increased its turnover to become self-financing. The Unit, through its office on the Coleraine campus, makes services across the whole spectrum of University activity

available to industry on a commercial basis. A range of skills and In the three years of the Unit's

operation hundreds of firms and institutions both inside and outside Northern Ireland have used its services. Projects include development of new electronic

products, installation of microprocessor control systems, production line problem solving, chemical, bio-chemical and physical analysis, monitoring of waste treatment systems, environmental impact surveys and

production of electronic prototype devices.

In response to demands from the business community the Industrial Unit also organizes courses for industry, usually tailored to the needs of individual companies. It is particularly well equipped to cater for courses in the areas of programming and the use of microcomputers as the University offers undergraduate programmes in electronics and computing services and has available all the necessary hardware, expertise and back-up staff.

DOES YOUR FIRM OR BUSINESS HAVE A PROBLEM? PERHAPS WE CAN HELP YOU SOLVE IT. CAN WE ORGANIZE A TRAINING COURSE FOR YOU?

THE ROLL IN

# **EDUCATION** AND INNOVATION FOR INDUSTRY

Queen's University plays a vital role in Northern Ireland's industry and commerce by undertaking innovative research which is directly applicable in both large and small firms by providing a range of specialist services through the Industrial Lizison Office and by supplying highly-skilled graduates who will play a major part in the Province's economic Projects in which Queen's has been involved include:

1 An extensive microprocessor and microcomputer-based Management Information System was developed and implemented for Standard Telephones & Cables (NI) Ltd.

Two further systems have been designed for other firms and are being installed. 2 A continuing project has increased the fuel economy of two-stroke engines by 30-40%, with important applications in Yamaha (Japan) and Mercury Marine (USA).

3 The University's wave-energy device is going into commercial production with two Japanese companies. The future potential for electricity supply for offshore islands and for navigation buoys is high.

4 A "disbetic watch", which automatically supplies insulin doses directly into the patient's bloodstream over a seven-day period and eliminates the need for injections has been developed and is going into production.

5 A low-cost jet engine which uses "off-the-shelf" high-technology components and

reduces costs by a factor of 6 has been developed. 6 A device has been invented for investigating abnormalities in joints without the need for surgery. This will provide for the first time a method of detecting congenital hip

deformity in babies early enough to take corrective action. 7 The University is working with Freeman Poz & Partners on the design of suspension

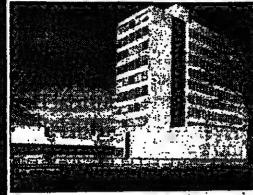

bridges and with a local industrial research association on the use of woven fabrics for

8 Optimum aerodynamic designs have been created to control the flow of smoke from the funnels of large ships so that passengers and crew are not affected. These designs have been used by Harland & Wolff Ltd. to great effect.

9 Testing is underway on the fatigue resistance and damage tolerance of carbon-fibre composite materials for use on aircraft by Short Bros-The University has five specialised units employing 25 staff solely on advising and

consulting work with industry and commerce: Industrial Lisison Office ● Automation Centre ● Computer Centre

pertrayed as being balance hipbuilding, textiles and agriculture - a tripod with two legs being progressively shot away. The cliche is now out of date as acrospace has overtaken shipbuilding as the largest manufacturing industry and textiles have become far less mportant While agriculture produces

NORTHERN IRELAND

only 6 per cent of the gross provincial product, it employs 10 per cent of the working population, and the hitherto neglected local processing and international marketing of Ulster foodstuffs are being strongly pushed as the most promising new sector for substantial economic growth.

Belfast shipyard's huge cranes still physically dominate the city. Under Mr John Parker, Harland and Wolff's new chief Under Mr John Parker, executive, the yard can only grit its teeth, tighten its belt another notch and hope that his forecast of a world shipbuilding upturn in 18-months' time proves sound. Meanwhile, it is already proving the last two vessels on its published order books. However, subcontractors have work on their portions of two of rumoured six refrigerated

under negotiation and not yet Mr Parker says the Blue Star major airframe parts and the requirement is the only substantial work around until the revival in world demand he predicts. In the meantime, the craft programmes, including the yard is strongly promoting its British Aerospace 146 and the repair and conversion facilities, Fokker F-28, whose wings it having just gained kudos for the builds. The company is bidding conversion at short notice of to become the UK production three British Rail cross-Channel source of whichever new basic

ships for the Blue Star Line,

although the yard insists that this £65m-plus order is still

It is across the shipyard wall, at Short Brothers, that Ulster's reputation in engineering is being best maintained. Shorts has won an enviable place in the world's commuter airline market, pulling well away from Swedish-American, Brazilian, Canadian and Franco-Italian rivals with the sale so far of 176 30-seat SD-330s and the 36-seat derivative, the SD-360. Almost every week brings news of further sales and production is being steadily increased to eight aircraft a month - five 360s and one of the smaller, now

venerable Skyvan Shorts has high hopes of landing a USAF order - initially for 18 but potentially for more than 100 - of the new Sherpa military/freighter version of the Despite its remorseless 330. They are having to combat decline in terms of jobs, the a vitriolic Congressional campaign by Irish American Republican sympathizers, led by expatriate Ulster priest Father Sean McManus, who has alleged that the company systematically discriminates against Catholic workers. This allegation has been refuted emphatically by the manage-

Catholic employees, Shorts is Ulster's largest employer, with 6,300 workers. been given approval to start and it is steadily recruiting more. The company is benefit ing from repeat sales of the Seacat and Blowpipe missiles, both of which performed well in the Falklands war, and stands to gain from sales of the new Boeing 757 for which it builds

ment, trade unions and Shorts'

engine pods. Shorts is also involved with several other commercial airferries, two finished on time trainer is selected for the RAF, and the third a week before the Shorts project team must now be turning its attention to what

The ill-fated De Lorean car plant in Belfast. New hope with Sir Clive Sinclair's option to acquire the works for production of electric vehicles

will follow the 330/360 series, facility near Londonderry to while the wholly state-owned company expects to return to modest profitability next year.

There is some anxiety about Lear Fan Limited, the British/American/Saudi funded project to develop a revolution-ary carbon-fibre twin-turbo prop business aircraft for production in Belfast. Certification by the US Federal authorities is still some months away at best and the initial plan to deliver first production autumn has now been set back a year. The growth to the expected employment of about 2,000 has been slowed and, at last month's Paris air show, a potential competitor for the Lear Fan was unveiled. The Aytek 400 is claimed to be lighter and faster and made of even more exotic material. While the four year litary of collapsing or contracting companies continues there are now grounds for modest optimism about the future growth of has recently opened a new

produce Hypaion, partially compensating for the fibre rundown, while the big factory of ITT's Standard Telephones and Cables outside Belfast has offset the fall in demand for electro-mechanical telephone exchanges by breaking into a new field with an initial £7m order for radiopagers from the

US Tandy Corporation.

Hyster, the forklift truck ciant, last year dashed Ulster hopes by placing a new greenfield project in the Repubfic, but it has now made its factory on Craigavon, County Armagh, the sole production source for an entirely new range of trucks.

Motors has two component factories in Belfast. It is well satisfied with its move into Ulster during the darkest days of the 1970s and is hiring more staff. Even the De Lorcan plant, the scene of Northern Ireland's most public industrial debacle, could be revived with the option taken by Sir Clive Sinclair earlier this month to several major Ulster employers. acquire it for production of an Of the multinationals, Du Pont untried range of electric

Increasing the value Northern Ireland's agricultural produce, worth over £600m a year, is seen by Stormont officials as the best hope for generating new enterprises and resources. Product ranges and export markets are heing expanded under the general 'Food from Britain" umbrella Meat plants are turning to vacuum packing and are pro-ducing prepared kitchen-ready cuts for retail sale through continental supermarket chains Last week the Killyman Farmers' Co-operative commissioned a film apple juice extraction plant with plans to make an assault on the £30m per annum UK market.

The Industrial Development Board is currently involved as a oint ventures, introducing Northern freland food pro-ducers and processors to big partners abroad, mainly retail chains. It believes that although huge scope for more to be done

# Tourism: ray of sunshine

Tourists are flocking back to Ulster looking believe it or not. for peace and tranquillity. Officials of the Northern Ireland Tourist Board believe Ulster's quiet countryside and uncluttered roads are the main reason for a revival of interest in the province after 14 years of

Tourist figures have shown a marked improvement in each of the last few years, a trend interrupted only temporarily in 1981 by the IRA hanger strikes.

Last year the province wel-comed an extra 125,000 visitors, and this season, given reasonable summer weather, hopes are high that the upwards trend will not only continue but accelerate.

One Tourist Board official said: "People are beginning to realize that Ulster in not nearly as dangerous a place as it would appear sometimes from their TV screens. Indeed, with our largely traffic-free roads, much lower prices than the Republic and almost deserted beaches, Northern Ireland has a lot to

Now, after years of taking low profile in promoting Ulster as a holiday destination, the Board is becoming more aggressive in its approach, running exhi-bitions abroad and hosting a constant stream of visits by travel writers and journalists, mainly from Europe and America

In March it launched a £70,000 advertising campaign in Great Britain - its first promotion on the UK mainland since the start of the troubles and is now assessing the across, particularly in America, response. that there is another side to the responsé.

The differential between sterling and the Irish punt, and the weak state of the Eire

> Welcome increase in the number of visitors from Eire

economy generally, has resulted in the biggest increase in visitors coming from the South. The number of tourists from Eire last year was up by 100,000, and signs are that there will be another sizeable increase this summer.

With petrol almost £1 a gallon cheaper in Northern Ireland and a significant price difference in many household items, alcohol and cigarettes, Ulster's border towns in particular have been enjoying boom times.
But Belfast too has been

Board officials are hoping they and their friends will be back for longer stays in the peak richest freshwater angling event holiday period just about to in Europe.

begin.
The province's cheaper prices are also encouraging visitors to and cannot believe their luck the Republic to travel to the when catches are weighed in north, and spend at least part of, hundredweights instead of a few their Irish holiday in Ulster, ounces at on their local canals. Places like the Ulster American back home. Folk Park near Omagh and the A Tourist Board survey, due ancestral homes of some of the for release soon, will reveal that are prime attractions for visitors from across the Atlantic.

Rather than actively promoting Ulster abroad during the seeing the countryside. worst years of the troubles, the Tourist Board has been letting that Ulster's many forest parks journalists from all over the - the result of skilful merging of world spread the gospel for commercial forestry interests them. The legions of political and recreational needs by the

journalists and those more Forestry Service - are high on interested in sensationalism have been followed by planeloads of travel writers. They have been shown the other side of the province and indications are that their many articles are

bearing fruit. The message has been getting province to that often blinkered one portrayed by some Irish American politicians.

In Europe, Ulster, particularly the Fermanagh Lakeland, is becoming increasingly popular, with Germany and France heading the visitors' league table. Boating holidays are the prime attraction, but Ferma-nagh has also been enjoying a rich tourist harvest thanks to its coarse fishing.

#### Coarse fishermen cannot believe their luck

Ever since a population explosion of roach in the Fermanagh lakes some 10 years ago, the county has been an English match angler's paradise. Sponsors have flocked to back international competitions welcoming more Eire visitors and there is a major event than since 1969, and Tourist almost every weekend in summer following the £15,000 Sealink Classic in May, the

> Ninety per cent of the coarse fishermen come from England

13 US presidents of Ulster stock more than 50 per cent of all visitors to the province last year came with the aim of visiting friends or relations as well as

The survey will also show

the list of the provinces's

Places like Crawfordsburn Country Park, a few miles outside Belfast on the shore of Belfast Lough, Tollymore Forest Park on the slopes of the scenic Mourne Mountains at Newcastle, and the nearby Murlough Nature Reserve all attract more than 200,000 visitors each year.

Some of the smaller parks in more outlying areas of the province have their appeal because of their remoteness they afford better opportunities for observing wildlife in their natural environment.

The Ulster Museum in Belfast in high on the list for visitors, as also are expositions such as the Ulster Folk Museum at Cultra and of course the American Folk Park near Omagh.

The Province boasts many National beautiful Trust properties, the Giant's Causevay and its unique rock formations the best known.

Local crafts can also be seen, from the making of pottery on the shores of Lough Erne to the artistry of Tyrone Crystal at Dungannon. For those who fancy a drop of the hard stuff, all roads lead to the Old Bushmills Distillery in North

Of course, there are a few visitors - mostly Americans who cannot resist a peep at the other landmarks of the Province... places like the Falls Road and South Armagh. But usually it's a case of a quick look and back to sample the other side of the province, the side that is rapidly replacing the old TV image.

A last word by German travel writer Herbert Peiler in an article for Hessische Allgemeine. trains round the four corners of Frankfurt railway station courts more dangers than a drive along the hundreds of kilometres of Northern Ireland's coastline".

> **Brian Ogle** News Letter, Belfast

#### Maintaining high standards against school cutbacks one thing. Most of Northern

At first glance Northern Ireland seems to be an educator's nightmare. The province's chil-dren have never known peace and come from some of the poorest backgrounds in Europe, the education authorities to maintain two parallel school systems while budgets shrink and pupil numbers plummet.
From small and often under-

resourced schools young people go on to face a frighteningly high lovel of unemployment, or the bleak prospect that even the most practical of degrees or diplomas might not get them a job. But astonishingly Northern Ireland's children do outstandingly well at school, and in other areas the province's education and training services prompt interest and admiration. It has pioneered a comprehensive youth training scheme, and has gained a reputation for its applied university research.

Paradoxically, it seems that the very conditions which bode so ill for education actually help to encourage achievement and innovation. From the start the province's pupils edge ahead of their Welsh and English peers. National testing of both maths and English at primary level has shown the province leading the field, and pupils also do well in maths at secondary school, although their science achievements are poor.

At O and A level, Northern

Ireland's pupils do consistently better than those across the water, particularly at the higher levels. In 1982 the O level pass rate was 62 per cent, compared with 58 per cent in England and 53 per cent in Wales. Eleven per cent of school leavers have three or more A levels, compared to 8 per cent in England

No one knows why this should be so, although there is much speculation. Chronic unemployment has helped to persuade more highly qualified people to go into teaching, for

Ireland's primary teachers have O level maths, which is certainly not the case elsewhere. In addition, almost all secondary schools are selective and while religious differences force strongly geared towards an exam-based curriculum, while tought standards start carly Pupils as young as six get

homework, although the pri mary school day is shorter than clsewhere...

This is what parents want. As in Scotland, schooling is prized dearly as a route to advancement, while in recent troubled years the schools themselves have come to be seen as havens of stability and security Despite the images of street violence

both truancy and juvenile crime rates are low.
All this is in many ways the triumph of hope over expenence, since young people face poor prospects when they leave school. One in four of 16- and 17-year-olds is either unemployed or on a government fraining scheme, and this pro-portion will worsen when this summer's school leavers flood out onto the labour market.

Partly thanks to the commitment of the present Northern Ireland Secretary, Mr. James Prior, the province managed to launch a wide-ranging vocational education and training scheme a year ahead of similar plans for England and Wales. Just over 11.000 youngsters are now on the Youth Training Programme, which is run jointly by the education and manpower services and which has piloted a number of new approaches. Notable among these is an attempt to provide profiles of all the work experience and further education undertaken by trainees, which is being watched closely by youth trainers in the rest of

the country. At the other end of the educational scale, Northern ireland's higher education is in ferment.

# Richard Ford sees new life in the city standards Accepting small advances

In yet another sign that life in the province is improving, passengers may soon be able to get on and off buses stopping inside Belfast's security zone for the first time in almost a

Security experts have given their approval, even though the marching season, when communal tensions always rise, is approaching.

Of course, the fact that buses at present cannot pick up passengers within the "ring of steel" that protects the commercial centre of the city is a sign of how far Northern Ireland is from anything resembling normal life in the rest of Great Britain.

But most people are thankful for small advances, and there have been many in the last two years, some very obvious, others almost imperceptible until months after they have

Big stores have increased their turnover substantially since motorists were allowed into the secure zone for late-night shopping once a week. A string of new restaurants has opened in a street now locally called Belfast's very own West End. The Grand Opera House is firmly on the map for touring companies. No longer are the streets deserted at night, as they were in the early 1970s.

It is arguable whether this improvement is due to decreasing violence or because people have become so acclimatized to it that they are now no longer prepared to stay in all the time. But most people who remember the early days of the troubles believe it is due to a decrease in violence.

Many businessmen in Ulster are unwilling to speak publicly about improvements for fear of attracting the terrorists' atten-

Large areas of the province have never experienced anything like the security measures imposed on Belfast, Londonderry and in border towns. It used to be said that the only growth industry was security, although that is no longer true the restrictions would irritate many visitors from across the water. Many stores, cinemas and restaurants have body and bag searches on entry - the Belfast Marks and Spencer branch must be the only one where people queue to get in on saturday mornings - and public houses and even small newsagents have security men.

Vehicle checkpoints throughout the province are common, although not as frequent as in

pubs and clubs are sometimes as one police officer protected by metal cages with bluntly. "People adapt protected by metal cages with bluntly: entry phone systems. In most anything when they have towns there are controlled zones where it is illegal to park your car. The ramps in roads outside police stations to slow down vehicles are disappearing as police become confident that divisional mobile support units could quickly give chase to any errorist attempting an attack. But the stations themselves remain heavily fortified.

The army, whose strength is sublicity put at 10,000, though it is understood to be 8,000, now operates mainly in West Belfast, South Armagh and Londonder-ry, although units are on constant standby to be deployed in any other trouble spot. The combined strength of the RUC and UDR is 15,109, in a population of about 1½ million. This year's RUC budget is £240m compared with £15.8m in 1071.2

The more Ulster accents one hears, the better

The huge increase in RUC strength has resulted in more policemen on the beat as well as better equipment and intelli-gence. In West Belfast police operate in patrols guarded by the army, but elsewhere they walk in pairs with a handgun and bullet proof vest for protection. The higher number of police on the streets has created an atmosphere of greater security.

It is a deliberate policy, both for security and for psychological reasons. The more Ulster accents one hears, the better. For if nationalists dislike and distrust the RUC and UDR. they resent the British army with its "foreign accents" even more. One prominent Unionist politician said: "In any environment as parochial as ours, people, especially Catholics, are going to be hostile to the army, albeit our army. A Liverpool accent is bound to be seen as a threat much more than the local one of the RUC."

Perhaps people have been suprised at how easily the community has adapted to an army presence and the restric-Hilary Wilce the past, and in strongly tions which security measures there would be debated to the past, and loyalist areas have placed on their lives, but Commons all the time."

understanding with the largest

If you have an interest in

Initially, the army was welcomed on both the Republican Falls Road as protectors from loyalist mobs and in Protestant areas for providing defence against the Provisional IRA, but nationalist areas soon turned against it. In Protestant areas today there is much sympathy for our troops especially from an older gener ation, many of whom served in

World War. It is the police who are taunted with grafitti and jeers of "SSRUC" by loyalist youths when they investigate brawls at pubs and discos. The Ulster Defence Regiment, on the other hand, is liked, if only because it is composed largely of local

the forces during the Second

This feeling is not shared in strongly nationalist areas, where the UDR is feared and hated almost as much as the former B Specials and the army.

Joseph Hendron, a doctor in the Falls Road for 20 years and an SDLP councillor, said the army is hated by working-class Catholics because of constant searching by young soldiers. Some Protestant politicians believe that the army is at times heavy-handed, and thereby increases the alienation.

A young schoolboy perhaps summed it up best. On the morning after the general election he had been going to school when he saw a 20-year-old soldier blown to pieces by a Provisional IRA booby trap bomb. Calmly he described the experience: "The Brit was experience: "The Brit was sitting by the lamp post and the Peeler shouted watch out there'. Then the Brit was blown across the road."

The bomb, the army presence and the derogatory use of "Brit" are life for him. In other areas bombs and dislike of soldiers are unknown, but most of the Province has accepted, sullenly or not, the security measures.

But, as Mr John Hume, leader of the SDLP, said in criticizing the lack of interest shown by Parliament in Northern Ireland: "If this kind of thing was going on in Yorkshire there would be debates in the

#### Law Report July 4 1983

# Multiplier assessed from date of death

Before Lord Diplock, Lord Keith of Kinkel, Lord Scarman, Lord Roskill and Lord Bridge of Harwich [Speeches delivered June 30]

in a fatal accident case, the multiplier to be applied in assessing the number of years of the plaintiff's dependency had to be selected once and for all as at the date of death of the deceased. There was no conflict as to that between Lord Diplock and

as to that between Lord Diplock and Lord Fraser of Tullybelton in Cookson v Knowles ([1979] AC 556). The House of Lords allowed an appeal by the defendant, John Dodds, from the Court of Appeal in Northern Ireland who by a majority (Lord Justice Gibson and Lord Justice O'Donnell, Lord Justice Jones dissenting) dismissed the defendant's appeal from a judgment of the High Court in Northern Ireland in 1982 (Lord Lowry, Lord Chief Justice, and a jury) who awarded the plaintiff, Iris Pauline Graham, £103,562 damages.

The plaintiff's husband was killed on December 30, 1977, in a road

on December 30, 1977, in a road accident for which the defendant admitted full liability. He was then

Mervyn A. Morrow for the defendant; Mr R. Charles Hill. QC and Mr G. Simpson, all of the Northern Ireland Bar, for the relainsiff LORD BRIDGE said that the

only issue strictly of law arising in the appeal was whether, in assessing damages for loss of dependency arising from a fatal accident, the nultiplier or number of years' ourchase should be calculated from Lord Chief Justice and the majority of the Court of Appeal.

The majority of the Court of a reasoning, which his Lordship to the jury on the footing that a reasoning, which his Lordship to the jury on the footing that a reasoning whether he had been The majority of the Court of Appeal had concluded that Lord Diplock and Lord Fraser of Tullybelton in Cookson v Knowles had expressed opposite and irrecon-ciable opinions.

Lord Justice Gibson had said: "During the hearing I [put] to Mr Hill the example of a man of ... 21 being killed. Should the action not come to hearing until five years had clapsed Lord Frascr would assess at death the multiplier, which I take at say 18, and he would then allow five years' special damage and 13 years as the multiplier of future loss. Lord biplock...would also give five years' special damage and then fix the multiplier on the assumption of the death of the deceased at ... 26 years, which Mr Hill conceded could not be appreciably less than the original figure of 18."

Lords Justices Gibson and O'Donnell had held themselves free to choose which of the two doctrines they preferred and both had come down in favour of the view they attributed to Lord Diplock.

The Court of Appeal had misunderstood Cookson v Knowles, where Lord Fraser had said, at where Lord Fraser had said, at p 576: "In a personal injury case, if the injured person has survived until the date of trial, that is a known fact and the multiplier appropriate to the length of his future working life has to be ascertained as at the date of trial. But in a fatal accident case the multiplier must be selected once multiplier must be selected once and for all as at the date of death, ne that might have happened to the deceased after that

The two passages cited by Lord Justice Gibson from Lord Diplock's speech dealing with the assessment of the dependants' future loss from date of trial had not been directed to the question of the appropriate multiplier and certainly lent no could be calculated on the assumption that the deceased, if he had survived the accident, would certainly have remained alive and well and in the same employment up to the date of trial.

Such a doctrine, ignoring the uncertainty that, as Lord Fraser had pointed out, affected everything that might have happened to the deceased after the date of his death. was clearly contrary to principle and would lead to the highly undesirable anomaly that in fatal accident cases the longer the trial of the dependants' claims could be delayed the more they would eventually

Accordingly, in so far as the Lord Chief Justice had based his directions to the jury with respect to the multiplier to be applied in assessing future loss on the considerations appropriate in awarding damages for future loss of earnings to a surviving plaintiff in a personal injury case aged 45 (the age the plaintiff's husband would have attained at the date of trial had he survived) and treated the pre-trial survived) and treated the pre-trial loss as "special damage", and in so far as the majority of the Court of

Leaving aside whether he had been justified in preferring a maximum multiplier of 18 derived from the multiplier of 18 derived from the table of awards in Kemp & Kemp. The Quantum of Damoges, 4th edition (1975), to the 16 years' purchase that Lord Diplock in Mallett v McGonagle (1970) AC 166, 177) had suggested was "seldom exceeded", and assuming that a multiplier of 18 assuming that a multiplier of 18 assuming that a multiplier of 18 applied in assessing the dependency of the family of a breadwinner killed between 20 and 30 could not be disturbed on appeal, his Lordship could not accept that the same considerations governed the assess-ment in the case of a breadwinner

killed at 41.
The fallacy of Lord Gibson's reasoning was that, in the case of the older man, it assumed as make as valuable a contribution, in real terms, to the support of his family as he had been making at the date of death right up to retiring age. It allowed no discount for the vicissitudes of life that might have falsified that assumption

lt was impossible to avoid the conclusion that the jury's award was vitated by the Lord Chief Justice's invitation to apply an excessively high multiplier, and a new trial should be ordered.

Lord Diplock, Lord Keith, Lord Scarman and Lord Roskill agreed. Solicitors: Hextall Erskine & Co for Vincent P. Fitzpatrick & Co. Belfast; Robin Thompson & Partners for Francis Hanna & Co.

# Immigrant's entry via Ireland illegal

Centre, Ex parte

Before Lord Justice Lawton and Lord Justice Dillon

Judgment delivered June 22] A Moroccan citizen who, having overstayed his permitted stay in the United Kingdom and who therefore was not entitled to reenter the UK from the Republic of Ireland, went Liverpool where there was no immigration officer, was an illegal entrant within section 33(1) of the limiteration Act 1971 because he was never given leave to enter and was never given leave to enter and therefore entered in breach of the immigration laws and was entering

The Court of Appeal dismissed an appeal by Mr Ahmed Bouzagou, detained at Ashford Remand Centre, from the dismissal by Mr Justice Woolf, in the Queen's Bench Division, of his application for a writ of habeas corpus directed to the overnor of the remand centre. Mr Nicholas Blake for Mr Bouzagon; Mr Alan Moses for the

LORD JUSTICE LAWTON said that the applicant had been detained in the Ashford Remand Centre since February 15, 1983 awaiting direc-tions for his removal from the UK oursuant to Schedule 2, paragraph [6(2) of the Immigration Act 1971. The directions were given to the governor to detain him on the round that the applicant was an legal entrant into the UK.

he was not an illegal entrant.
Alternatively even if he was, he did
not know he was, and it had not
been suggested that he did know. point that had arisen in this case had never been before the court.

Moroccan citizen who entered the UK on April 20, 1977. On entering he was given one month's leave to stay. He did not go after one month. It followed that his continued stay er was illegal.

Some time after the month had expired he applied to the Immigration Department of the Home Office for an extension of time to stay in the UK but that was refused in August 1977. Some time afterwards he went to

the Republic of Ireland where he married an Irish girl and had two children. The marriage broke down and the court in Ireland made an order prohibiting him from cohabit-ing with his wife. On January 13, 1983 he left Ireland by boat which

arrived at Liverpool.
On the landing stage at Liverpool there was a notice under the Inmigration Act 1971 telling those who had no right to stay in the UK what they should do. The notice was not up to date as a result of a statutory instrument (SI 1979 No officer at Liverpool to deal with

According to the applicant he was iterviewed by an official in plain clothes to whom he produced his Moroccan passport. That officer was not an immigration officer. He was almost certainly a police officer whose function was to survey. whose function was to survey passengers from the Republic of Ireland for the purposes of the

Prevention of Terrorism Act.

The applicant said that he was told by that officer that he could stay in the UK for three months, but Lordship was unable to accept

The applicant went to London where he was later arrested for attempted theft. Once he came into custody the circumstanes of his previous overstay were discovered and the order was made under paragraph 16(2) of Schedule 2 of the 1971 Act for his detention at the remand centre pending his removal

facts Mr Blake had submitted that if anyone entered the UK from the Republic of Ireland and there was no immigration officer to control his entry it could not be said that the entry in fact or in law was an uniawful entry.

He argued that on the facts the inference was that he did not know that he was entering in breach of the criminal offence under the Act.

UK with that intent.
His Lordship said that Mr Blake

power that immigration officers had for dealing with illegal immigrants, the court should be satisfied of the kind of mens rea sufficient to prove

being a matter relating to the liberty of the subject the court should be very slow to construe the Act in such a way as to put anyone who came into the country without leave in a position where those powers could be used against him, so that he might be detained by an immigration officer without any right of trial and then be removed from the UK.
His Lordship had felt at first that

there was considerable force in that submission. Mr Blake had also called attention to two cases in the House of Lords, R v Governor of

Pentonville Prison, Ex parte Azam [1974] AC 18 and R v Secretary of State for the Home Department, Exparte Khawaja ([1983] 2 WLR 321), but in partner of those cases was the particular problem with which their Lordships were dealing, namely, a His Lordship said that on those seemingly innocent entry into the

UK, ever discussed. The present case could only be decided on the construction of the 1971 Act and on the policy of the Act looked at as a Mr Moses had pointed out that the 1971 Act had repealed a large number of statutes dealing with immigration into the UK. Its whole Second, he said that on the facts

object was to control iman into this country and to decide who had a right to stay in this country. Section 1(1) set out the right of those with the right of abode to live in and to come and go into and from the UK. Subsection (2) said what had to Provision for the Republic of Ireland was made in subsection (3)

which provided that arrival in and departure from the UK on a local journey from or to any of the Islands (which included the Repub-lic of Ireland) "shall not be subject to control under this Act, nor shall a person require leave to enter the United Kingdom on so arriving except in so far as any of those places is for any purpose excluded from this subsection under the powers conferred by this Act; and in this Act the United Kingdom and those places, or such of them as are not so excluded, are collectively referred to as the common travel

Section 9 of the Act contained power to make regulations. Two relevant statutory instruments had been made, the first, the Immi-gration (Control of Entry through Republic of Ireland) Order (Si 1972 No 1610) under which those who had no right to enter and live in the IK in general could great in the IK. ox arriving here from Ireland for not longer than three months.

To fill a loophole in that order the

immigration (Control of Entry through the Republic of Ireland) (Amendment) Order (Si 1979 No 730) was passed the effect of which was to exclude those who had overstayed in the UK and then gone to Ireland from the right to stay in the UK on arriving from the Republic of Ireland. applicant had no right to stay in the UK even though he had arrived here from the Republic of Ireland.

Mr Moses had submitted that having decided who had a right to stay in the UK the 1971 Act then set out the general provisions for regulation and control. He said that under section 33(1) the applicant was prohibited from coming into do so in accordance with the Act He could only be given leave by an immigration officer and that had to

He had no leave given by an immigration officer and had nothing in writing. Anyone who came here without leave given by an immigration officer in writing was doing something contrary to the Act Something done contrary to the Act was unlawful. It followed that what the applicant was doing was

Mr Moses had also said that all the powers given to immigration officers under Schedule 2 to the 1971 Act were discretionary and had to be used reasonably.

If they acted unreasonably the court could interfere by way of judicial review. The policy of the Act was to exclude certain kinds of persons. There was a power to remove those who had no right to be here without having leave could be UK Subsection (2) said what had to prosecuted for criminal offences, happen to those who did not have The part of the Act relating to the right to come into the country. those parts of the Act which dealt with control were not tied to the sections which dealt with criminal

offences. In his Lordship's view there was nothing wrong with the judgment of Mr Justice Woolf. He would dismiss

LORD JUSTICE DILLON. concurring, said that it was not surprising that there were no immigration officers at Liverpool because for the purposes of the 1971 Act the Republic of Ireland and the UK formed a common travel area and persons arriving from Ireland did not need permission to enter.

The applicant was one of the exceptions because he had overstayed his leave in the UK and did stayed his feave in the UK and did require leave. He was never given leave to enter as required by section 3(1) of the Act and that was a breach of statute and illegal on the ordinary

use of language.

The respondent sought to apply to the applicant certain powers under Schedule 2 which could only be applied to illegal entrants. Was the applicant an illegal entrant? Section 33(1) quite clearly covered the applicant's case. His Lordship agreed with Mr Justice Woot' that if you entered in breach of the immigration laws you were entering unlawfully. He would dismiss the

#### Trespassers can be occupiers of land in law

Before Lord Justice Watkins and Mr

[Judgment delivered June 21]

Whether a person was an occupier of land for the purposes of the Town and Country Planning Act 1971 was a question of fact in each case, and it was accordingly possible in law for for squatters, who were the property to be consuler for mere trespassers, to be occupiers for the purposes of the 1971 Act.

Although a person charged with contravention of an enforcement notice, under section 89(5) of that Act, could not, by virtue of section 243, challenge the notice before the justices on any of the grounds on which an appeal against the notice could have been made to the secretary of state, it would still be open to that person to challenge the

otice on other grounds.

The Queen's Bench Divisional Court so stated on June 21, allowing an appeal by way of case stated against a determination of the York Crown Court (Judge Stanley Price and two justices), who had allowed an appeal by the defindants, Robert and Cail Adams, against their conviction by the Scarborough Justices on April 19, 1982, for using lay-by as a caravan site in contravention of an enforcement notice served on them as occupiers, contrary to section 89(5) of the 1971

Mr Jeremy Sullivan, QC and Mr Richard McManus for the council; Mr David Bradshaw for Robert

LORD JUSTICE WATKINS said that the defendants had lived with their families in two caravans on a lay-by, which formed part of the highway, at Snainton in Yorkshire.

On November 10, 1981, the council had served an enforcement council had served an enforcement aotice on the defendants as occupiers of the lay-by, under section 87 of the 1971 Act, requiring

caravan site. In contravention of the not proclude service on persons notice they had so used the lay-by in January 1982, and it was in respect of that use that they had been stances service on the defendants

In all the circumstances having regard to the length of time that they had been on the lay-by, the use to which they had put it, and the exclusive nature of their occupancy, his Lordship had no hesitation in holding that the defendants were complete. occupiers of the land for the purposes of the 1971 Act. Accord-

ingly, the service of the notice, the subsequent proceedings and their result were wholly proper.

Even if they had not been occupiers, the reference to them as such in the notice would not have such in the notice would not have rendered it invalid: section 87(5) did

to be served, and in the circum-stances service on the defendants was wholly justified and would not have been vitiated by their misdescription. Accordingly they would have had no defence to

prosecution under section 89(5). It had been contended by the council that it was not open to the defendants to challenge the allegedly defective service of the notice before the justices as that could have been ibject of an appeal (albeit not by them) to the secretary of state. therefore prevented the notice being

of the notice on the ground of defective service, it was still open to them to attack it, as they did, on other grounds: for example, that the notice was a nullity or that the failure of the council to serve the

notice on the correct persons deprived it of jurisdiction to make In fact, though, the notice had been properly and validly served on the defendants and no such attack could succeed. The appeal would be allowed and the matter remitted to the crown court with a direction to restore the convictions and the fines which the justices had imposed.

Mr Justice Taylor agreed. Solicitors: Sharpe Pritchard & Co. challenged on those grounds in any other proceedings. While they could not have so challenged the validity rough; Bedwells, Scarborough. for Mr David G. Bridge, Scarbo-

# No right to oral hearing

Regina v Croydon Crown Court, Ex parte Smith Before Lord Justice Watkins and Mr

Justice Taylor
[Judgment delivered June 22]

right for the judge in his discretion to grant such a hearing, and there was no general duty upon the judge to give reasons for a refusal of such The Ougen's Bench Divisional

Court so stated, granting an application by Howard Kingsley Smith for judicial review of a decision of Judge Graham Hall, at Croydon Crown Court on December 20, 1982, who had refused the applicant leave to lodge a notice of appeal out of the time against convictions by the South Western Magistrates' Court, but had granted leave to lodge out of time a notice of

Mr Robert Latham for the applicant: Mr Simon D. Brown for the crown court.

LORD JUSTICE WATKINS, giving the judgment of the court, said that a judge considering such an application was not under any duty to inform the applicant of the matters of which he required to be satisfied before granting the appli-

The judges' discretion under the Crown Court Rules (SI 1971 No 1292) was sufficiently broad to permit a judge considering an application for leave to appeal out of time against conviction and springer to make the sufficient to the second services as the second second services as the second second services as the second s or time against leave with regard to sentence only if that course, on the information before him, seemed

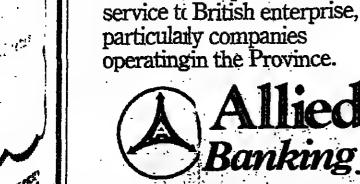

appropriate.
The decision of the Court of Appeal in In re Worth's Application ((1980) 1 FLR 159) was not to be taken as imposing a general obligation on judges to give reasons for their decision on such appli-

It was proper for a judge dealing with an application for leave to appeal against conviction to take account of the merits of such an appeal, and applicants for leave should therefore include the pro-posed grounds of appeal in their

As there was no right to an oral hearing, no such application should be listed for oral hearing without consent of the judge who had read the written representations.

erroneously been listed for an oral hearing and in the circumstances the applicant might feel aggrieved by the judge's refusal to hear it. In the interests of justice, therefore, certiorari and mandamus would in this case go to quash the judge's refusal of leave and to require the crown court to grant the applicant leave to appeal out of time against his conviction.

Banking for a better future

Colin Murry (left) is still trying to put the record straight on the relationship of his father John Middleton Murry and Katherine Mansfield (right). Interview by Caroline Moorehead

# The anguish of a lost love

On December 14, 1915, Katherine Mansfield wrote to her husband John Middleton Murry from her exiled sickbed in Bandol in France: "I am desperately disappointed, I must confess, and I think it is awfully, awfully cruel, Once I get better, I'll forgive you if you don't write, but oh - to lie in this silent room, and know the postman has been ... " Four years later, this time from Ospedaletti near San Remo and soon to die, she wrote: "If I do not get a letter today it will be too dreadful. My mind is paralyzed with dismay and apprehension. No one to speak to - like Robinson Crusoe: he lived alone. Worse - ah

much much worse." What John Middleton Murry replied or indeed whether he replied at all to these pleas has never been properly documented, and history has cast him remorselessly in the role of a cold, egotistical and uncaring hus-band. Now, though, for the first time, his own letters to her of the same period, from 1911, when they first met, to 1923, when tuberculosis finally killed Katherine, have been published (Constable, £9.95). They are gentle, anguished and immensely

He calls her, affectionately, "Worm" and "Wig". As late as the spring of 1920 he is making plans for

the house they will have "when the smiling days come". They could perhaps serve to redress the literary balance and give him the more generous part he undoubtedly de-

According to his only surviving son, Colin, a writer himself and former schoolteacher living on the banks of the Dart in Devonshire, they are not, however, likely to do so. "The myth of my father's heartlessness is now too deeply established. People need their myths. When Authory Alpers's biography of him appeared in 1954, and went some way towards describing the truth, there was talk of whitewashing. Angela Carter de-scribed my father in a review as an evil man, a vampire sucking the blood of his wife. I wrote a letter, and it was published, but what good does that

Why did John Middleton Murry not choose to defend himself? After Katherine Mansfield died he went off to a cottage he had been lent in Sussex in order to be entirely on his own. "While there he underwent a mystical experience, and believed somehow that he had become aware of Katherine's presence. That was a crucial moment in his life", explains Colin Murry. On his return to London and to his journalism and

detailed Edwardian interior.

family set in motion.

The performance certainly

editing Middleton Murry now set about establishing the wife he had just lost as a great writer. "I have a theory that he really wanted Katherine to have the last word. He seemed to understand that when people have TB they live a kind of posthumous existence and make statements they know aren't true. Two volumes of her stories were not enough: it was the Scrapbook, the Letters and the Journal that made her. Unfortunately, in creating the character so admired by Katherinologists, he left himself to be painted in an extraordinarily black light, a cross between lago and Uriah

Heep."
The portrait is, says Colin Murry, an absolutely false one. He wrote and he wrote and he wrote and he wrote. Katherine relied on him utterly; for love and for his criticism. He could spot the real thing." The father he remembers is by contrast a kindly, somewhat remote man, very shy and fond of children, a figure of sudden enthusiasms and prone to make appalling but endear-

ing mistakes. When Katherine Mansfield died he was 34, attractive to women and needing their love and company. In 1924 Middleton Murry married again, 22-year-old writer called Violet Le Maistre, "She had an extraordinary physical resemblence to Katherine.

He saw her as a heaven-sent reincarnation. They bought a coastguard station in Abbotsbury and had my sister, Weg, and then, in 1926, me." By then Violet was ill, with tuberculosis. To Middleton Murry's horror, she said to him: "I'm so glad this has happened. Now you'll have to love me as much as you loved Katherine."

Then more extraordinary things happened. Her handwriting began to change. It became so like Katherine's that even my father couldn't recog-nize it, as if she were possessed by Katherine's spirit. My father nursed her for 18 months. He must have felt

Even before Violet was dead, however, Middleton Murry, craving normality, was having an affair with an apparently "healthy and good humoured" woman called Betty who had come to nurse his wife. He soon married her. "It was the biggest mistake of his life. She was a virago. We had a quite extraordinary childhood, my father battling for his life with this madwoman." By her Middleton Murry had two more children, Mary and David. The family's life was rent by colossal scenes, physical violence and extreme ess. After nine years, he moved on once more, this time to

find "idyllic happiness" with Mary Gamble, who later became his fourth wife and with whom he lived until his death in 1957,

In his will, he made the Society of Authors his literary executors and in time his papers went to join Katherine Mansfield's in the Alexander Turnbull Library. It was not until the late Seventies that Cherry Hankin, a lecturer in New Zealand, asked permission to publish his letters to his first wife. "He once said to me", remembers Colin Murry, "Pve really lived four quite separate lives. I wonder if they overlap at all."

Despite copious writings, biographies, autobiographies and memoirs, only the first of these four is remembered by the wider public and by Katherine Mansfield's admirers. Even Middleton Murry's literary criticism, his founding of the Adelphi magazine as a platform for D. H. Lawrence and the Adelphi Centre as a meeting-place for socialists and intellectuals of the Thirties, and his pacifist farming community in East Anglia are largely forgotten. Colin Murry is now editing a million words of his father's journals, to add to his own two autobiographical attempts to restore to him a more honest and likable reputation.

#### Rock David Bowie

Milton Keynes

It was unfortunate that David Bowie chose to play the last of his recent British concerts in Milton Keynes Bowl. The venue served the purpose of allowing 80,000 people a glimpse of their hero but the enormity of the bowl destroyed any sense of occasion and rendered the atmosphere sterile. A large video screen above the stage only compounded the illusion that those at the front

were watching a different concert from the majority clustered around the perimeter.

Bowie and his 11-piece band, including a workmanlike horn section and backing vocalists in the Simms Brothers, stuck to the same format adopted at their Wembley dates. The singer seems to have reinterpreted a lot of his material and placed it in the light modern funk context of his Let's Dance

album. Once again the bowl did Bowie's arrangements no favours, muffling the big band's occasional subtleties on more complex songs like "Breaking Glass" and subduing expec-tations on his better new compositions like "Cat People". Bowie was unable to sustain

the ballerina role would have any degree of excitement adorned any professional pro-throughout the set. The simpler throughout the set. The simpler Mars" and his current hit "China Girl" were the only real the sound worked against Bowie and became lost. The guitarist Carlos Alomar tried manfully to keep a tighter rein on the essential rhythm and found an admirable foil in the bassist Carmine Rojas, Alomar's partner, the slightly dull and traditional rock guitarist Earl Slick, was merely surplus to

requirements. The evening livened up briefly when Bowie revisited the more soulful period of "Young Americans"; then his voice could be heard and appreciated. Similarly "Space Oddity", the 1969 song that first brought him to public notice, showed off his growing vocal maturity. For the rest, although some quarter of a million people saw Bowie perform over the weekend, very few of them will have seen him to advantage. For such a potentially electric artist this was a distinctly unmemorable

# Cavalry charge Her Majesty the Queen was

**PUBLISHING** 

presented by the National Book ezgue - that worthy, even essential, mausoleum at Wan-dsworth - with a "library" of 25 books. Martyn Goff, the League's energetic director, bas been reported in the trade press as saying the books were chosen with an eye to likely guests at Balmoral and Sandringham.

"We didn't include fiction because we felt the variation in taste was too great." That is marvellous, coming from a sometime novelist himself, and one who has for years reviewed fiction for the Daily Telegraph. Is "the variation in taste" Her Majesty's, or that of her guests? Or Mr Goff's and his fellow selectors? Or the authors? It is quite bewildering.

especially as History of the British Cavalry, Volume III, by the Marquess of Anglescy is one of the selected titles. Is it assumed that every guest will be familiar with Volumes I and II? Should the Queen not be encouraged by the NBL to choose (not to say buy, authors need royalties, pun certainly intended) books for herself? The

fact that the idea was purloined from the USA, where the President is presented annually with a substantial library for the White House, should be neither here nor there; but if Her Majesty has to be spoonfed by the British book trade - and it is suggested that the presentation will be an annual one - some proper books should be included: poerry, fiction, drama imaginative non-fiction, Literature is something we are supposed still to be good at.

Mark Collins, erstwhile head of Fontana and younger son of the late Sir William (Billy), having resigned from the family pub-lishing house indicates more than the end of an era. This is the first time since 1819, when the house was established, that there has not been a member of the Collins family on the board, ilet alone running the company. As he was the only Collins to remain loyal to the present management and its chairman.

Rupert Murdoch, his leparture is doubly sad. He we also an able publisher.

William Gerhardie's he Polyclots was published in 1925. The novel was reissued in 1947 as part of a "collected uniform edition", and againin 1970 by Macdonald as a part of a "collected uniform edition". Macdonald as part [ a "revised definitive edition! It is a worthy novel of akind which suggests the Moder Movement passed the author, who died in 1977) by, it is Michael Holroyd, that amirable supporter of lame des if not lost causes, who persaded Macdo-nald to reissue terhardic. The series collapsed after publication of a few ties.

Copies of the edition are relatively easy to acquire second-hand - retively, because few copies wer printed. It has been reissued yet again, in hardback at £75, with, yes, an introduction by Michael Hol-royd, It coul be one of the most unnecessity acts of republication of thecentury but that, presumably, the concern of the new putishers. Seeker & Warburg Ne so: they would not have broight it out of their own volitios on their own commercial (if not literary) judgment. It's financed by the Arts Counciles one of the first titles under scheme to reissue twentieth-century classics.

It is to be laped that Lord Gowrie, the new Minister for the Arts (who, if course, should not have a viev as to how the Arts Council disposes of its largesse), will persuade the chairman of the Council, Sir William Rees-Mogg, to look more closely a the frivolous attitude of the advisory Literature Panel. If itfeels that money should be given to publishers rather than to needy authors and there is a use for it, as well as to bookshors - better to give it to a successful, serious and popular impant such as Penguin or Viragi, if anyone wants to read The Polyglots, there is hardly a storage of copies

#### butter, in short pleasant but not of any great moment. Miss Garriga quite rightly attacked it as though it was, displaying formidable virtuosity and galvanizing the orchestra to a new alertness in the process. Then came Wissam Boustany

to play Mozart's D major Flute Concerto. He showed that he is a supremely gifted young player. Unlike some he does not worty about achieving purity of sound but allows his breathiness continually to characterize and to colour the sound he makes. And here he delighted in every whimsical smile, every nuance of phrasing.

All this seemed to wake the chorus from their previous dolour, for in Mozart's "Coronation" Mass, K317, they punched out rhythms with unerring clarity, and together with the soloists made this a celebration of real joy. The orchestra were also on their toes, and the (anonymous) organist provided some deft touches as he filled in

in judging the Royal Ballet School's annual performances? The dancers lack stage experience but many are already of an age when contemporaries ab-road are dancing professionally. By chance, two of the three works given on Saturday (and continuing this week at Sadler's Wells) offered direct comparison with companies performing in London during the week.

The only work exclusive to the students was The White Goddess, made for them by Michael Corder, It is a grey ballet, in design and mood, and showed that the young dancers can walk, stand, sit or be carried around with the sort of serious air that is meant (the programme note says) to express "the creative spirit's struggle with oppression, inspiration, manipulation and disillusion-ment". Doubtless that will serve them in good stead. The music

was Martinu's Toccata e due more of a challenge and revealed the neatness, spirit and discipline of their dancing something more, besides, from a few of them. Paquita, a classical showpiece besides being familiar in Sadler's Wells Stephen Pettitt Royal Ballet's repertory, contains two solos borrowed from

more polish but less verve than Where should one's sights be set the Bostonians. However, Laura Hussey in duction.

impressive in its virtuosity (light, soaring jumps; a swift, sure series of fouettes both single and double), her dancing also had personality and flair. Her partner, Bryan Hewison, had a commanding stage presence, but there was no chance to see whether his dancing matches his strong, helpful partnering, as the male role was divided, with Kevin O'Hare as the nimble but not yet very powerful soloist. Sarah Green's solo had notable poise.

Don Quixote, which the Boston Ballet were giving at the Coliseum. Annette Pain and

per man per year in 1982 was 176 tonnes against 208 tonnes in Germany; in the first quarter of 1983, it was up to 230 tonnes - 15 tonnes per man shead of the Germans.

Mr MacGregor also defended his controversial proposal to form a joint venture with US Steel, involving the export of steel slabs from the Ravenscraig rationalization of the BSC and works in Scotland to US Steel's Fairless plant in Philadelphia. The deal, which would, in effect, mean the privatization of Ravenscraig, includes a fiveyear contract for selling 23,000m worth of steel – a sum that would give "dramatic improvement" to the BSC's overall costs.

Further talks between the two companies will take place this week, centreing on the level of costs rather than price, Mr MacGregor said, He was confident the deal would be completed. Ravenscraig would lose

Britain, which has been told by the European Commission to cut another 500,000 tonnes of finished steel capacity in the next 21/2 years, could accommodate the reduction through the Ravenscraig deal or by a second so-called Phoenix privatization operation, expected to be concluded soon, involving a

steels industry. In a move parallel to the BSC-US Steel deal, Bethiehem Steel, America's second largest steel company, will modernize two ageing plants through a \$500m (£330m) international

priviate-sector

deal.
The deal has been arranged by a consortium put together by Voest-Alpine International Corporation, the American subsidiary of a state-owned Austrian company, which will build casting machinery for making steel at the plants

# Plan for £50m coal project in Ulster

The Government is expected and produce 15 million tons of to give the go-ahead later this coal a year by 1987. The project month for the development of would transform Northern the first phase of a £50m open cast coal mining project which could create 500 jobs and help solve Northern Ireland's longer

term energy problems.

The ambitions scheme is the brainchild of the board of Burnett & Hallamshire Holdings, the Sheffield-based open cast mining company. Last year the company announced the discovery of about 300 million tons of coal deposits on a 300acre site near Loch Neagh, 10 miles from Belfast.

Mr George Helsby, chairman of Burnett, has indicated that there are sufficient coal reserves at Loch Neagh to supply the domestic and power needs of the province for the next 25 years. If the Government grants planning permission for development of the site Burnett intends to build a £10m pilot plant which would employ about 50 people and could be fully operational by the end of

In the meantime Mr Helsby is also pressing for an urgent decision on the more ambitious plan to build a £50m plant which could employ 500 people

Ireland into a net exporter of coal at prices which would be up to 60 per cent cheaper than those charged by the National Coal Board,

The project largely depends on winning a government go-ahead for the £100m conversion of the 600MW oil-fired power station at Kilroot in the province to coal supplied from the new field. Discussions have already begun with GEC and NEI over the design and supply of boilers which would make this conversion possible.

Burnett's plans also include

the establishment of a factory to build coal "brickettes" in Northern Ireland for the supply of coal to domestic users there and in Continental Europe.

The Burnett board is hoping to win approval for the pilot scheme from the Northern Ireland Office and Department of Energy within the next few weeks. However, a decision on the more ambitious project will depend on the outcome of a series of interconnected decisions which the government must make over future energy strategy in Northern Ireland.

#### City Editor's Comment

# Brazil poses IMF a \$90bn question

ing increasingly urgent.
After a luli following the imposition of the initial rescue package earlier this year, the \$90,000m Brazilian debt problem is again casting an ugly shadow over in the case of Brazil, not the world banking system.

Negotiations between Brazil, the banks and the International Monetary Fund in the days ahead will be critical.

Profligate

The various rescue packages put together for the debt-burdened economies of Latin America, owing \$300,000m between them, have rested on the presumption that if immediate liquidity problems can be solved and governments encouraged or forced to eschew their profligate ways, then a resumption of world growth will take care of the rest.

This essentially shortterm strategy has had a fair degree of short-term suc-

Mexico, owing about \$900bn, has more or less managed to stick to its IMF programme, and is \$1.7bn trade deficit into a hefty surplus, expected to be \$5bn for the first half of 1983 compared with the full-year target of \$7bn. This had allowed the conntry to delay a \$1.2bn drawing on the \$5bn loan from commercial banks.

Inflation and the budget deficit may still exceed IMF targets and some economists are predicting a 4 per cent drop in gross domestic product this year. The strains that is placing on the economy and the resulting political tensions should not be underestimated. However, on shortterm financial tests, bank-

ers are relaxed about Mexi-

Peru signed an agreement last week with the banks for \$45m of new loans and a rescheduling of yet more austerity

The need for a solution to \$380m of existing debt. A the acute liquidity problems refinancing package for afflicting Brazil is become Cuba should be signed later this month and Chile's rescheduling is moving ahead well.

It is too early to measure the long-term success of these packages. However, even the short-term aims have been achieved.

With the wisdom of hindsight, bankers now blame the poor coordination of the original rescue leading to tensions between the big banks and the small American regional banks, the emphasis placed on restoring interbank lines and the fact that not enough money was made available to Brazil in the first place. They also blame Brazil's failure to take sufficiently tough measures.

Having breached the IMF criteria, Brazil has been denied the second \$411m tranche of the commercial bank loan.

A new more representative 14-bank advisory group is looking at ways of making good the failure of the original rescue. This year some \$3ba to \$4bn of new money may be needed. But all depends on agree-ment between the IMF and

#### Compromise

Meanwhile, the IMF's reputation is on the line. Having coerced banks into lending more to Brazil and others on the basis of its economic prescriptions, it cannot afford to be soft. The signs are that it will stick out for action on Brazil's budget deficit and seek de-indexing of the economy.

But the room for compromise is much less than when the IMF programme was first agreed, perhaps rather too hurriedly. And the Brazilian Government, although well on the way to achieving the targeted S6bn trade surplus, will find it increasingly hard to impose

# Hambros

Mr. Jocelyn Hambro, M.C., reports on the Hambros Bank Group

This has been a year of steadily falling interest rates alongside a substantial drop in the rate of inflation in nearly all the major industrialised countries but. for much of the time, a period of continuing recession. More recently, however, there have been welcome signs of an upturn in economic activity, both here and internationally, a trend that shows increasing evidence of being

During the year we have made further provisions in respect of the Norwegian shipping loans. which have troubled us for many years, to reduce them to levels below which there is no likelihood of further loss having to be recognised in the future. At the same time, by selling one-third of our shareholding in Hambro Life we have increased the capital resources of the merchant bank, to which we have added new long-term loan capital. This provides a firm foundation for growth and. which we have added new long-term toan capital. This provides a firm foundation for growth and, we believe, future banking profitability. We have also had to face a heavy write down of our oil and gas investment in the United States.

We continue to hold 30 million shares in Hambro Life, representing a quarter of its equity, as a long-term investment. The current market value of this holding exceeds £100 million against a

carrying value of £5 million. We have the utmost confidence in the company and its management. Our results include encouraging features. In merchant banking there is a broad and continuing advance of fee earning services, both as a proportion of all banking income and in total. due partly to narrowing margins and also to our increasing emphasis upon activities that generate income without effect upon balance sheet ratios.

Consolidated Financial Statement at 31st March, 1983 1983 1982 1983 1982 £ million £ million 2 million £ million Share capital and res 123 Balances with bankers and money at call 163 130 Minority interest Term loans to banks, local Loan capital 60 38 authorities and certificates 175 163 of deposit 1,421 1.085Dealing securities and trading stocks 56 32 Loans, advances and Current, deposit and 827 646 2.346 1.803 Customers' liabilities for 433 Accentances for customers 404 404 433 acceptances 12 Deferred taxation Investments 59 77Proposed dividends Fixed assets 13 12 2,943 2,415 2,943 2,415

successful year. Our diamond interests returned to profit, their results improving as the year progressed. On 1st June 1983, we announced our intention to sell our 75% interest in the advertising agency, Collett Dickenson Pearce, mainly to its own directors and management.

Although advertising is not in the mainstream of our activities, our investment over the last four years has been beneficial to the agency as well as proving profitable to us.

This is my last year as chairman and I believe that the steps we have taken will provide the basis for a sustained period of prosperity. I shall be succeeded as chairman of the Group by my cousin, Charles Hambro, with Sir Ian Morrow becoming deputy chairman. My son Rupert will be chairman of the Bank; Sir Nicholas Henderson, Mr Chippendale Keswick and Mr Christopher Sporborg have been appointed directors of Hambros PLC.

#### Unctadends BA move to with doubts onrecovery

By Our Financial Staff 160-nation United Nations Conference on trade and development ended in Belgrade yesterday with delegates deeply divided over measures needed to stimulate

world economic recovery.

After four weeks of discussions the United States dissociated itself from a statement adopted by the conference which said that it was far from certain that a sustained and durable recovery had started in

leading Western countries. The US delegation dismissed the atatement as "too negative, one-sided and ideological" and stressed Washington's conviction that recovery was under-

way. Mr Abdillahi Osman of Somalia, spokesman for the developing countries, voiced his deep disappointment at the 'meagre results" of the conference. However he said that the developing countries had agreed to accept a final package which reaffirmed the target of 0.7 per cent of gross national product as official development aid and

From the statement by the Chairman, G. E. Knight CBE:

"This strong and sustained growth is an indication of the vigorous manner in which Fenchurch staff have devoted themselves to the development of new business and to the control of costs". The company has from 1983 changed its year end from 30th April to 30th September. The 1983 results

for the 12 months are therefore unaudited.

A Guinness Peat Company

launch of Gilbert House Investments, yet another property company is preparing to make its debut on the Unlisted Securities Market.

Details will be revealed today of a share placing by broker Strauss Turnbull in Gable Honse Properties, the property development and investment

group. Strauss will be placing 1.15 million 5p shares at 48p a share with its clients putting it on a p/e of 10.4. This represents 22.1 per cent of issued share capital and values the entire group at £2,49m.

The company was formed in 1976 as a property developer by the present directors, Mr Alan Goldberg, chairman, Mr Howard Harris and Mr Jonathan Goldberg. The three plan to sell 450,000 from their own holdings, while creating 700,000 shares to raise £251,000 for extra working capital.

In the past six years, pretax profits have grown from per cent of the total equity and £41,000 to £278,000 on turn-capitalises it at £11.6m over up from £272,000 to making it one of the ten biggest £2.1m. For the year to June 30, companies quoted on the USM. the group is forecasting prelax profits of £300,000 and for next year not less than £500,000: In

# **Meyer International**

Salient points from Mr. R. E. Groves' annual statement The first four months of the year under review preceded the merger of Montague L. Meyer and International Timber, the remainder covered

Montague L. Meyer and International Timber, the remaindor covered the period of the merged organisation. In this latter period the major part of the rationalisation projected at the time of the merger was undertaken. It coincided with a gradual improvement in trading conditions in the construction industry, particularly in housing.

A healthy Balance Sheet and a broadly based business in the U.K., having an excellent balance between bulk imports and distribution, manufacturing, and merchant distribution, with a wide range of interests overseas, supported by an experienced and enthusiastic workforce, places the Group in a very strong position for the future.

#### **Henderson Administration**

#### History

The Henderson family was active and successful in the late nineteenth century and in the early decades of this century in the financing and coordination of engineering projects in South America, the Middle East and

During the period before the formation of Henderson Administration. certain members of the Henderson family were the principal partners in the stockbroking partnership Greenwood & Co. In 1932 this firm was merged with Cazenove & Akroyds, Since then, the relationship between Cazenove & Co., as the merged partnership came to be called, and Henderson Administration has continued.

In 1934 Henderson Administration was established by Mr. W. W. Brabner, executor of the first Lord Faringdon, to take on the management of the Henderson family's financial affairs and in particular of an investment company, Witan (which had been founded in 1909), in which the family's resources were then concentrated.

From this beginning. Henderson Administration's activities have broadened so as to provide investment management services to investment trusts, unit trusts, pension funds, private individuals and other funds.

**Investment Trust Management** 

From its beginning Henderson Administration has provided investment trust management and secretarial services. Besides managing the portfolios of investment trusts. Henderson Administration is responsible for their day-

Henderson Administration's current involvement in investment trust management is principally with the Four Investment Trusts. Apart from Witan, these are E.&G., Greenfriar and Lowland which have been managed by Henderson Administration since 1952, 1965 and 1963 respectively (a summary of the contracts for the management of the Four Investment Trusts is given under "Interests of Directors and Others" below). The following table sets out the total assets (less current liabilities) at 31st May, 1983 of the Four Investment Trusts:-

99 (Par. )	· · · £m*
Witan	255
E.&G.	44
Greenfriar	16
Lowland	13
	328
	Prompt will
*Unaudited figures as supplied to	the Association of Investment

The Association of Investment Trust Companies publishes information, based on the asset value of member trusts, which demonstrates the comparative investment management performance of the trusts. On the basis of this information, the Four Investment Trusts have consistently achieved an above-average investment performance in recent years and, for the five years to 31st March, 1983, each of the Four Investment Trusts stands in the top 25 per cent. of the trusts whose performance is monitored

Henderson Administration also manages two smaller investment trusts, English National Investment Company plc and The British Kidney Patient Association Investment Trust plc. These came under Henderson Administration's management in 1974 and 1982 respectively and at 31st May, 1983 their total assets (less current liabilities) together amounted to less than £5 million.

The Directors believe that continuing success in investment trust management is important for the maintenance of Henderson Administration's standing among investors.

Details of the shareholdings of the Four Investment Trusts in the Company are given under "Interests of Directors and Others" below).

Unit Trust Management

#### Background

The U.K. unit trust industry is subject to overall regulation by the Department of Trade and Industry and the operation of each trust is supervised by a trustee who is independent of the manager.

Although the U.K. unit trust industry has grown rapidly in recent years, sales of units by the industry still account for only a small proportion of total U.K. personal investment. Thus figures published by the Central Statistical Office and the Unit Trust Association show that, in 1982, net sales of units represented approximately 2 per cent. of the additional allocation of funds made by the personal sector to financial assets (i.e. liquid assets, U.K. Government and other securities and life assurance and superannuation funds).

Henderson Administration began its unit trust activities with the launch of two trusts in 1970. These activities were expanded in 1974 with the acquisition of an existing unit trust management company, now named Henderson Unit Trust Management Limited, with funds under management which then totalled £16 million.

Unit trusts managed by Henderson Administration now comprise 30 U.K. authorised trusts including 7 "exempt funds" (i.e. those established for pension funds and charities). It also manages 4 "offshore funds" (i.e. unit trusts and open-ended investment companies established outside the U.K.).

# 

BAHOT REL DE BABBER

# Henderson Administration Group plc

#### Funds under Management

Henderson Administration's policy is to offer a range of unit trusts providing investors with a wide choice in major stock markets throughout the world and in specialised market sectors.

A list of the U.K. authorised unit trusts and offshore funds managed by Henderson Administration, and comprising total funds of £539 million at 31st May, 1983, is set out below.

Funds specialising in overseas securities are a particular feature of the unit trusts and offshore funds managed by Henderson Administration. At 31st May, 1983 £392 million was accounted for by unit trusts and offshore funds of this type, representing 73 per cent. of the total.

The investment management of certain of the Henderson Administration unit trusts is sub-contracted to H.B.M., whose activities are described in more detail below.

#### Investment Performance

Henderson Administration has achieved an outstanding investment performance record with its unit trusts. Statistics produced by *Planned Savings* for periods to 1st April, 1983 show that, from an analysis of the trusts managed by the eight largest U.K. unit trust groups, Henderson Administration is the best performing group over 1, 2, 3, 4, 5, 6 and 7 year periods, performance being measured by reference to total returns with each group's trusts weighted by size.

#### Sources of Revenue

Revenue from unit trust and offshore fund management arises in three main

- 1. The Annual Charge. This is assessed as a percentage annual rate, currently between 1/4 per cent., on the value of each unit trust fund. Revenue from this source will vary with the movement in the value of funds under management.
- 2. The Initial Charge. This is assessed as a percentage of the value of units or shares sold. The current rates of initial charge are at 2-21/2 per cent. for exempt funds and 5-5% per cent, for substantially all other funds out of which up to 3 per cent. (plus V.A.T. where appropriate) is reallowed to investors' professional advisers. Revenue from this source will vary with the value of new units or shares sold to investors and is likely to be relatively volatile.
- Surplus on Dealing. Managers meet investors' requirements for the purchase or sale of units not only by creation and cancellation of units but also by dealing, as principals, in repurchased and new units. While not without risk, this activity gives rise to the opportunity for dealing profits particularly at times when demand for units is strong and security markets are rising.

#### Marketing

Henderson Administration's marketing is directed primarily at investors' professional advisers such as stockbrokers, insurance brokers, banks, accountants and solicitors. Thirteen sales executives operate from London and from branch offices in Birmingham, Bristol, Glasgow and Manchester maintaining contact with and servicing a large number of professional advisers. Similarly, the offshore funds of the Group, together with those H.B.M. unit trusts for which Henderson Administration acts as a sales agent, are sold to investors mainly through professional advisers.

This approach to marketing results in a high proportion of the units purchased by investors in Henderson Administration's unit trusts being purchased under the guidance of the investors' personal advisers; it has the added advantage of limiting marketing costs.

The sales executives are remunerated by salary and receive no commission on sales. At present, Henderson Administration's sales executives have an average of over 13 years professional experience in the securities industry. Apart from using sales executives in the manner described above, Henderson Administration also uses conventional advertising media to publicise its unit trusts, particularly when launching new trusts.

#### Unit-linked Assurance Business

In October 1980, Henderson Administration launched a range of single premium unit-linked policies in conjunction with the Provincial Life Assurance Company Limited, to which complementary unit-linked products have since been added including a self-employed pension plan. At 31st May, 1983 the unit-linked funds under management totalled £40 million (of which £36 million consisted of units in Henderson Administration's unit trusts).

Henderson Administration made its first significant commitment to unit trusts as recently as 1974. Since that time it has achieved a leading position in the U.K. unit trust industry and now ranks fifth, as measured by funds under management, among unit trust management groups.

The Directors believe that Henderson Administration's rapid progress has resulted from the combination of successful investment performance over a period of years with an effective marketing strategy. Henderson Administration, with its strength in the management of unit trusts invested overseas, has also benefited from U.K. investors' increasing demand for overseas securities, particularly following the lifting of U.K. exchange

These factors have contributed to Henderson Administration achieving rapid increases in unit trust funds under management and a very significant increase in market share, as demonstrated by the following table which is based on information published by the Unit Trust Association:-

Unit Trust Fu (excludi	nds Under ng offshore	Manage funds)	ment	•	
At 31st March	1979	1980	1981	1982	1983
Henderson Administration					
(£ million)	108	96	193	260	500
The Industry (£ million)	4,450	4,034	5.518	6.062	9.117
Henderson Administration's market share	2 4%	2 494	3 506	4 3%	5 50%

Notwithstanding Henderson Administration's achievements to date, the Directors believe that it will further increase its share of the U.K. unit trust

#### Pension Fund Management

Growth of the Pension Fund Business

In recent years Henderson Administration has made significant progress in establishing itself as investment manager or adviser to pension funds through a subsidiary, Henderson Pension Fund Management Limited, and its pension management business has increased rapidly as is shown in the

At 31st March	1979	1980	1981	1982	1983
Number of funds	6	7	11	14	30
Value of funds	£10m	£18m	£56m	£71m	£184m

By 31st May, 1983 the value of existing pension funds under management had increased to £202 million. Since 31st March, 1983, three further pension funds with an aggregate value of over £65 million have agreed to appoint Henderson Administration as managers. The client base is broadly spread with representation from nationalised industries, local authorities

The Directors believe that Henderson Administration's rapid expansion in pension fund management results mainly from Henderson

- independence as a specialist in investment management international investment management expertise
- stability and continuity of management.

Henderson Administration's exempt funds offer an additional service to pension funds by providing an efficient means of access to specialised markets. At 31st May, 1983 over 450 pension funds had holdings in Henderson Administration's exempt funds.

Pension funds now represent a significant part of Henderson Administration's funds under management. Nonetheless, in spite of recent growth, Henderson Administration's share of the pension fund market is small and the Directors believe that further growth will be achieved in an investment market whose funds are estimated to be over £80 billion.

#### Investment Performance

Henderson Administration can demonstrate above-average performance in pension fund management; the following table compares the performance of Henderson Administration in terms of median total returns with the median Land of an industry sample monitored by Wood, Mackenzie & Co., stockbrokers:-

Annualised Median Rates of Return Periods to 31st December, 1982 1 year 5 years 19.4 Henderson Administration 30.8 16.6 Industry Sample\*

\* Wood, Mackenzie sample median fund, time-weighted rate of return, including property.

#### Private Individuals and Other Funds

The balance of Henderson Administration's investment management business consists primarily of investment advice and management for private individuals, one of its original activities. A discretionary portfolio management service is offered through a subsidiary, Henderson Financial Management Limited, to resident, non-resident and expatriate investors together with advice on taxation and financial planning.

Henderson Administration also provides a Unit Trust Management Service for individuals whereby portfolios, in amounts of £10,000 or more, are invested purely in unit trusts. Unless specially requested not more than 40 per cent, of a client's funds may be invested in either Henderson Administration's unit trusts or those managed by any other management

The growth in private client funds under management is shown in the

At 31st March	1979	1980	1981	1982	1983
Funds Under Management	£38m*	£44m*	£50m*	£54m	£74m
*Estimated					

At 31st May, 1983 funds under management had increased further to a total of £82 million.

#### Henderson Baring Management

Henderson Administration was among the first of the U.K. investment management groups to establish a presence in Hong Kong, Having participated in an earlier investment management consortium, Henderson Administration formed its own Hong Kong subsidiary which commenced business in 1975. In 1977 Barings acquired a 50 per cent. interest in the company which changed its name to H.B.M. and became a joint venture providing investment management services mainly in Far Eastern securities. H.B.M. has more recently established branch offices in London and Tokyo. H.B.M. is the subject of an agreement between its shareholders, a summary of which is set out under "Material Contracts" below.

Total funds under H.B.M.'s management have grown rapidly in the last five years, increasing from £60 million at 31st March, 1979 to £824 million at 31st May, 1983, made up as follows:-

	£ million
Henderson Baring unit trusts Henderson Administration unit trusts	199
sub-contracted to H.B.M. (see Note 1)	194
Other funds (see Note 2)	- 431
•	824
	200000

- Note 1. As shown in the list of unit trusts and offshore funds below, Henderson Administration sub-contracts the investment management of certain unit trusts in whole or in part to H.B.M.
- Note 2. Other funds comprise portfolios of Far Eastern securities managed for pension funds, investment trusts, mutual funds and others. These funds emanate from the U.K. and other European countries, North America and the Middle and Far East. Part of these funds is sub-contracted from H.B.M.'s two shareholders, £47 million being sub-contracted from Henderson Administration.

Of the above total, approximately 85 per cent. was invested in Japanese

H.B.M. is one of the relatively few organisations whose primary speciality is the management of investments in Far Eastern markets on behalf of institutional and private investors from a number of countries.

H.B.M. and Barings established Baring International Investment Limited in 1982 as a 50/50 joint venture to market the two shareholders' investment services to pension funds in the U.S.A.

#### Directors, Staff and Operating Facilities

The overall management and control of the Group lies with the board of the Company. The management of the business on a day-to-day basis takes place at subsidiary board level.

Those Directors marked below with an asterisk form a Chairman's Committee which will be responsible for keeping the Group's strategy under

#### Directors of the Company

John Henderson, M.B.F.\* (aged 63) Chairman. He has been associated with Henderson Administration since 1947. He was a group director between 1962 and 1971 and rejoined the board as chairman in 1978. He has been a director of Witan since 1962 and was chairman from 1971 to 1980. He was a partner in Cazenove & Co. until 1982 and is currently a director of Barclays Bank and Barclays Bank International.

Benjamin Wrey (aged 43) Deputy Chairman and Joint Managing Director. He joined Henderson Administration in 1969, having spent the previous 6 years first with Legal and General Assurance Society and then with Hambros Bank. He became a group director in 1971. He is head of Henderson Administration's investment policy committee and of its investment department and leads the North American investment team. He has specialised in North American investments for the last 14 years. He has

been a director of E.&G. since 1977. Jeremy Edwards\* (aged 46) Joint Managing Director. He joined Henderson Administration in 1974 with 6 years experience in the unit trust industry, including the last 4 as managing director of Vavasseur Unit Trust Management. He became a group director in 1975. With primary responsibility for Henderson Administration's marketing he is also managing director of Henderson Unit Trust Management and is a member of the executive committee of the Unit Trust Association.

Raymond Cazalet\* (aged 52) is a chartered accountant who joined Henderson Administration in 1961 and became a group director in 1964. He is responsible for Henderson Administration's involvement with investment trusts and has been a director of Witan since 1972 and managing director since 1977. He has been a director of Lowland since 1963 and chairman since 1975. He is a deputy chairman of the Association of

Lord Faringdon\* (aged 45) is a non-executive director. He has been a partner in Cazenove & Co. since 1968 and was appointed a group director in 1971. He was appointed a director of Witan in 1976 and became

Robia Holland-Martin\* (aged 43) is a non-executive director. He was a partner in Cazenove & Co. from 1968 to 1974. He acts as a consultant to Newmarket Company (1981) Limited and he is a director of a number of companies including Paterson Products and Baronsmead Associates. David Browne (aged 40) joined Henderson Administration in 1968 after working for the Inland Revenue. He is a member of the Institute of Taxation. He was appointed a group director in 1974 and runs Henderson Administration's personal financial management services division.

Christopher Clarke (aged 38) is a chartered accountant who joined Henderson Administration in 1974 having spent the previous 6 years first with Wm. Brandts and then with Vavasseur Unit Trust Management. He became a group director in 1976 and is head of Henderson Administration's U.K. investment team. His primary investment management responsibility is for pension funds.

Colin Day (aged 36) joined Henderson Administration in 1977 after working in local government. He is a member of the Chartered Institute of Public Finance and Accountancy. He is responsible for developing Henderson Administration's pension fund services and became a group director in

Service District Control of the Cont

Richard Henderson (aged 37) joined Henderson Administration in 1968 and became a group director in 1977. He is a specialist in North American investment and is responsible for a substantial proportion of Henderson. Administration's funds invested in that market and some international unit

High Priestley (aged 40) joined Henderson Administration in 1966 and became a group director in 1972. He is a senior portfolio manager specialising in U.K. and European investments. He has been a director and managing director of Lowland since 1975 and he has been a director of Greenfriar and E&G. since 1978 and 1979 respectively.

Timothy Walker (aged 41) joined Henderson Administration in 1979 having retired from Hambro Life Assurance to 1978 where he was a founder director. He was appointed a group director in 1980. He acts as a consultant to Henderson Administration and has specific responsibility for the development of unit-linked life assurance and of the property funds.

The staff of Henderson Administration, including executive directors, can be categorised by activity as follows:-

	Executives	Others
vestment management and advice	21	17
farketing	16	21
dministration		50
	44	- 88

Of the total staff of 132, substantially all are employed in London. Due to the international nature of the business, extensive travel is undertaken by the investment managers who have established a network of contacts in financial and commercial centres around the world.

A significant proportion of remuneration of all staff is paid by way of bonus at the discretion of the Directors and at a level depending on Group profit performance (excluding H.B.M.). A Profit Sharing Scheme under the provisions of the Finance Act 1978 is being introduced and will be available to all full-time staff. A newly-introduced Executive Share Option Scheme will enable Henderson Administration to give additional incentives to . sclected executives. A summary of the rules of these two Schemes is set out under "Share Schemes" below.

The Group has a non-contributory pension and life assurance fund open to executive directors and staff.

H.B.M. operates with a staff totalling 60 in Hong Kong and in its branch. offices. It also has a profit sharing scheme for executive directors and the staff participate in a discretionary bonus scheme which is related to the profits of H.B.M.

#### Operating Facilities

Henderson Administration recently moved from Austin Friars, where it had been based since-1934, to Finsbury Square. The new premises, which are held on a lease expiring in 2008 (at an annual rental of £326,660 with reviews in 1987 and at 5-year intervals thereafter), contain 20,385 (net) square feet of office space of which 4,000 square feet is to be sublet pending further expansion of the Group.

Unit trust administration, including registration and securities movement and records, is undertaken on behalf of Henderson Administration by Premier Unit Trust Administration Limited, a subsidiary of Hambro Life. Assurance pic. The current contract, a summary of which appears under "Material Contracts" below, operates until 1987. The administration of other funds under management is carried out by Henderson Administration

H.B.M.'s principal office is in Hong Kong, where it has recently moved into new premises in Edinburgh Tower, in the centre of the financial district. 9,658 (net) square feet of space has been leased until 1988 (at an annual rental of H.K. \$3,709,080 with a rent review in 1985). The staff operate from one floor, and there is room for expansion to cover the growth which is expected in the next few years.

Both Henderson Administration and H.B.M. have for many years made considerable use of computer facilities for accounting, administration and portfolio valuations. More recently, significant expenditure has been committed to custom-designed in-house computer systems and software, specifically to enhance portfolio information and control within the investment departments. The effect of this will be to increase the operating capacity of individual investment managers.

#### Financial Results

The following table, which is based on information extracted from the Accountants' Report, summarises the results of Henderson Administration. for the five years ended 31st March, 1983:-

	1979	1980	1981	1982	1983
	£'000	£'000	£'000		£'000

Earnings per sbare after transfer to/from Initial Charges	<del></del> "		· .		-
Equalisation Reserve	2.76p	2.37p	5.23p	11.37p	12.57p
Note: The figures for earnings per share shares in issue following this Offer					iber of

Apart from the year to 31st March, 1980 Henderson Administration's revenue and profit before and after tax have increased in each of its last five financial years. (1980 was a poor year for the U.K. unit trust industry as a whole when net sales of units by the industry fell by 85 per cent, from £190.8 million to £28.7 million.)

The increase in Henderson Administration's revenues over the five years reflects the overall growth in unit trust sales at a time when equity markets, particularly in the U.K. and Japan, have experienced periods of sustained strength.

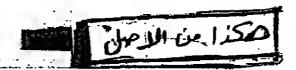

Moreover, Henderson Administration achieved a significant increase in its share of the U.K. unit trust market over the five years. In its last three financial years Henderson Administration has also benefited from the increases it has made (in common with most major unit trust managers) in the rates of annual and initial charges to unitholders.

The H.B.M. group are now the only associated companies and during the five year period contributed substantially the whole of the profits of associated companies shown above. H.B.M.'s results for the year to 31st March, 1983 were affected by unfavourable trading conditions in the early part of the year and exceptional items of expenditure.

While the Directors are of the view that it is impracticable to calculate the exact profit contribution of each of Henderson Administration's activities, they consider that unit trust and offshore fund management has accounted for at least 90 per cent. of Henderson Administration's pre-tax profit in each

The charge for taxation for the year ended 31st March, 1983 is abnormally high to the extent of approximately £240,000. This is due to expenditure on new premises which is unlikely to be allowable as a charge against taxation. and to the remittance of exceptional dividends by H.B.M.

It is Henderson Administration's policy to use an "Initial Charges Equalisation Reserve" to spread the revenue from initial charges on unit trust sales equally over four years and, thus, to reduce the effect of fluctuations in profit. The Directors will determine the level of the Company's dividends by reference to earnings after the transfer to or from the Initial Charges Equalisation Reserve.

# Henderson Administration Group plc

#### Current Trading and Prospects

The Group's future profitability will continue to rely significantly on the fortunes of its unit trust operations.

During the second half of the year to-31st March, 1983 Henderson Administration benefited from the particularly successful launch of a new unit trust and from trading conditions which were generally favourable. These conditions have persisted in the early months of the current financial year and, in common with the U.K. unit trust industry as a whole.

Henderson Administration has experienced a high level of unit trust sales. There can, however, be no certainty that the favourable conditions recently experienced will continue and, in particular, the level of Group profit in the current financial year will depend to a material extent on the level of sales of units for the year as a whole which in turn will be related to price and activity levels on the major stockmarkets.

The Directors' objective is to increase funds under management while maintaining high levels of profitability, investment performance and service

The existing unit trusts will continue to be promoted and new specialised. unit trusts may be added to the range so as to provide a wider service to the unit trust investor and his professional adviser and greater coverage of the market. The ability to identify investors' changing requirements and to continue Henderson Administration's past success in developing products to meet them will be an important factor in future profitability. There is considerable scope for increasing market share of individual life and pensions business through unit-linked products. The Directors believe that Henderson Administration will further increase its share of the U.K. unit trust market.

As already mentioned, opportunities exist for the expansion of the pension fund management operation which has so far made only a small contribution to Group revenue. The results of this business are less sensitive to fluctuations in security markets than unit trust management and itsuccessful development would, over a period, help to reduce the potential. volatility of Group profit.

The Directors expect further expansion of private client business and, in particular, of Henderson Administration's Unit Trust Management Service. described above.

There is also substantial scope for marketing the Group's services to nonresidents of the U.K., a market which Henderson Administration has not yet attempted to develop on any significant scale but which the Directors believe has considerable potential.

The Directors believe that H.B.M. will continue to make a major contribution to the Group's expansion.

Overall, the Group provides services which cover an increasing number of sectors of the investment management market. The funds managed by Henderson Administration in each sector have grown rapidly in recent years; the investment of these funds is diversified among the world's major security markets. The Directors believe that Henderson Administration's past achievements constitute a firm base for future progress.

#### **Proceeds of Issue**

In this Offer for Sale 531,046 new Ordinary Shares are being issued by the Company. The issue of these new shares will give rise to proceeds, after the expenses of the Offer for Sale, of a minimum of £1.2 million which will go to increase the Group's working capital. The issue of new shares will also expand the equity base of the Company and will, in the Directors' view, increase the Group's capacity for expansion.

#### Dividend Forecast

In the absence of unforeseen circumstances, the Directors intend to recommend dividends totalling 6p per Ordinary Share in respect of the year ending 31st March, 1984. This would, at current tax rates, represent a gross yield of 2.6 per cent. on the minimum tender price of 325p per share. A dividend at the rate of 6p per share in respect of the year ended 31st March, 1983 would have been covered twice by profits after transfer to the Initial Charges Equalisation Reserve.

It is intended that dividend payments will be apportioned as to payable in January and a final dividend payable in July of each year. The first dividend to be declared by the Company will be an interim dividend. payable in January, 1984.

#### Accountants' Report

The following is a copy of a report by Delonite Haskins & Sells, Chartered Accountants, the auditors and reporting accountants.

P. O. Box 207. 128 Oneen Victoria Street. Henderson Administration Group pic, London ECAP 4JX.: Baring Brothers & Co., Limited. 30th June, 1983 Gentlemen.

#### Henderson Administration Group plc

1 Churchwalks Limited was incorporated on 9th May, 1983 with an issued capital of 2 Ordinary Shares of £1 each (subsequently converted into 8 Ordinary Shares of 25p each) fully paid and on 23rd June, 1983 it became a public limited company under the name of Henderson Administration Group plc ("the Company").

2 On 22nd June, 1983 the Company acquired the whole of the Issued share capital of Henderson Administration (Holdings) Limited ("H.A. Holdings"), formerly Henderson Administration (Group) Limited, in consideration for the alloument of 4,906,812 Ordinary Shares of 25p each credited as fully paid at par. 3 On 28th June, 1983 the Company received a dividend from H.A. Holdings amounting to £1,250,000.

4 On 29th June, 1983 the Company issued 4,906,820 Ordinary Shares of 25p each, credited as fully paid, to the holders of the existing Ordinary Shares by way of capitalisation of £1,226,705 of the Company's reserves on a 1 for 1 basis. 5 On 29th June, 1983, the Company entered into an agreement to issue 531,046. Ordinary Shares of 25p each fully paid for each at a price to be determined in relation to the striking price under the Offer for Sale to be dated 30th June, 1983. 6 Following the above issues of shares, the issued share capital of the Company will consist of 10,344,686 Ordinary Shares of 25p each fully paid.

7 The Company has neither prepared accounts for submission to members nor paid a dividend since its incorporation.

#### Henderson Administration (Holdings) Limited

1 H.A. Holdings was incorporated on 13th October, 1978 as Henderson Administration (Group) Limited and on 18th December, 1978 it acquired the whole of the issued share capital of Henderson Administration Limited by the issue of 500,760 ordinary shares of £1 each fully paid. On 15th June, 1983 Henderson Administration (Chaldiana) I indicate the changed its name to Henderson Administration (Chaldiana) I indicate

2 We have examined the audited accounts of H.A. Holdings and of its subsidiaries. and associated companies for the periods relevant to this report. 3 All the subsidiaries, including the subsidiaries of Henderson Administration Limited prior to its acquisition by H.A. Holdings, have been wholly owned, either throughout the relevant periods, or since incorporation or acquisition except for Henderson Management (Guernsey) Limited (formerly Henderson Baring (Guernsey) Limited) in which H.A. Holdings held 50% of the issued share capital from 2nd September, 1979 antil 4th March, 1982 when the remaining 50% was acquired from Baring Brothers & Co., Limited for £25,000 in cash.

4 Throughout the relevant periods we have acted as auditors of H.A. Holdings and Henderson Administration Limited and we or our associated exceptions of auditors of the majority of the subsidiaries, with the principal exceptions of Henderson Unit Trust Management Limited and its subsidiaries and Henderson (Guernsey) Limited, which were audited by other firms.

5 No accounts for submission to members of H.A. Holdings or any of its subsidiaries have been made up in respect of any period subsequent to 31st March, 1983, 6 The information set out below is based on the audited accounts of H.A. Holdings and its subsidiaries after making all the adjustments we consider appropriate for the inclusion of our report in the Offer for Sale dated 30th June, 1983 to be issued by Baring Brothers & Co., Limited. The audited accounts have been prepared on the basis of the accounting policies set out below and, for all of the accounting periods dealt with herein in appropriance therein the standards appropriate by the basis of the accounting policies set out below and, for all of the accounting periods dealt with herein, in accordance throughout with standards approved by the accountancy bodies in the United Kingdom in relation to the last financial year. Although H.A. Holdings acquired Henderson Administration Limited on 18th December, 1978, as the acquisition was for shares, the consolidated profit and loss account of H.A. Holdings for the year ended 31st March, 1979 includes the results of Henderson Administration Limited and its subsidiaries for the year ended on that

7 In our opinion the information set out below gives, for the purpose of the Offer for Sale, a true and fair view of the profits and source and application of funds of H.A. Holdings and its subsidiaties for the five years ended 31st March, 1983 and of the state of affairs of those companies at 31st March, 1983.

The significant accounting policies adopted in arriving at the financial information set out in this report and which conform with United Kingdom accounting standards are

The accounts have been prepared on the historical cost basis of accounting and are drawn up in accordance with Sections 149A and 152A of, and Schedule 8A to, the Companies Act 1948. Current cost accounts have not been prepared because the adjustments involved would be immaterial and in the view of the Directors would give no assistance in an appreciation of the affairs of H.A. Holdings and its

#### (b) Basis of consolidation

The accounts of H.A. Holdings and its subsidiaries are made up to 31st March each year. These accounts include the results and assets and liabilities of H.A. Holdings and its subsidiaries for the relevant periods and H.A. Holdings' share of the net assets of associated companies, less discount on acquisition.

H.A. Holdings' share of the profits less losses of associated companies is included in the consolidated profit and loss account,

Goodwill arising on consolidation is written off over a period not exceeding ten years

All foreign currency amounts have been translated into sterling at the rates ruling at the balance sheet date and the differences have been taken to profit and loss account other than those which arise on translation of accounts of overseas companies which

Depreciation of fixed assets is calculated on a straight line basis as follow:-- 20 per cent, per annum

(i) Short leaseholds . (ii) Plant and equipment

- 10 per cent, per annum - 20 per-cent, per annum

(iii) Motor vehicles (iv) Computer equipment

Stocks are valued at the lower of cost of acquisition and net realisable value,

(g) Deferred taxation

Provision is made for deferred taxation at the rate applicable at the balance sheet date on timing differences unless there is reasonable probability that the liability will not arise within three years of the end of the financial year.

(h) Client bank accounts Since February, 1981 amounts due to clients are accounted for through separately

designated client bank and deposit accounts. Such amounts are shown as a footnote to the balance sheet.

Interest receivable and payable is dealt with on an accruals basis. Income from investments is included on the date payment is due.

#### Profit and Loss Accounts

The consolidated profit and loss accounts of H.A. Holdings and its subsidiaries for the five years ended 31st March, 1983 after making adjustments to the audited accounts are set out below:-

Years ended 31st March,

# Henderson Administration Group plc

The proportion of reserves, attributable to H.A. Holdings, of subsidiaries and associated companies operating overseas, amounting to £1,066,000 if distributed as dividends, would involve liabilities to additional United Kingdom taxation, as reduced by appropriate double taxation relief.

A subsidiary is committed to capital expenditure for which contracts of £75,000 had been placed at 31st March, 1983.

Statement of Source and Application of Funds

The source and application of funds of H.A. Holdings and its subsidiaries for the five years ended 31st March, 1983 were as set out below:-

The value of the Henderson Administration funds is calculated by multiplying the number of units in issue by the manager's offered price. The H.B.M. funds are shown at the

#### Statutory and General Information

Share Capital

The Company was incorporated in England under the Companies Acts 1948 to 1981 as a private company under the name Churchwalks Limited on 9th May, 1983. The name of the Company was changed to Henderson Administration Group Limited on 15th June, 1983 and the Company was re-registered as a public limited company on

Prior to 22nd June, 1983 the authorised share capital of the Company was £100 divided into 100 Ordinary Shares of £1 each of which two were issued and fully paid and were purchased by Barings at par. On 22nd June, 1983 each Ordinary Share was subdivided into four Ordinary Shares of 25p each and the authorised share capital increased to £3,300,000. On the same day and pursuant to material contract (4) below, the Company issued 4,906,812 Ordinary Shares to the shareholders of H.A. Holdings in consideration of the transfer to the Company of the whole of the issued share capital of H.A. Holdings.

On 29th June, 1983 4,906,820 Ordinary Shares were issued credited as fully paid to holders of the existing Ordinary Shares by way of capitalisation of £1,226,705 of the Company's reserves on the basis of one new Ordinary Share for every one existing

Pursuant to the Offer for Sale contract referred to below, Barings have agreed to subscribe for 531,046 Ordinary Shares, in addition to the 16 subscribers' shares held

by nominees for them. Without the prior approval of the Company in General Meeting-

no material issue of shares will be made within 12 months from the date hereof (save to shareholders pro rata to existing shareholdings);

(ii) no issue of shares will be made which would effectively alter the control of the Company.

In addition, the Shareholders' Agreement between the Four Investment Trusts described under "Interests of Directors and Others" below provides that the Four Investment Trusts will vote against any proposal for increases in or alterations to the issued share capital of the Company unless a majority of the Four Investment Trusts holding a majority of the shares in the Company held by them so agree.

The Directors are authorised to allot relevant securities (as defined in Section 14 of the Companies Act 1980) up to the amount of the existing authorised but unissued share capital and have power to allot equity securities (as defined in Section 17 of the Act) as if Section 17(1) did not apply to such allotment provided that such power is limited to (i) the allotment of equity securities pursuant to this Offer for Sale or in connection with a rights issue in favour of Ordinary Shareholders where the equity securities respectively attributable to the interests of all Ordinary Shareholders are proportionate (as nearly as may be) to the respective numbers of Ordinary Shareholders held by them and (ii) the allotment of otherwise than extrapret to the otherwise the otherwise than extrapret to the ot held by them and (ii) the allotment (otherwise than pursuant to item (i) above) of equity securities up to an aggregate nominal value of £165,000. These authorities expire on the date of the first Annual General Meeting of the Company.

At 30th June, 1981 the authorised share capital of H.A. Holdings was £584,010 divided into 333,000 Ordinary Shares of 25p each, of which 292,000 were issued and fully paid, and 500,760 Participating Preference Shares of £1 each, all of which were ed and fully paid. On 11th November, 1982 8,350 Ordinary Shares of H.A. Holdings were issued for cash at a price of 425p per share.

Save as disclosed under "Offer for Sale Contract" and "Share Schemes" below no commissions, discounts, brokerages or other special terms have been granted by the Company or any of its subsidiaries within the two years preceding this Offer for Sale in connection with the issue or sale of any share or loan capital of any such company and no unissued share or loan capital of the Company or of any of its subsidiaries is under option or agreed conditionally or unconditionally to be put under option. Except for the issues of the share capital of the Company and H. A. Holdings set out above, no share or loan capital of the Company or of any of its subsidiaries has been issued (save to other members of the Group) within the two years immediately preceding the date hereof or is now proposed to be issued, fully or partly paid, either for cash or for a consideration other than cash.

Articles of Association

The Articles of Association of the Company contain provisions, inter alia, to the

(1) Voting (a) At a General Meeting of the Company, subject to any special terms as to voting upon which any shares may be issued or may for the time being be held, on a show of hands every member who is present in person shall have one vote, and on a poll every member who is present in person or by proxy shall have one vote for every 25p nominal amount of share capital of which be is the holder. A corporation being a member is deemed to be present in person if represented by proxy or in accordance with the provisions of the Companies Act 1948. (b) If compliance is not made with any notice given by the Company requiring

particulars under the provisions of the Companies Acts of interests in any shares, the Company may disenfranchise those shares until the requirement is complied with to its satisfaction or until such shares are transferred.

The Directors (in this paragraph referred to as "the board") shall restrict the borrowings of the Company and exercise all voting and other rights or powers of control exercisable by the Company in relation to its subsidiaries so as to ensure (but as regards subsidiaries only in so far as by the exercise of such rights or powers of control the board can ensure) that the aggregate principal amount from time to time outstanding of all borrowings (as such expression is defined for the purpose in the Articles of Association) by the Group (exclusive of borrowings owing by one member of the Group to another member of the Group) shall not at any time without the previous sanction of an Ordinary Resolution of the Company exceed:-

(a) in the case of borrowings referred to below, an amount equal to 7 times the justed total of capital and reserves (as defined for the purpose in the Articles of Association); and

(b) in the case of all other borrowings, an amount equal to 11/2 times the adjusted total of capital and reserves.

The borrowings referred to in paragraph (a) above are short-term borrowings made by a member of the Group in the course of its business of managing unit trusts or open-ended investment companies for the purpose of (i) the acquisition or deemed acquisition by that member of the Group of units in unit trusts or shares in openended investment companies managed by it as a result of (1) the creation and issue of units or shares to it for offering for sale to third parties or (2) the repurchase by it from third parties of units or shares or (ii) financing the acquisition cost of units or shares which have been sold by it to third parties but the sale price of which remains unpaid. "Short-term borrowings" for the purpose of this sub-paragraph shall mean borrowings which are repayable on demand or at any time upon not more than seven

(3) Directors

(a) No shareholding qualification for Directors is required. The Directors are entitled to fees aggregating not more than £50,000 per annum, or such higher sum as may from time to time be determined by Ordinary Resolution of the Company. The Directors are also entitled to be paid their reasonable travelling hotel and incidental expenses of attending and returning from meetings of the board or committees of the board or General Meetings and to be paid all expenses properly and reasonably incurred by them in the conduct of the expenses properly and reasonably incurred by mean in the continue of the business of the Company or in the discharge of their duties as Directors. Any Director who, by request, goes or resides abroad for any purposes of the Company or who performs services which in the opinion of the board go beyond the normal duties of a Director may be paid such extra remuneration as the board may determine. The Directors may also appoint Executive Directors upon such terms (including remuneration) as the board may determine and such remuneration may be in addition to remuneration as a Director. A Director may hold any other office or place of profit with the Company (except that of Auditor) upon such terms (including extra remuneration) as the board may determine and may also be interested in a company in which the Company is interested.

(b) Where arrangements are under consideration concerning the appointment (including the arrangement or variation of the terms thereof, or the termination thereof) of two or more Directors to offices or places of profit with the Company or any other company in which the Company is interested, a separate resolution may be put in relation to each Director and in such case each of the Directors concerned shall be entitled to vote (and be counted in the quorum) in respect of each resolution except that concerning his own appointment (or the arrangement or variation of the terms thereof, or the termination thereof) and except (in the case of an office or place of profit with any such other company as aforesaid) where the other company is a company in which the Director owns I per cent, or more (as such expression is defined for the purposes of the Articles of Association).

(c) Save as otherwise provided in the Articles of Association, a Director shall not vote (nor be counted in the quorum) on any resolution of the board in respect of any contract or arrangement in which he is to his knowledge materially interested, and if he shall do so his vote shall not be counted, but this

prohibition shall not apply to any of the following-any contract or arrangement for giving to such Director any security or indemnity in respect of money lent by him or obligations undertaken by him for the benefit of the Company;

(ii) any contract or arrangement for the giving by the Company of any security to a third party in respect of a debt or obligation of the Company which the Director has himself guaranteed or secured in whole or in part;

(iii) any contract or arrangement by a Director to subscribe for shares, ntures or other securities of the Company issued or to be issued pursuant to any offer or invitation to members or debenture holders of the Company or any class thereof or to the public or any section thereof, or to underwrite any shares, debentures or other securities of the Company;

(iv) any contract or arrangement in which he is interested by virtue of his crest in shares or debentures or other securities of the Company or by reason of any other interest in or through the Company;

(v) any contract or arrangement concerning any other company (not being a company in which the Director owns I per cent. or more (as such expression is defined for the purposes of the Articles of Association)) in which he is interested directly or indirectly whether as an officer, shareholder, creditor or otherwise;

(vi) any proposal concerning the adoption, modification or operation of a on fund or retirement, death or disability benefits scheme which relates both to Directors and employees of the Company or any of its subsidiaries and does not provide in respect of any Director as such any privilege or advantage not accorded to the employees to which such scheme or fund relates; and

(vii) any arrangement for the benefit of employees of the Company or any of its subsidiaries under which the Director benefits in a similar manner as the employees and which does not accord to any Director as such any privilege or advantage not accorded to the employees to whom such arrangement relates.

(d) Where a company in which a Director holds I per cent. or more (as such expression is defined for the purposes of the Articles of Association) is materially interested in a transaction, then that Director shall also be deemed materially interested in such transaction.

(e) The Company may by Ordinary Resolution suspend or relax the provisions of sub-paragraphs (b) and (c) above to any extent or ratify any transaction not duly authorised by reason of a contravention of such sub-paragraphs.

(f) The provisions of section 185 of the Companies Act 1948 (relating to the appointment and retirement as Director of persons who are aged 70 or more) 

Interests of Directors and Others Immediately following the date hereof the interests of the Directors, all of which are beneficial, in the issued share capital of the Company, as they will appear in the register maintained under the provisions of the Companies Acts, will be as follows-

Director			CHOR	ar sacres

The aggregate emoluments of the executive Directors from Henderson Administration during the year ended 31st March, 1983 amounted to £534,270 (non-executive Directors; nii). It is estimated that the amount payable to the Directors of the Company in respect of the year ending 31st March, 1984 will amount to approximately £585,000 (assuming staff bonuses are paid at the same rate as in the

Save for the shares in H.A. Holdings sold to the Company under material contract (4) below, no Director has or had an interest in any assets which, within two years of the date hereof, have been or are proposed to be acquired or disposed of by or leased to the Company or any of its subsidiaries.

No contract or arrangement subsists in which a Director is materially interested and which is significant in relation to the business of the Company and its subsidiaries

No Director has a service contract (other than a contract expiring or determinable by the relevant company without payment of compensation within one year) with the Company or any of its subsidiaries and no such contract is proposed.

Immediately prior to this Offer for Sale the interests in the Company of the Four Investment Trusts were as follows:-

			Percentage of
		· Ordinary	Ordinary Shires
	. 2	Shares .	held
Witan		4,099,996	41.8
E&G.	• •	2,460,000	25.1
Greenfriar		837,716	2.5
Lowland		738,000	7.5
		8,135,712	82'9

Following this Offer for Sale the Four Investment Trusts will hold interests in the

	 · A	-	Ordinary	Percentage of Ordinary Shares held
Witan E.&G.		. • • • • •	3.860,000 1.416,220	37.3 13.7
Greenfriar Lowland	 	a,	481,860 414,210	47
	 		6,172,290	59.7

By a Shareholders' Agreement dated 29th June, 1983 and made between the Four. investment Trusts, they agreed that, conditionally upon the sale of shares pursuant to this Offer for Sale, they would not sell any shares in the Company remaining, registered in their respective names, except to another of them or to one or more persons approved by the others of them, unless such shares have been offered to the others of the Four investment Trusts at a price (failing agreement) equal to the average middle market price during the previous 15 business days. If one or more persons acting in concert acquire control of any of the Four Investment Trusts or if any of them shall effect a scheme of amalgamation or reconstruction or be placed in liquidation, that party shall be deemed to have offered its shares to the other parties. The Four Investment Trusts have agreed with Burings in the Offer for Sale contract referred to below that they will not dispose of their Ordinary Shares for a period of twelve months following the date of this Offer for Sale without the prior consent of

Save as disclosed above, on completion of this Offer for Sale it is not expected that there will be any holdings of 5 per cent, or more in the issued share capital of the

The Company has been advised that each of the Vendors named below, H.A. Under four Agreements, dated 26th May, 1978, 5th July, 1978, 5th June, 1978 and 12th June, 1978 and made between Witan, E. & G., Greenfriar and Lowland respectively (!) and Henderson Administration Limited (2), the latter provides investment and financial management and administrative, accounting and compa secretarial services for a fee calculated annually in advance by reference to budgeted expenditure on the provision of such services to the relevant investment trust uplifted by 10 per cent. The agreements are for two years, currently ending 31st March, 1984 (Witan: 30th April, 1984), and are automatically renewed unless terminated, inter alia, by the investment trust concerned by 6 months' notice expiring at the end of the two year period. In the event of termination by the investment trust by such notice it is required to pay compensation of three times the final year's fee.

The fees charged or chargeable to the Four Investment Trusts by Henderson Administration in each of the undermentioned years to 31st March (Witam: 30th April) pursuant to the above arrangements are as follows:—

		1982 £		1983 £		1984 £
Witan		333,900		392,700	٠.	405,600
E&G.		67,700		80,700		83,300
Greenfrian		19,200	-,	22,900		23,700
Lowland	100	16,100		19,200		19,800

Dividends received or receivable by Barings as a shareholder in H.B.M. in respect of the two years ended 31st March, 1983 amount to H.K. \$8.8 million. During the two years immediately preceding this Offer for Sale Barings has also received from Henderson Administration fees aggregating £15,000 (plus V.A.T.) for advisory

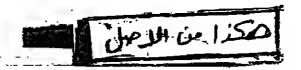

#### Offer for Sale Contract

By an Agreement dated 30th June, 1983 between Witan, E&G., Greenfriar and by an Agreement dated 30th 3the, 1963 between within Electric Checken and executives of the Group ("the Vendors") (1) the Company (2) the Directors (3) and Barings (4), Barings agreed, subject to the Council of The Stock Exchange admitting to the Official List by not later than 8th July, 1983 all the Ordinary Shares of the Company in issue and now being issued, to purchase an aggregate of 2,068,938 Ordinary Shares from the Vendors and to subscribe for an aggregate of 2,068,938 Ordinary Shares from the Vendors and to subscribe for 531,046 new Ordinary Shares, all for a consideration per share equal to the striking price under this Offer for Sale (less 2 per cent, of the minimum tender price) and to offer such shares, together with the 16 subscribers' shares held by them, to the public at a minimum tender price of 325 pence per Ordinary Share. Under the Agreement warranties were given to Barings by the Directors and the Vendors and a tax indemnity was given to Barings by the Vendors. Barings will pay underwriting commissions at the rate of 1½ per cent, of the minimum tender price and a fee to the brokers, Cazenove & Co. The Company has agreed to pay all other costs and expenses of and incidental to this Offer for Sale and the application for admission to the Official List of the Ordinary Shares issued and now being issued, including capital ditty, a fee of £100,000 to Barings, Barings' legal fees and other expenses, the costs and expenses of the Reporting Accountants and the costs of printing, advertising and circulating this Offer for Sale. The total expenses payable by the Company are estimated to amount to £500,000. The Vendors have also agreed to pay a fee to Barings in respect of this Offer for Sale.

Based on the minimum tender price the amount subscribed for each new Ordinary

Based on the minimum tender price the amount subscribed for each new Ordinary Share will be 318.5p (including 293.5p per share by way of premium) and the net proceeds of the subscription are estimated at £1.2 million after deduction of the expenses to be borne by the Company. For each 5p by which the striking price exceeds the minimum tender price, the Company will receive a further \$26,552. #### Material Contracts

The following contracts (not being contracts entered into in the ordinary course of business) have been entered into since 30th June, 1981 and are or may be material:-

The second secon

(1) An Agreement dated 29th December, 1982 made between Henderson Unit Trust Management Limited (!) and Premier-Unit Trust Administration Limited (2) under which the latter agreed to provide administrative registration and other facilities for fees the rates of which are subject to annual adjustment.

(2) An Underlease dated 2nd February, 1983 made between Finwil Properties Limited (1) and Henderson Administration Limited (2) being the lease described under "Operating Facilities" above.

(3) An Agreement dated 20th June, 1983 made between Henderson Administration Limited (1) and H.B.M. (2) recording the terms on which H.B.M. provides investment management and other services at a remuneration agreed from time to time. The agreement relieves H.B.M. of liability other than for negligence, withit or reckless misconduct or violation of applicable law, The appointment is terminable without

(4) An Agreement dated 22nd June, 1983 made between the Company (1) and the then shareholders of H.A. Holdings (2) under which the shareholders agreed to transfer the whole of their shareholdings in H.A. Holdings to the Company in exchange for the issue to them of shares in the Company, the basis for the exchange being 60 Ordinary Shares of 25p each in the Company for every 10 Ordinary Shares of 25p and 62 Ordinary Shares of 25p each in the Company for every 10 Participating Preference Shares of £1 each of H.A. Holdings in issue,

(5) An Agreement dated 29th June 1983 made between Barings (1) Henderson Administration Limited (2) and H.B.M. (3) under which the parties agreed on terms relating to H.B.M. including the scope of its business, the appointment of directors and matters concerning the conduct of the business which require unanimity. The parties intend that any dealings between H.B.M. and either of its shareholders shall be on an arm's length basis and that services required by either of them in relation to investment in the Far East or Australasia shall be provided by H.B.M. or one of its subsidiaries. The agreement confers on each shareholder a call option exercisable in the case of the Company's option on, inter alia, a change in control of Barings and in the case of Barings' option on, inter alia, the acquisition by a third party of shares in the Company conferring more votes than those attaching to all the shares then held by the Four Investment Trusts, and contains pre-emption provisions.

(6) An Agreement dated 29th June, 1983 and made between Witan (1) E.&G. (2). Greenfriar (3) and Lowland (4) being the Shareholders' Agreement referred to above-under "Interests of Directors and Others".

(7) (a) An Agreement dated 29th January, 1982 between Barings (1) H.B.M. (2) and Baring International Investment Limited ("B.J.L") (3) under which the parties agreed on terms relating to B.L. including the scope of its business, the appointment of directors and matters concerning the conduct of the business which require unanimity. Barings and H.B.M. each owns 50 per cent. of the issued share capital of B.Ll. which was formed by the participants to provide investment management services to pension funds and similar institutions in the U.S.A. The Agreement confers pre-emption rights on each shareholder, which operate, inter alia, upon a change of control of either shareholder, and prohibits the acquisition by H.B.M. of any subsidiary which competes with B.Ll. without Barings' consent. Barings' consent.

(b) Three Agreements dated as of 30th December, 1982, 24th June, 1983 and as of 30th December, 1982 between B.I.I. (1) and H.B.M., H.B.I.I. Limited (a wholly owned subsidiary of H.B.M.) and Barings (2) respectively pursuant to the first two of which H.B.M., until 31st December, 1982, and H.B.I.I. Limited, with effect from 1st January, 1983, provide investment advisory services to B.I.I. in relation to securities in the Far East and Australasia and pursuant to the third of which Barings provides investment advisory services to B.I.L in relation to securities in other parts of the world.

#### (8) The Offer for Sale contract referred to above.

 $\beta = 0.223 \times |y_f|$ 

The Company has instituted a Profit Sharing Scheme and an Executive Share Option Scheme, the first of which is being submitted to the Inland Revenue for approval under the Finance Act 1978. The Company will make application to the Council of The Stock Exchange for all shares to be issued under these Schemes to be admitted to the Official List. The granting of options under the Executive Share Option Scheme and the allocation of profits to the Profit Sharing Scheme are, subject to the restrictions summarised below, at the discretion of the Directors. No further options may, however, be granted under the Executive Share Option Scheme after 29th June, 1993.

The Directors have the power to amend various provisions of either of the Schemes but the basic structure of both cannot be altered without the approval of the Company in General Meeting. In particular, shareholders' approval is required for any alteration to the class of employees eligible to participate, the numbers of shares available under either of the Schemes, the maximum entitlement of any individual and the subscription price of any new shares issued. The Directors, however, are empowered to make such alterations to the Profit Sharing Scheme as are necessary to obtain Inland Revenue approval.

The Schemes, in addition to the statutory limitations, are subject to the following

(1) The aggregate nominal amount of Ordinary Shares which may be issued under the Option Scheme is £129,310 repre capital of the Company following this Offer for Sale

(2) The aggregate nominal amount of Ordinary Shares which may be acquired by subscription by the Trustees of the Profit Sharing Scheme is £260,000 representing approximately 10% of the issued share capital of the Company following this Offer for Sale.

(3) The aggregate nominal amount of Ordinary Shares over which options may be granted on any date under the Option Scheme and the aggregate nominal amount of Ordinary Shares which may be subscribed by the Trustees of the Profit Sharing Scheme on any date is limited so that, when aggregated with the nominal amount of

(a) issued or remaining issuable in respect of rights granted in the previous 2 years or 10 years oursoant to the Option Scheme or any other share option scheme approved in General Meeting for Group employees, and

(b) Issued in respect of which interests or rights of acquisition have been granted in the previous 2 years or 10 years under the Profit Sharing Scheme or any other scheme approved in General Meeting for Group employees providing for the subscription of Ordinary Shares out of the profits of the Group.

it shall not, in either case, exceed, respectively for such 2 or 10 year period, 3 per cent, and 10 per cent, of the nominal amount of the ordinary share capital of the Company in issue immediately before such date.

(4) The aggregate nominal amount of Ordinary Shares over which options may be granted on any date under the Option Scheme is limited so that, when aggregated with the nominal amount of Ordinary Shares:-

(a) issued or remaining issuable in respect of rights granted in the previous 10 years under the Scheme or any other share option scheme approved in General Meeting for Group employees (other than a savings related scheme) and (b) issued in respect of which interests or rights of acquisition have been granted in the previous 10 years under any scheme approved in General Mee Group employees providing for the subscription of Ordinary Shares out of Group profits, other than the Profit Sharing Scheme, (or any other profit sharing scheme as approved under the Finance Act, 1978).

it shall not exceed 5 per cent of the nominal amount of the ordinary share capital of the Company in issue immediately before such date.

(5) The aggregate nominal amount of Ordinary Shares which may be subscribed by the Trustees of the Profit Sharing Scheme on any date in a financial year of the Company shall be limited so that, when aggregated with the nominal amount of Ordinary Shares issued under the Profit Sharing Scheme in that financial year, it shall not exceed the lower of-

(a) I per cent. of the nominal amount of Ordinary Shares in issue immediately

(b) the nominal amount of Ordinary Shares which could otherwise be issued at the subscription price for shares under the Profit Sharing Scheme for an amount equal to 5 per cent of the consolidated profits of the Company (before tax and extraordinary items) for that financial year which are, in the opinion of the Directors, attributable to the U.K. operations of the Group.

The aggregate nominal amounts of Ordinary Shares referred to in (1) and (2) above will be adjusted by the Directors (subject to the auditors confirming that such adjustment is fair and teasonable) to take account of any capitalization or rights issue or any capital distribution or any consolidation; sub-division or reduction in capital.

Further particulars of each Scheme are set out below-(1) Profit Sharing Scheme

The Scheme is constituted by a Trust Deed dated 29th June, 1983, made between the Company and R. G. Holland-Martin, R. P. St. G. Cazalet, D. J. Browne and A. J. Markecking in the Scheme in the Schem Mackechnie (as Trustees). The purpose of the Scheme is to encourage employees of the Company and participating Group companies to have a closer identity with interests of the Company through ownership of shares in the Company.

Under the Scheme the Company and participating Group companies will provide the Trustees with funds to enable them to subscribe for and/or purchase Ordinary Shares which will then be appropriated to eligible employees who wish to participate in the Scheme. It is expected that the first allocation under the Scheme will be made in or about June, 1984, in respect of the profits for the year ended 31st March, 1984.

All full-time U.K. employees (including Directors) of the Company and participating Group companies who have completed one year's service before the end of any innancial year of the Company will be eligible for any grant of participation under the Scheme in respect of such financial year. Each eligible employee will be entitled to apply for an appropriation of Ordinary Shares having a market value equal to such percentage, which shall be the same for all employees, of his caroling as the Directors shall determine but with a maximum of \$1.250 or each other amount not exceeding. shall determine but with a maximum of £1,250 or such other amount not exceed £5,000 as may be the maximum allowed by the Finance Acz 1978 (as smended).

Subject to the limitations described above, the Directors may direct the Trustees as to the number of Ordinary Shares to be acquired by subscription on any occasion. The subscription price of an Ordinary Share shall be the higher of (i) the nominal value of an Ordinary Share and (ii) the average of the middle market quotations for an Ordinary Share, as derived from The Stock Exchange Daily Official List, for the three dealing days immediately following the preliminary announcement of the final results of the Group: Ordinary Shares will be appropriated by no later than sixteen weeks after that announcement. Ordinary Shares subscribed under the Scheme will rank

pari passu with the Ordinary Shares then in issue save that they will not rank for any dividend or other distribution paid or made in respect of the financial year ended prior to such subscription.

All Ordinary Shares appropriated under the Scheme will be held by the Trustees on behalf of the participants to whom the Ordinary Shares were appropriated. Subject to the usual restrictions and obligations required by the Finance Act 1978 for profit sharing schemes, participants will be able to vote their shares, to participate in dividends, rights issues and capitalisation issues and to deal in their shares in the same way as other ordinary shareholders.

(2) Executive Share Option Scheme

(2) Executive Stare Option Scheme

The purpose of this Scheme is to enable selected full-time executives of the Company and its subsidiaries to apply for options to acquire Ordinary Shares in the Company. The first period during which invitations may be made under the Scheme is from 4th July, 1983 to 21st July, 1983. Thereafter invitations may be made once a year during the period between 14 and 42 days following the preliminary announcement of the Company's results for the preceding year. A consideration of £1 will be paid for the grant of options which will be personal to the option holder and not capable of transfer or assignment.

The subscription price at which holders of options granted during the first period for grant of options may acquire Ordinary Shares will be the striking price at which Ordinary Shares are sold under this Offer for Sale.

Thereafter, the subscription price shall be determined by the board before the date of grant of an option but shall not be less than the greater of:-(a) the nominal value of an Ordinary Share; and

(b) the average of the middle market quotations for an Ordinary Share, as derived from The Stock Exchange Daily Official List, for the three dealing days before the invitation in respect of such option.

days before the invitation in respect of such option.

On each occasion, an individual's participation in the Scheme will be limited so that the aggregate subscription price payable on the exercise of that option, when aggregated with the subscription price paid or payable by that individual to acquire Ordinary Shares issued or remaining issuable in respect of rights granted within the previous 10 years under the Scheme or any other option scheme for Group employees (other than a savings related option scheme) and to acquire Ordinary Shares by virtue of rights granted within the previous 10 years under any profit sharing scheme for Group employees (other than the Profit Sharing Scheme or any other profit sharing scheme as approved under the Finance Act 1978), shall not exceed four times his annual commerciation (excluding any horne) at that date.

scheme as approved under the Finance Act 1978), shall not exceed four times his annual remuneration (excluding any bound) at that date.

An option will normally only be exercisable between three and seven years from the date of its grant subject to such other constraints as were imposed at that time by the Directors being satisfied and will normally lapse upon the option holder ceasing to be employed by the Group or the member of the Group employing the option holder ceasing to be a subsidiary of the Company. However the Directors have the discretion to permit the early exercise of an option and the exercise within seven years of the date of its grant of an option which would otherwise have lapsed. Early exercise is also permitted in the event of take-over or reconstruction, or on a voluntary winding-up of the Company.

In the event of a capitalisation or rights issue or any consolidation or subdivision or reduction of capital or a demerger the number, nominal amount and class of Ordinary Shares subject to the Scheme and comparised in each option may be adjusted by the board upon the advice of the Company's auditors but no adjustment may be made which would result in any share subject to any option being issued at a

The shares allotted upon exercise of any option will rank part passu in all respects with the Ordinary Shares then in issue save as regards any rights attaching thereto by reference to a record date prior to the date of such allotment.

(1) The Directors are satisfied that the Group has sufficient working capital for its

(2) Barings is registered in England (No. 32813) and its registered office is at 8 hopsgate, London, EC2N 4AE.

(3) Lord Faringdon, a Director of the Company, is also a partner in Cazenove & Co.

who will receive a fee for acting as brokers to the issue.

(4) Henderson Administration Limited is negotiating the sale of its leasehold interest in part of 11, Austin Friars, London EC2. The Directors expect that consideration of £35,000 will be received in July, 1983. (5) Neither the Company nor any of its subsidiaries is engaged in any litigation or has

any claims of material importance threatened against it. (6) The Directors have been advised that the close company provisions of the Income and Corporation Taxes Act 1970 do not apply to the Company.

(7) Deloitte Haskins & Sells have given and not withdrawn their written consent to the issue of this Offer for Sale with the inclusion of their report and the references thereto in the form and context in which they are included. (8) The documents attached to the copies of this Offer for Sale delivered to the

Registrar of Companies for registration were copies of the written consent referred to in sub-paragraph (7) above, the statement of Deloitte Haskins & Selfs setting out the adjustments made in arriving at the figures contained in their report (as set out herein) and giving the reasons therefor and copies of the material contracts referred to (9) The financial information concerning the Group contained in this document does

not amount to full individual accounts within the meaning of Section 11 of the Companies Act 1981. Full individual accounts relating to each financial year to which the financial information relates have been or will be delivered to the Registrar of Companies. The anditors of each relevant company have made a report under Section 14 of the Companies Act 1967 in respect of each such set of accounts and each such report was an unqualified report within the meaning of Section 43 of the Companies Act 1980,

(10) A certificate of exemption has been granted by the Council of The Stock Exchange pursuant to Section 39 of the Companies Act 1948.

Documents Available for Inspection The following documents or copies thereof may be inspected at the offices of Slaughter and May, 35 Basinghall Street, London, ECZV 5DB during usual business hours on any weekday (Saturdays and Public Holidays excepted) for a period of fourteen days following the date of publication of this Offer for Sale:—

(1) the Memorandum and Articles of Association of the Company: (2) the audited consolidated accounts of H.A. Holdings and its subsidiaries for the two financial years ended 31st March, 1982 and 31st March, 1983;

(3) the Material Contracts referred to above; (4) the Rules and Trust Deed of the Profit Sharing Scheme and the Rules of the Executive Share Option Scheme;
(5) the agreements with Witan, E&O., Greenfrist and Lowland referred to under

"Interests of Directors and Others" above; and (6) the Accountants' Report, the statement of adjustments relating thereto and the Dated: 30th June, 1983

#### Procedure for Application

Any application must be for a minimum of 100 shares and thereafter in the following multiples of shares:-Applications for not more

in multiples of 100 shares than 1,000 shares Applications for over 1,000 and not more than 5,000 shares in multiples of 500 shares Applications for over 5,000 and not more than 10,000 shares in multiples of 1,000 shares in multiples of 5,000 shares Applications for over 10,000 shares Applications must be made on the application forms provided and forwarded or handed in to Williams & Glyn's Bank pic, New Issues Department, P.O. Box 425, 67 Lombard Street, Lendon EC3P 3DL to arrive not later than 10.00 a.m. on Thursday, 7th July, 1983. Photostat copies of application forms will not be accepted.

A separate cheque or banker's draft must accompany each application form. Cheques or banker's drafts, which must be drawn in sterling on a branch in England, Scotland, Wales, Northern Ireland, the Channel Islands or the Isle of Man, of a bank which is either a member of the London or Scottish Clearing Houses or which has arranged for its cheques and banker's drafts to be cleared through the facilities provided for the members of those Clearing Houses and which must bear the appropriate sorting code number in the top right hand corner, must be made payable to "Williams & Glyn's Bank ple" and crossed "Not Negotiable" and must represent payment in full at the price at which application is made. An application will not be considered unless these

Barings reserves the right to present all cheques and banker's drafts for payment on receipt, to retain letters of acceptance and surplus application monies pending the receipt, to retain fetters of acceptance and surplus application monies penning the clearance of all cheques and to accept in part only or to reject or scale down applications and, in particular, multiple or suspected multiple applications at any one price. Due completion and delivery of an application form accompanied by a cheque will constitute a representation that the cheque will be honoured on first presentation and attention is drawn to the decisration in the application form to that effect. Applications will be irrevocable until 14th July, 1983.

Subject as aforesaid, applications will be accepted on the following basis:

(1) All shares for which applications are wholly or partly accepted will be sold at the same price ("the striking price"), which will not necessarily be the highest price at which applications (including applications at higher prices) are received for the total number of shares offered under this Offer for Sale. In deciding the striking price and the basis of this allocation, Barings will have regard, inter alia, to the need to establish a satisfactory market in the shares.

Applications for shares at less than the striking price will not be accepted. (3) If applications are received for less than the total number of shares offered, the striking price will be the minimum tender price of 325p per share. (4) The striking price and the basis of allocation will be announced on or as soon as

Preference will be given in respect of a maximum of 10 per cent. of the shares being offered for sale to applications made by employees and pensioners of the Company and its U.K. subsidiaries on the special pink forms provided for this purpose. These will specify the amount of money to be expended, rather than the number of shares applied for and will confer preferential rights for such number of shares per employee as can be purchased with such amount of money at the striking price. In addition, and configurate many exactly the maximum process which they are applied to analy such applicants may specify the maximum price at which they are prepared to apply

If any application is not accepted, the amount paid on application will be returned in full and, if any application is accepted for fewer shares than applied for or is made at a price higher than the striking price and accepted, the balance of the amount paid on application will be returned by cheque through the post, in all cases without interest. Acceptance of applications will be conditional on the Council of The Stock Exchange admitting the whole of the issued ordinary share capital of the Company to the Official List not later than 8th July, 1983. Monies collected in respect of applications will be returned if such condition is not satisfied by that date; in the meantime, all monies will be retained by Williams & Glyn's Bank plc in a separate account. It is expected that dealings will commence not later than 14th July, 1983.

Renounceable letters of acceptance will be sent to successful applicants by not later than 13th July. 1983 and will be renounceable up to 26th August, 1983. The shares now being offered for sale will be registered free of stamp duty and registration fees in the names of the purchasers or persons in whose favour letters of acceptance have been renounced, provided that, in the case of renunciation, letters of acceptance duly completed in accordance with the instructions contained therein are lodged for registration on or before 26th August, 1983. Share certificates will be despatched by first class post on 23rd September, 1983.

All cheques and documents sent by post will be sent at the risk of the persons entitled

No person receiving a copy of this Offer for Sale and/or an application form in any territory other than the United Kingdom may treat the same as constituting an invitation to him, nor should be in any event use such application form, unless in the relevant territory such an invitation could lawfully be made to him or such form retevant territory such an invitation could tawaitly be made to mim or such form could lawfully be used without compliance with any registration or other legal requirements. It is the responsibility of any person outside the United Kingdom wishing to make an application hereunder to satisfy himself as to full observance of the laws of the relevant territory in connection therewith, including obtaining any governmental or other consents which may be required or observing any other formalities needing to be observed in such territory.

But a respectable 15 per cent improvement was forecast ranging from £660m for the full year, against £584.3m the year

before.

The difficulty analysts face is that GEC usually revalues its cash and gilt holdings every six months. At March 31, sterling stood at \$1.48, presaging a considerable revaluation of the cash mountain, particularly as most of the foreign holding is in dollars. On the trading side much of the profit derives from equally massive turnkey projects which generate cash over two or three years. For instance, there is the £550m Castle Peak power station in Hongkong, another power project worth more than £300m for South Africa, and defence contracts which include a new torpedo being built for Britain. GEC is still keeping its fingers crossed that the Sizewell PWR inquiry will get the go-ahead.

Perhaps the Government's most controversial sell-off, Amersham International re-ports its final today. The worldwide recession has done much to tarnish the glamour image of the radio-active materials seller. Sir John Hill, chairman, forecast consistent

#### **ECONOMIC VIEW**

#### All eyes on money supply plans cannot be easily altered in

Interest this week is expected to centre on the June provisional money supply figures, which are released by the Bank of England tomorrow.

Analysts are expecting a rise in £m3, the broad money measure, of between 0.75 and 1 per cent, not in itself alarming but still leaving money supply growth well above its 7 to 11 per cent target range.
Government borrowing has

been the main expansionary force behind money growth in the first few months of the financial year. Although much of this is due to local authorities

repaying debt to private lenders, which does not affect borrowing overall, there are some signs-admitted by Mr Nigel Lawson, the Chancellor, in a radio interview last week-that spending too is running above

The authorities are most unlikely to try to raise interest rates to choke off money growth in these circumstance, particularly with economic recovery still fragile. Instead, they may try to toughen fiscal policy in the autumnif the overspending official resrves, final May retail sales and credit business and still appears to be continuing.
But their room for

# Lions a toothless force in a cage without a key

British Lions.

In fifteen fateful minutes, the British Lions were demolished by the powerful All Black forwards at Carisbrook on Saturday. The All Blacks won the international 15-8, the post of the page 15-8. the series 3-0, but at the very least, the Lions went down with a hearty growl, and certainly not a tired whimper.

whimper.

The Lions struck shattering blows at the All Blacks in the opening minutes of both halves. The first came when John Rutherford and Steve Bainbridge backed the ball through a scattered defence and little Roger Baird made a brilliant diving one-point landing on the ball just before it slithered over the muddy turf and into touch.

The second was unfolded with regal spletodour in the second minute of the second half by which time the All Blacks had trumped Bairds's ace with two well-taken

time the All Blacks had trumped Bairds's are with two well-taken penalty goals by Allan Hewson. Jim Calder broke from his own country on the right flank; the Lions won the ruck; the backs fled to the left; Baird had the overlap and as he was taken by Stu Wilson's tackle, he found Gwyn Evans inside, Evans glided through a gap while Rutherford had the inpass and the try. Even if he looked suspiciously as he made a double-movement before he touched down over the line, the try was awarded,

line, the try was awarded line, the try was awarded,
So, at 8-6, since Ollie Campbell was short with his first conversion and just wide with his second, the Lions were ahead, and obviously confident. They were winning their lineouts and scrums with more comfort than before.

But on this difficult field, like some huge emerald sponge with rain and wind which numbed the fingers, the Lions were slowly ut remorselessly enfolded by the vast black blanket.

Their strum started to sag, Roy Leidlaw began to be hustled and bustled at the lineout and too often tired and nervous fox, cornered by the baying hounds of the All Black

Witingly or not, the All Blacks aimed for the left-hand corner of the field, where huge water puddles trapped the ball and made cool defence impossible. The Lions were trapped by the black wave, and they ust could not escape.

Suddenly, the All Blacks managed a thrust to the right, Dave Loveridge ran towards the posts and with exquisite timing for such an impromptu move, Wilson slashed across Loveridge's stern, took the inpass and cut back across the flow of the attack. Three Lions could are the survey a deserver hand or his only wave a desperate hand at him as Wilson plunged over for the try which, with Hewsons conversion, gave New Zealand a 12-6 lead.

Hewson then gathered by his posts and with a huge punt, sent the ball soaring and then slithering back into touch inside the Lions 22, and ack again at that fateful left corner, So, for the last 20 minutes, the Lions were agonizingly pinned down, their forwards holding on more by spirit than organized control, their backs unable to wriggle clear. Hewson applied the coup de grâce with an easy penalty goal three minutes before the end. The Lions' of Rutherford at inside centre and Evans at full back had given the occasional hint of a more potent backline. They played with a

potent backline. They played with a noble and admirable spirit. Yet in sub arctic conditions, they had been into a corner and pinned there by these remorseless All Blacks.

The Loins worked well in sections, at serum, lineout and specially in the fearless work of Calder and Winterbottom in the loose. But the All Blacks, whether tight or loose forward, committed themselves more to the urgent charge ahead.

appear in the armour. They were sodden, half-frozen, utterly deter-

with cunning and poise, always varying his play. The rest of the All Black line were jerky, certainly not with the force that Rutherford had in midfield, and put further out of joint by a groin injury to Wayne Smith just before halftime.

punts. And finally, the Lions were undone by Hewson, the man whom the lions and a substantial part of New Zealand regarded as the weak part of the All Black chain. Two years ago, Hewson had been taken from the same Siberian field suffering from exposure. Yet in this international Hewson played with-

out fear or fault.
Now the Lions have a fortnight to endure matches against Hawkes Bay counties and Waikato before the

### Italians place a ban on signing of Zico

The Brazilian club Flamengo have declared open war with Italian football. Not only did they tumble to defeat against Juventus of Turin in the Mundialito tournament on Saturday, but the Italian authorities have now banned the \$4million transfer of their player Zico to the first division team Udinese. Carlos Alberto, the Flamengo

coach, blamed the referee for their 2-1 defeat which forced them to take 2-1 defeat which forced them to take second place in the tournament behind Juveotus. "It was a scandal, a real theft", said Alberto. "He did not award us a pensity kick when Junior was fouled and he didn't stop Boniek who was offside when her scored Juventus's second goal." And after the Italian Fotball Federation had, stopped the Brazilian Zico playing for first division team Udinese, a Flamengo official said: "He has been bitterly disappointed and the psychological damage being

and the psychological damage being caused to Zico is our major worry at the moment." The Federation have also put a block on the signing of another Brazilian, Toninho Cerezo, by the Italian champions Roma.

The trouble surrounds Zico's contract which was concluded not directly with Flamengo, but with an intermediary company based in London. Zerezo's move has been

weight Periglen.
Periglen is favourite to head the lightweight class. Robert Oliver has lightweight class. Robert Oliver has not yet decided whether to ride R. A. Shock's Providence of Gems Signet Bloodstock's Brewster, who was reserve champion to Elite at the Three Counties this year.

Davi. Taplow has to decide between F. W. Eastwood's Dargle and N. Trevithick and Mrs Wood's The Senator. a winner at the South

heavyweight class. Dargle, who won this class at the Three Counties, seems the most likely bet.

The led classes will be particularly interesting because although Mrs Hindle and Miss Riddiough's Bright and Fair was the champion young hunter at last week's Hunter Show at Shrewsbury, it is rare for the same horse to stand at the top of the line there and at the Royal. One of the few who have is Mrs E. Taylor's Zacharoff, who won his class last Zacharoff, who won his class last year as a two-year-old at both shows Last week he good reserve to

Zico: latest victim

deadline of June 13.

Real Madrid, the Spanish club, have now emerged as the favourities to capture Zico's signature. The Brazilians claim that Zico is now their property once again and provided they receive a similar bid, he will be allowed to go elsewhere in

The Federation have, however, given AC Milan the go-ahead on their signing of the Watford forward Luther Blissett.

#### Best shows old flair

Brisbane (Reuter) - The former Manchester United and Northern Ireland forward, George Best inspired Brisbane Lions to a 2-1 victory over Sydney Olympic, coached by Tommy Docherty, the former Unied manager, in an Australian national league match

yesterday.

After a slow start Best, aged 37, showed the full range of skills which made him a legend, repeatedly beating his direct opponent and making a succession of pin-point passes. Best, who is contracted to play three games for the Lions, said afterwards he was pleased with his performance: "I didn't want to go out there and dorainate play but merely help the boys get three good wins which is what they need.

Gary Gilliespie, the central desender of Coventry City, aged 22, has signed for Liverpool for a see of £325,000.
Gillespie, also wanted by Arsenal, said: "With no disrespect to Arsenal, I don't think any young player with ambition could do better than to join the champions. After sive years at Coventry, I felt I needed a new challenge and Ansield will provide it."

The Stoke manager, Ritche Barker, plans to talk with the Coventry central defender, Paul defender, who has refused new terms with Coventry, as a replacement for the former England international Dave Watson, who left to join Vancouver Whitecaps

ATHLETICS

McFarlane

# Sprinter hobbles to a halt

Mike McFarlane, the Common-wealth Games 200 metres cham-pion, suffered more injury trouble on Saturday in a match in the British League, sponsored by GRE, at Birmingham. But his Haringey colleague Claude Moseley had his second 400 metres win in two days on the same track. on the same track. McFarlane pulled up just before the end of the 100 metres sprint with severe pain behind the hip. It was not, he thought, muscular, perhaps a burst blood vessel.

McFarlane withdrew from yester-day's Dewhurst Games in Spalding, which would have been his third race in three days, and he was due to see a phylotherapist today; he competed for England on Friday evening at the same track, Alexander Stadium, In the match Austria, Belgium and Poland, McFarlane had finished third in the 100 metres in his best time of the season of 10.42 sec.

McFarlane still hopes to compete

in Oslo next Saturday, in the city's second permit meeting this season. He has only three weeks to prove himself fit for the world champion-ships in Helsinki. McFarlane missed last season's European championships with sciatica before coming back to share in a piece of athletics history, when he was involved in the dead-beat with Allan Wells for the Commonwealth 200 metres gold

medal.

Several more international athletes stayed on in Birmingham to compete for their clubs in the division one league match, and Moseley's victory surely leaves him needing only a world championship qualifying time of 45.85 sees to be selected at 400 metres for Helsinki.

Moseley began his athletic career as a high-jumper and was AAA youth champion five years ago. He turned to sprinting, but his efforts to get in last year's Commonwealth team were thwarted by a knife attack which left him with a punctured lung and a large scar on punctured lung and a large scar on his left check. The lung healed, the scar is still there, and after bearing Phil Brown in the international match on Friday in 46.16 sec for a personal best, and then following up with a 46.5 sec win on Saturday Moseley is heading for Helsini

**AMERICA'S CUP** 

#### Victory '83 given easy path

America's Cup qualifying races, Ind
an unexpectedly easy day on
Saturday, winning her two races by
default. Challenge 12, the Australian
boat, dropped out after four legs
when trailing by 38 seconds; France
III failed to race after mast
problems Victory '83 has a record of
10 wins and four defeats.
Australia II. The leading challenger, continued her winning run
by defeating Canada 1 by 59 seconds
in her first race and then another
Australian boat, Advance, by three
minutes and 57 seconds in her
second. Australia II's record is 13-1.
The potential challengers had the

The potential challengers had the waters off the Rhode Island coast to waters off the Rhode Island coast to themselves and, despite foggy weather, each completed two races over a 12-mile Olympic course in south-westerly winds of 12 to 16 knots. The American trials to determine the defender of the America's Cup restance on July 16. After dropping out against Victory '83, Challenge 12 raced with a new boom against Canada I and a new boom against Canada I and lost by 26 seconds. This was the best race of the series, with the Canadian yacht leading by only a boat length after the first seven and a half miles. The Canadians opened up their lead to more than a minute on the fourth leg but the Australians came back

strongly and were only four lengths behind at the finish.

The Italian yacht Azzurra improved her record to 6-7 with a victory over France III. The Italians made a poor start, trailing by more than a minute at the first turning mark but they recovered when the French crew had trouble hoisting a headsail at the start of the fourth leg. Canada I's record is 5-9. France III's 4-10 and Advance's 0-13.

BADMINGTON: Darrell Hall, aged 17, of Britain, yesterday became the youngest winner of the Auckland Tournament, beating Graeme Robson of New Zcaland 17-15, 15-11. Gillian Clark won an all-British women's final 11-4, 11-3 against Gillian Gowers in just 18 minutes,

# Never listen to rumours

OLD TRAFFORD: Hampshire (4pts) beat Lancashire by 58 runs. Yorkshire folk love their cricket, and 8,000 of them, the largest Yorkshire crowd of the season, came to see their team take Rumour has it that Gordon Greenidge is no longer the batsman he was. That may be so, but it would be hard to convince the Lancashire Leicestershire seemed set for a handsome total around 250 when Gower and Butcher took 49 runs off the Yorkshire pace attack, Gower hitting the first and third balls from bowlers yesterday, as he followed Saturday's century at Liverpool by amassing 162 not out, the highest score ever made against Lancashire in the John Player League and only

one short of his own best-ever performance in the competition. initially, he looked out slightly Allott's opening over and contribu-ting only three of the first 26 runs on the board. There was little sign then of the onslaught to come, but by the time Smith departed, after an opening partnership of 57, Greenidge was moving into his stride. He dominated stands of 127 with Terry and 71 with Nicholas, the latter in

4.4 overs.
Greenidge's first 50 took 25 overs, coming when he used his feet to hit Folley through mid-wicket. From then on line and length became almost an irrelevance as be

foot behind square-leg for 16.
O'Shaughnessy was hit for two sixes in successive balls later in the innings, the second last seen heading out of the ground towards. Warwick Road station, Simmond who also went for sixes over long-off and long-on, watched belolessly as ige made room to hit him through the covers three times in one over, fielders altering position were as powerless as the bowler to

prevent the resulting boundaries. Had Clive Lloyd not been one of several injured Lancashire batsmen the large crowd basking in the Manchester sun might have enjoyed an equal treat after ica. As it was 269 looked a long way off, even before Jesty took three early wickers in the course of two eventful overs, the For a time Lancashire stayed in contention, being slightly ahead of Hampshire's equivalent running total until the twenty-sixth over.

That, however, was the stage when Greenidge began to cut loose, and matching him was beyond even

# Somerset in battle to stop capsizing

Tim Crooks of Kingston, now aged 34, brought his Henley tally to seven trophies when he helped his club to win the Queen Mother Cup and he nearly brought off a sensational ploy in the Diamond Sculls, giving Sieve Redgrave of Marlow the fright of his young life. And Chris Baillieu of Leander, now and 32 with his new partner, Jon TAUNTON: Somerset, with five first immings wickets in hand, are 339 runs behind New Zealanders.

There was evidence here yesterday that the New Zealand bowling against England in the forthcoming Test matches must be considered more doubtful than their batting strength. Facing an awesome 544 for nine declared, Somerset owed much to a determined stay by the lefthanded Jeremy Lloyds on a friendly prich that they kept their heads, to a degree, above water. Lloyds should have been caugh

in the slips early on against Cairn's slower ball, but came through 2 worrying patch before he edged a catch behind off the spinner Bracewell, five minutes from the close. Rose, returning after a back injury, played soundly before he was bowled by Cairns, who also caused Denning to misbook to mid wicket.

Slocome, surviving an early chance to third slip, stayed 43 overs before he missed an ambitious on-drive. Gard's dismissal in the last over was an argument against the use of nightway

In conditions which approached the nearest to a heat-wave that this country reaches, the attendance was good rather than packed. The touring side only have fixtures with Gloucestershire and Middlesex to come before they are into the first Test match, an itinerary which played its part in their decision to prolong their first innings. Since Christmas, the New Zealanders have played two Test matches with Sri Lanka, but otherwise, virtually an endless sequence of one-day games and they felt the need for patting practice in a three-day match. Gloucestershire and Middlesex to

match.
On Saturday, all their players took the chance to make runs except Franklin; yesterday they carried on and finished with the highest total ammassed by a New Zealand team against a county since 1937. The declaration yesterday finally came five minutes before inneh, when caires swished and swivelled fatally and was caught behind. He had lashed 60 from 29 balls as 80 came in eight overs for the ninth wicket. By then, the New Zealanders, if

By then, the New Zealanders, if they are to keep faith with the English public, had committed themselves to spending the rest of the game in the field and to bowling out Somerset twice. Even more thought to spend of the same of me thought-provoking to some of us was Somerset's team selection. Missing was Botham, with a groin strain, who has no more cricket available to him before England's first Test side is picked.

· Also absent was Roebuck, who apparently, was due for a rest; Richards, who has a cold cum hayfever; and Dredge, who in the past few days, has become a father

# The fox and the wolf provide a final fable for a fine four days

Henley Royal Regatta this year certainly proved that old soldiers to know Redgrave with a two-and two-third-length victory. Sculling really is the game of young and lone wolves, but beware of old foxes.

The Grand produced a predictable victory for the British squad University - against Cambridge University, Although the national squad had only seven training outings before Henley, their experience, measured in terms of Olympic and world medals, was too much for

And Curis ballies of Leander, now aged 33, with his new partner, Jon Spencer-Jones, cruised on to win the Double Sculls. It was Baillieu's eighth prophy at Henley.

But overall it was a British Cambridge went off fast and smooth and led by half a length at the Barrier, but almost immediately the strain and inexperience began to But overall it was a British Henley, Overseas crews only captured the Stewards and the Ladies Challenge Cups.

The Diamonds was the race of the day, Crooks, conceding 2015s in weight and 13 years in age, looked easy game for Redgrave, a brilliant youngster with two major Henley trophies and a world jumior silver medal already to his credit, But Redgrave could never clear Crooks down the course. show. There was only a canvas between the two crews two signals later. Then the Oxford University stroke, John Bland, took over an the squad progressively moved away. By the end Cambridge were almost listing and certainly veering The squad romped to a four-length

Cambridge University – four of their Grand crew – stood no chance against the Swiss world champions in the Stewards', who won easily. The most diappointing performance of the day came from Whitwell and Knight, who were beaten from the first stroke by the London Then 100 metres from the finish Crooks appeared to crack. He leaned dejectedly over his sculls and Redgrave dropped his rate almost as a token of mercy. Suddenly Crooks came to life again. Redgrave was almost in danger winding himself back up, but, before the finish.

University students, Field and Hill, in the Silver Goblets.

It has been a fine Henley. The Leacub from Hackney will celebrate their fours victories in the Britannia and Wyfold London University were prominent throughtout the regatta and claimed by the end of

Stinday at least a part share in the Grand and full measure in the Silver Goblets, Thames and Visitors'. Eton have cause to celebrate, too. They rowed down and finally broke the spirit of St Andrew's School from Deleware in the Princess Elizabeth. There are some talented youngsters in this crew.

Kingston scored a double in the Queen Mother Cup and the Prince Philip. They had a tough fight yesterday against the Universities of London and Oxford which will no doubt be renewed at Lucerne next weekend over 2,000 metres. The students led initially but the crews were level at the Barrier. There was only two feet at Fawley but a fine push by Kingston after the three-quarter-mile signal gave them the momentum to move out to one length. The London-Oxford combination mounted a spirited final attack but it was too late. The exhausted crews crossed the line

# Overnight Ryder

Sam Torrance scored a final round of 70 in the Scandinavian Group yesterday, which served the double purpose of winning the ournament from Craig Stadler, and securing a place in the British Liles team for the Ryder Cup match against the United States in Florida in October, John Hennessy writes. the 17th, only by way of a recovery shot through the trees. in October. John Hennessy writes. Thus they came to the last all list, on £8,072. Torrance has soared to sixth place on £22,500. The first 12 form the team for the Ryder Cup square. Torrance was short of the green is two and Stadler through into the rough. The American fluffed his chip, the Scot putted up ind, for the moment at least, Ronan dead and Stadler missed

and, for the moment at least, Ronan Rafferty drops down to fourteent, overtaken also by Michael King. Rafferty had a final round of 80 to finish 14 strokes behind Torrance's total of 280, eight under par.

Stadler, last year's Masters champion, but never a winner outside his native United States, was one stroke behind Torrance, with a final round of 72, followed by Corey Pavin. an American of the Corey Pavin, an American of the younger school, on 283 (68 yesterday). Two of the favourites, Severiano Ballesteros and Nickaldo, unished well eros on 287 (70) and Faldo n 291 (74). From being a stroke behind

Roberts in command

Francorchamps (Reuter) - The United States' Kenny Roberts stepped up his challenge for the world 500cc championship yester-day with a fine win in the Belgian Grand Prix. Roberts surged round the modified Francorchamps circuit m his factory Yam breaking average of 162,234 kph to push the championship leader and his compatriot Freddie Spencer Into

second place.

The victory left Roberts, whose growing confidence won him last week's Dutch Grand Prix as Assen, only five points behind Spencer in the 500ce championship. Spencer, on a Honda, held the lead for the first 13 laps of the 20-lap race before Roberts took over. Another American, Randy Mamola, finished third on his Suzuki to remain third in the overall standings. But with 31 points separating him from Roberts. the championship seems beyond his

in the 250cc event the Belgian Didier de Radigues delighted the partisan crowd by coming first on his Chevallier.

What a glorious Wimbledon

## Fairy-tales with sudden, violent endings By Rex Bellamy, Tennis Correspondent

Where the money went

Over-dressing: Trey Waltke.

Martina Navratilova and sunnier moods, Having shaken shot, a disparity perhaps most ohn McEnroe, two left-handers hands with Lewis, he then obvious when one or the other John McEnroe, two left-handers born in Europe, won £71,550 and £79,914 respectively from the Wimbledon championships, which ende yesterday. The ease with which they did it was remarkable. Miss Navratilova did not lose a set in singles, conceding one game fewer than Chris Lloyd did two years ago, and she and Pamela Shriver lost only one set in doubles. McEnroe conceded only one set in singles and, with Peter

Cliff-hanging: Miss Wade,

Fleming, one in doubles. This was McEnroe's fourth consecutive Wimbledon singles final and the second he has won. He beat Chris Lewis 6-2. 6-2, 6-2 yesterday in an hour and 25 minutes. In terms of games there has been no more one-sided final since John Newcombe beat Wilhelm Bun-gert 6-3, 6-1, 6-1 in 1967. Lewis was the first unseeded player to reach the final since Bugert did so. All fairy tales have to end some time: the pity is that they lend to end abruptly. There is

no mercy in Wimbledon finals. Lewis worked hard on his preparation and had the kipd of lournament he had probably not even dreamt-could happen. He beat Steve Denton and Kevin Curren, seeded ninth and twelfth, had the luck to avoid Jimmy Connors (who was in the same half of the draw), and became the first New Zealander to reach the final since 1914. But eventually there was nothing his fitness; agility and fighting heart could do for him. McEnroe was in a different class. This was a mild and bitter an uncanny knack of creating day for Lewis. His tennis was both time and space. A final at the expense of the prominent place in the history factor in all this second.

game by McEnroe.

After Saturday's slaughter of

give the others a chance.

hands with Lewis, he then shook hands with a British journalist - a Yorkshire sports editor in the umpire's chair. "I was glad I was able to win the way people want me to win", McEnroe said later. He thought Lewis might have played better if the Curren match had not taken so much out of the New Zealander. "And I knew he would be nervous. I remember my own first final: I kept all over him, and made him work for everything."

The crowd mostly main-

tained a sympathetic silence, which was punctuated by encouraging roars for Lewis's sporadic winners. The after-noon was brightly warm, For some reason, McEnroe seemed to cast the longer shadow. He conceded only nine points in his 12 service games, which left Lewis in a hopeless position. Lewis simply could not read McEnroe's services.

Nor,-for that matter, could be read the rest of McEnroe's game. Consequently Lewis repeatedly had to large for the hall a split second too late. which meant that even if he managed to return it he was out of position for the next shot. Lewis was always hurried.

By contrast, McEnroe's anticipations and reactions were so fast, his control of the racket bead so assured, that he usually had plenty of time to put the hall where he wanted. This was particularly evident whenever Lewis challenged him to a duel in the forecourt. McEnroe had McEnroe was in one of his was McEnroe's greater weight of seeds, Curren. and of the game and at 26 has time

# Cognac's Gauthier matures early

was emphasized yesterday when Joop Zoetmelk's team won the second stage team time trial to lift all 10 of their men into the top 10

all 10 of their men into the top 10 places on overall time.

The new yellow jersey, taking over from the admirable Eric Vanderaerden, is Jean-Louis Gauthier, an unassuming French rider who has finished five Tours de France, with a best placing of only 50th. Gauthier, from the Cognac region but now living in Provence, is best known as a sprinter. He won the sixth stage of the 1980 Tour at Bearvais, and he was second to Frits Pirard of the Netherlands in the hertic first stage of this Tour.

the hertic first stage of this Tour.
The main surprise on a day of hot sunshine and little wind was the first defeat for TI Raleigh in the six years defeat for Ti Raleign in the six years
that team trials have been included
in modern Tours de France. At the
final checkpoint. 25 kilometres from
the finish, the Dutch team were
leading Coop-Mercier by 22 seconds, with the Peugeot team of the
Australian Phil Anderson in the
large and Vandersonie's team place, and Vanderaerden's team fourth,

undulation route snaked between wheatfields and crowd-choked villages, that the Raleigh effort fell

Four of their best men were dropped, including the experienced Lubberding and Van Vliet, while their best hope to win this Tour. Peter Winnen, had to be nursed along by the remaining five. They lost more than a minute to the Merciers, who finished with all 10 riders, 17 seconds ahead of the Peugeot and Hoonved teams.

By the iniquitous system of time ponuses for these tests, the Peugeot men each received smaller bonuses than the winners (45 seconds' worth) while Vanderaerden's Hoonved men, who were timed in only

Just how open is the Tour de Peugeots, lost 75 seconds. All this France without Bernard Hinault means that, behind the 10 Merciers. Anderson has moved in front of Vanderaerden, with Stephen Roche 13th, and Robert Millar 18th. A study of the present overall classification shows that Anderson is now 37 seconds behind the danger

and the other Irish hope, Sean Kelly, 1min 40sec behind. Kelly had a weekend of mixed fortunes. On Saturday he won two intermediate sprint bonuses to move him up to second place

overall, but he was boxed in at the stage finish, in which he came an inexpected 20th. Yesterday he missed the chance of gaining one of the first three bonuses when his team was delayed for almost a the team time trial.

His team's most experienced man. Agostinho, of Portugal, took the first left hand turn too quickly, crashed and brought down one of the team's five French riders.

the team's five French riders.

Today the third stage takes the 140 riders on a route of 150 kilometres between Valenciennes and Roubaix, including 20 choice sections of cottage loaf-sized cobblestones that should enable Zoetemelk, Anderson, Roche, Kelly and the other favourites to establish a more permanent looking.

than the winners (45 seconds: 2, J Zostsmerk (Neth), Zee beinner, 3, P Le than the winners (45 seconds: 2, J Zostsmerk (Neth), Zee beinner, 3, P Le worth) while Vanderaerden's Hoon-ved men, who were timed in only (F), 18, 8 M Laurent (F), 18, 9 Bezzo (F) four-tenths of a second behind the Vanderserden (Bel) 30: 13, 8 Roche (Ire) 47.

#### YACHTING

#### Panda joins in confusion

By John Nicholls

The two final trials for places in served only to further confuse matters. Far from helping the selectors to make up their minds, the races introduced a new boat into the reckoning while previous contenders looked anything but convincing. The Peter Whipp entry. Panda, was the highest placed contender in the Solent points race on Saturday and won over an Olympic course in Christchurch Bay by an overwhelming margin

Her best results in the previous five trials were fifth and sixth but, as a new boat, she needed time to develop into a viable proposition. What the selectors now have to decide is whether her form this weekend can be maintained.

Jade (Larry Woodell), the only other boat to have won two races, had a mixed weekend. She was third on Saturday and eighth yesterday, after being recalled for a premature start. Earlier favourities for selection. Files for selection Yeoman XXIII (Robin Alsher). Indulgence (Graham Walker) and Whiriwind (Noel Lister) were also inconsistent, with Yeoman and Whirlwind placed second and fourth on Saturday, and Indulgence

Yesterday Yeoman trailed the Panda, the race leader, after an indifferent start, with Whirlwind among the back markers and indulgence returning to layour with a second place.

## Cowdray recover

By John Watson

Afer their comprehensive defeat by Centaurs in the British open championship, sponsored by Teva-co, last Thursday, Cowdray Park integrated to much better effect on Saturday when they beat Southfield by 8-7. In particular, the Cowdray veteran Paul Withers, who has scored seven goals was in better form at number three.
Play moved from Lord Cow-

dray's Ambersham to his Lawns Ground yesterday, where the intimate quartet of David Jamison. of Centours, met Les Dialbles Guy Wildenstein in a British open match which was also for the Midhurst Town Cup.
Few would have been surprised to

see Centaurs lead all the way, and indeed Les Diables did remarkably well to avoid defeat by no more than 7-9. In addition to aggregating the top 22-goal handicap of the tournament, they suffered other handicaps. Horsell only recently started playing again after a gall bladder operation; Prince Charles has just returned from Canada; Yeoman is substituting for the injured Wildenstein; and the pivot. Hipwood, who has scored nine goals, received a blow on his stick erm in the fourth chukka

For Centaurs, the devastating interplay of Kent and Armour was tipped to win the tournament. COWDRAY PARK: 1, C Pearson (2); 8, G Forsyth (6); 3, P Withers (7); Back. P

#### RACING: £90.000 FRENCH PRIZE FALLS TO ENGLISH CHALLENGER

# Solford raises the Northern Dancer banner in Eclipse

Solford's victory in the Coral-Eclipse Stakes on Saturday came as a timely advertisement for the forthcoming American yearling sales. If Ted Bassett, president of the nd Sales Association, bad trailed a banner across the Sandown sky carrying a slogan reading "Northern Dancer and Nijinsky" he would not have been as well served as he was by the sight of Pan Eddery and Solford storming up the hill to give the remarkable Vincent O'Brien his fourth triumph in the

Apart from Eddery on the winner and Greville Starkey on Tolomeo our other top jockeys did not excel. But the fact remains that Solfori won a shade cleverly and it was the Nijinsky coh's ability to quicken early in the straight that won Robert Sangster the first prize of £63,185. Sollord was only hammering home the point made by Shareef Dancer at the Current the propriets of the control of the contro the Curragh the previous Saturday that colts sired by Northern Dancer of power which will draw the of power which will draw the wealthy and their agents to Keeneland on July 19.

The huge crowd at Sandown certainly had their money's worth. It was a marvellous speciacle and had the punters shouting their heads with -excitement. However. muddling affairs such as this brovide no pointers to the future. Slowly run races are the downfall of backers and destroyers of the form

Muscatife was unlacky, Lester Riggott had to pull the 2,000 Guiness third away from the rails to find a clear run and the Budweiser Million bound three-year-old fin-

ished fastest of all. "The nme furlongs of the Arington race will suit Muscatite down to the ground."

Jeremy Hindley said. "and he won't learn this chances by running in chances by running in chances by running in chances by running in the chances the postblity of a

the carly crawl. It was sometime before Brian Rouse was able to manocuvre the 11-4 favourite into a close fourth. "It was no good at all," the jockey said. "And if I tried to go carlier I might have hit the front too

to England for the King George Vi and Queen Elizabeth Diamond Stakes", her trainer, Frank Dunne, said. "But the moment she tells me she has had enough, I'll pack her

A similar question mark hangs over Time Charter, Rilly Newnes yielded the rear to no one as he tracked the field into the straight. Like Stanerra, last year's winner of the Oaks and Champion Stakes then appeared to be given every chance of winning, but she was trying to attack horses who had stolen first run . Judgment must be reserved for the time being and Time Charter will be given a chance of restoring her reputation in the King George IV and Queen Elizabeth Diamond

states.

However, to say that racing is about winning is trite but true. Nothing must be allowed to detract from the solid merit of Solford's victory. The \$1.3m Kreneland purchase was a muscular testiment. to his incredible trainer's skill in the paddock beforehand and in the last

contemplates the posibility of a record form training triumph in the Diamond Stakes.

· The excitement mounts as we move towards Ascot and the climax of the first balf of the season. Dick of the first han of the season. Deck Hern has already won our most important all-aged race twice with Troy and Ela-Mana-Mou and there is still a chance that Sun Princess may be re-routed from the Currant to Ascot. On balance Hern would prefer to go for the easier target of the Irish Guinness Oaks and then prepare Sir Michael Sobel's 12length Epson winner for an autuint campage at a time when nature and the record books show that most fillies are capable of surpassing

Jim Bolger showed at Haydock the same afternoon that O'Brien does not hold a monopoly of Irish training skills. Give Thanks, already the winner of the Linefield Oaks trial and York's Musidora Stakes this season, added the Lancashire Oaks to her tally with a decisive defeat of Ski Sailing and Acclimatise. The trainer now has to choose between his Pretty Polly Stakes winner, Flame of Tara, and Give Thanks for the Irish Oaks.

So we move on to the delights of Jim Bolger showed at Haydock So we move on to the delights of Newmarket's three-day July meeting which can only be slightly tempered by the muggy heat and hordes of voracions flies. Henry Cecil said yesterday that Diesis would not make his reappearance

# Grand Prix for Diamond Shoal Diamond Shoal completed a affairs as the field started the turn was Electric, who faded from

partitions Shoal completed a affairs as the field started the turn remarkable double when he won the for home with some three furlongs f91,491 Grand Prix de Saint-Cloud to run, but by now Diamond Shoal yesterday. His trainer, Ian Balding, had taken closer order with All had saddled his full brother, Glint of Gold, to collect the prize last year. Along, However, Electric was Gold, to collect the prize last year, already under strong driving from Coincidentally, both colts beat the game, but somewhat luckless, Diamond Shoal quickened up Lancastrian - Gfint of Gold by a head and now Diamond Shoal by threequarters of a length.

The race was run at a fast gallop throughout, with last year's American Eclipse award winner, Lemhi Gold, building up a five-lengths advantage by the time the field had covered the first half mile. Diamond these lengths are the market and the lengths are the second to be a second shoal was, in the words of his jockey, Steve Cauthen, "always in the right place" as he tracked Lemhi Gold with the Lester Piggott-part-nered Esprit du Nord third and Electric close up behind. Lemi Gold was still at the head of

unbeaten Danzatore failed to bring

Walter Swinburn.
Diamond Shoal quickened up well to strike the front one and a half furiongs from home, and stayed on well to hold Lancastrian and Zalatia, both of whom finished well, having filled the last two places on

a crack at the King George." The first three home and the fourth horse Lemhi Gold may all meet again in Ascot's King George VI and Ouen Elizabeth Diamond Stakes.

the turn for home.

A delighted Ian Baiding said of his winner. "He is an amazing horse who seems to do better when travelling abroad. He now deserves

On Saturday at Evry the Vincent O'Brien's Glenstal ran out a head winner of the Prix Daphnis under a masterful ride from Yves Saint Martin. The 14 times French champion jockey made all the running and caught out some of his

career of last year's top French juvenile, Saint Cyrien. He never looked like getting to terms with the ucen Elizabeth Diamond Stakes. leaders on Saturday and will now be The disappointment of the race retired to stand at Alec Head's stud.

#### put to the test at Goodwood later in the month when Burslem is a likely contender for the Gordon Stakes.

would never run again. lengths. It was appropriate however that Burslem, should win the first running of this event as his owner is

the chairman of the sponsoring

#### opponents when quickening up with about three furlongs to run. This race signals the end of the

Danzatore retired after finishing last In one of the biggest surprises of going to figure in the finish. He the Irish season so far the hitherto trailed in last of five and after the

off the final leg of an international big-race treble for Vincent O'Brien This five-runner £30,000 race produced an exciting finish with Lord Iveagh's Burslem just holding on Saturday. Our Irish Correspon-· Solford in the Eclipse Stakes and on by a short head from John Dunlop's Montekin Noalcoholic Glenstal in the Prix Daphnis at Evry collected in good fashion, but Danzatorelooked a beaten horse even before the start of the took third place and Princes Gate the other English runner, was a well beaten fourth with only Danzatore behind him.

Guinness Golden Fleece Stakes at the Phoenix Park. The son of This is the second time in a week Northern Dancer got very worked up in the parade ring and whereas he had never previously been that Burslem has won an important prize and his trainer, Kevin Prendergast, is full of optimism that had never previously been ded in any race in public, he was Burslem will go on to even better things. Predergast believes his best led from the start and before halfway his rider, George McGrath, distance will prove to be from 10 to

The Danzatore flop was all the harder to comprehend when one looked back to his last encounter with Burslem over a mile at the Curragh last autumn. There Danza tore, without ever coming off the beat Burslem by half a dozen

On an afternoon when the prize money exceeded the amount betted on the Tote, Lady Clague's Welsh Dancer achieved compensation for an abortive journey to Royal Ascot when she won the Goffs Silver Flash

حكذا من الاحل

The Times Guide to careers training

Some are more equal than others

from the academic field of study

and the Institute of Housing "would prefer academic subjects". A spokes-

woman for the Institute of Chartered

Accountants states that it does not

give guidance to its members, but

would expect firms to look for

The situation is even more complex

when it comes to university entrance.

In order to obtain a place a candidate

must first satisfy a general entrance

requirement, the most usual way being to offer a minimum of five G.C.E. passes, including two at A level. Then comes a departmental

requirement, which varies according

to the course chosen. Every university

has its own list of subjects approved for general entry, and departments have their preferences for course entry. Computer studies now becomes

thoroughly respectable for general entry, but the acceptability of accounting fluctuates and communi-cation studies is not approved by any

Scottish university: Law, too, is a tricky subject with

the universities. It is not approved for

general entrance purposes by any in Scotland and although it is accepted

for this purpose by those in England and Wales, it can be an unwise choice for someone proposing to read the subject at degree level. Admissions'

tutors are sharply divided. The majority state no preference for any A level (provided that they are aca-

demic), but whereas one or two feel that the study of A level law gives a

good prediction of degree level performance, at least eight would quite firmly discourage it, preferring that candidates should not specialize

To make matters worse, there are eight different G.C.E. examining boards awarding A levels and a

Skills for all occasions

too early.

nsual

Beryl Dixon with a

cautionary tale for

pupils planning to

take their A levels

academic subjects.

HORIZONS TO THE REPORT OF THE PARTY OF THE P

subject may be approved if offered by one board rather than another. The

Civil Service states that not all

syllabuses in some economics and

design are acceptable, and the universities of Birmingham, Leeds, Liverpool, Manchester and Sheffield,

the constituent members of the Joint

Matriculation Board, accept home

economics only if offered in that

board's examination, and law if awarded by the Joint Matriculation,

Oxford Local, Welsh and Associated

Examining board.

It is not all plain sailing, even when it comes to choosing three traditionally respectable A levels. Correct combination of these is just as important for higher education courses and ultimately for careers. Entry to higher diplomas in agriculture for example depends on one A.

ture for example, depends on one A level being chosen from a list of around twelve subjects, most of them "traditional". Students with their

sights set on medical school often

plump for biology, physics and chemistry, but in fact 75 per cent of

schools are equally happy with

mathmatics, physics and chemistry. Biology often appeals to fifth

formers who do not like other sciences and, if their schools permit,

they choose to combine it at A level with two arts or social sciences. This is acceptable for entry to careers

which do not have a specific subject requirement, and is very useful for some of the professions related to medicine. But for someone wishing to make a career in scientific research it

can spell disaster. In such a case,

biology should be taken with chemis-

try and maths or physics.

It would be a shame if sixth formers

studied only traditional subjects at that would hinder the growing

recognition of the others, but they would do well to consult the

appropriate authority in advance and then play safe by combining a "suspect" subject with two approved

ones, not neglecting, however, to check the suitability of any combi-

Examining board.

**University Appointments** 

UNIVERSITY OF STRATHCLYDE

Applications are invited for a lectureship in Marine

Technology in the Department of Ship and Marine

Technology. Candidates should have an Honours

Degree in Naval Architecture, Marine Technology, or a

related engineering descipline. The lecturer will be required to contribute to an active research pro-

gramme and to enhance Industrial links, as well as to

Salary on the scale for lecturers (£7,190-£14,125 p.a.),

& MARINE TECHNOLOGY

LECTURESHIP IN SHIP

Did you know that if you take A

levels in computer studies, accounting and technical drawing you cannot

become a chartered surveyor?

Fifth year pupils choosing A levels and unaware of the implications of

certain combinations tend to assume

that all subjects carry equal weight.

Unfortunately, this is not so. There are over 40 different A level subjects

and professional bodies and univer-

sities have very different views on

their acceptability. Subjects can be put into groups: the traditional academic

ones which are universally well

regarded, the "practical" which may

be flatly refused or allowed only in

particular combinations, and the newer ones which several bodies still

Traditional academic subjects are

known and understood by everyone. Others like music and arts which, in fact, contain a considerable amount of

written work are often classed as

practical". Many schools now offer

A levels in new subjects such as accounting theatre studies, psychology and computing, and in some cases only one of these is permitted in a two-A level entry requirement. The

slowly changing the last group is slowly changing, as more students offer them and their content therefore becomes more widely known.

The strictest professional bodies are the Royal Institution of Chartered

Surveyors and the Royal Town Planning Institute, neither of which will accept woodwork, needlework or home economics. The RICS, does,

however, accept music if offered with an approved subject the R.T.P.I. does not. Computer studies and environ-

mental studies, which are regarded by the R.I.C.S. in the same light as music are accepted by the R.T.P.I.

To confuse the picture even more,

the Chartered Insurance Institute and the RTPL approve religious edu-cation, while the RICS requires

that, too, to be accompanied by one of its recognized subjects. The Royal Institute of British Architects states

that "two A levels should be drawn

There are a number of skills which we

should all try to master because they

will be valuable in almost any career.

Good communication skills are vital. Although we all talk and write

from an early age, few of us can express ourselves clearly and suc-

cinctly. We must be able to question

people clearly and in a logical

# TGWU leaders defend 'no ballot' decision

From David Felton, Labour Correspondent Douglas, Isle of Man

biggest block vote in the Labour against the executive com-Party yesterday mounted a mittee's line by some of the strong defence against charges union's !! full-time regional that it was undemocratic for secretaries were "a complete conference delegates to decide load of rubbish". this week whether the union should back Mr Neil Kinnock Left's candidate for deputy in the party leadership battle.

its 1.250.000 block vote would hope of winning support from be decided on the "widest the traditionally Left-wing possible franchise" in the TGWU delegates. its 1,250,000 block vote would union £800.000. "Those who going to have to pay for it, he

He was replying to the findings of an opinion poll which indicated that 67 per cent of the union's members would be in favour of a postal ballot on the Labour leadership. The TGWU executive has tabled an emergency motion for the conference in the Isle of Man debate tomorrow calling for support for Mr Kinnock.

TGWU support for Mr Kinnock would almost certainly guarantee him victory over Mr Roy Hattersley in the leadership election. Me Hattersley's supporters have been lobbying within the union for the decision to be taken on a wider basis than just the conference.

It is understood that an emergency motion has been sent to the conference from TGWU members working at Labour party headquarters in London which presses the argument for the membership to be consulted before a final decision is taken.

other emergency motions Mr Peter Shore attracted 13 per should be debated will be taken cent and Mr Eric Heffer, the today by the conference standing orders committee. Any received only 2 per cent. opposition during tomorrow's But of those who said they debate by the 1,200 delegates is voted Labour, Mr Kinnock won likely to centre on a motion 50 per cent support compared from Tyneside calling fora ballot of all members who pay

Mr Evans emphasized yester- Heffer.

Leaders of the union with the day that reports of a revolt

'Mr Michael Meacher, the leader is due to hold a fringe Mr Mostyn Evans, general meeting at the conference secretary of the Transport and tomorrow night, supported by General Workers' Union said Mr Wedgwood Benn, in the

circumstances. An individual But it was not clear last night postal ballot would cost the whether the deputy leadership would be raised at the conferwant armchair democracy are ence. If there is no decison this week the TGWU delegation to the Labour conference will have the final word.

Mr Evans, explaining the practical difficulties of a ballot, "I don't think anyone complains about the desire of every member to participate in every decision of the union, but the ultimate in democracy is continuous referendum, and that is a very difficult thing to

#### Labour voters 'want Kinnock'

Mr Kinnock, the favourite contender for the leadership, has the backing of 50 per cent of Labour voters, according to an opinion poll published last night (Anthony Bevins writes).

A Marpian poll, conducted for tomorrow's BBC television programme People and Power, showed that Mr Hattersley was considered the best possible leader for Labour among the electorate at large, with the support of 29 per cent of those interviewed, while Mr Kinnock A ruling on whether that and drew the support of 25 per cent. fourth man in the contest,

> But of those who said they with only 21 per cent for Mr Hattersley, 9 per cent for Mr Shore and 3 per cent for Mr

#### Telecom resignation

By Our Electonics Correspondent

Mr John Lyons, general been decided by the result of the secretary of the Engineers and Managers Association (EMA) and one of three non-executive directors on the 12-man British Telecom board, has resigned over the Government's intention to sell control of the corporation to private interests.

According to Mr Lyons, who was first appointed to the board three years ago and had a further term of 12 months renewed in May, he could no longer serve on the board and comply with government policy. He said: "Now that the issue

of principle as to the privatization of British Telecom has

# Scargill strike threat

Continued from page 1

be looking for 65-70 per cent support (for industrial action) and I believe we would get that. get that indication from speaking to branch meetings."

Yorkshire failed in March to produce the required 55 per cent majority for a strike for the first time in a decade.

retained in the public sector, even if partly financed by private capital, where it could, Other union leaders, not exclusively drawn from the moderate camp, believe that the present mood of the men is not favourable and that the executive will be defeated when it asks the miners for support for a battle against the MacGregor pay and jobs strategy.

The conference will also reject Government plans for a third round of labour law reform, and will do so in a way calculated to embarrass moder-ates on the TUC general council sho want to open up a new dialogue with the Government.

The motion, expected to be approved overwhelmingly later this week, will be sent as the union's resolution to the TUC annual congress in September and it calls on all inions torefuse to cooperate with the Government on industrial law and not to comply with any legislation produced by Mr Norman Tebbit, Secretary State for Employment

#### Letter from Lilongwe

# The capital that Banda built

Malawi's capital away from its traditional site at Zomba in the Shire Highlands, at the southern end of Lake Malawi, is said to have first come to Dr Hastings Kamuzu Banda between 1959 and 1960, as he languished for 13 months in a British jail in what was then Southern Rhodesia, the preent-day Zimbabwe.

He first spelt out his ideas in detail at the end of 1964, a few months after Malawi's independence. As Nyasaland, the country had previously constituted the poorest part of the British-inspired Central African Federation, whose other two components were Southern Rhodesia and Northern Rhodesia (now Zambia).

The site chosen by Dr Banda for his new capital was Lilongwe. This was a small town of some 20,000 inhabitants in the flat, bush country of the central region about 200 miles north of Blantyre. This long-established and still much better-known commercial centre was named after the birthplace of Dr David Livingstone, who first reached what is now Malawi in the late 1800s.

His main argument for Lilongwe was that it would move the capital to the physical centre of the country. and help to redress the economic imbalance between the populous south, where development was concen-trated during the colonial period and the neglected and more thinly-settled north.

The topography was also suitable for an international airport, while further expansion of Blantyre's Chileka. which cannot handle big jets, was limited by the hilly terrain, it was also noted, uncharitably, that the old Lilongwe was the capital of the dominant Chewa tribe, to which Dr Banda belongs.

It soon became clear that neither Britain nor any of Malawi's other regular Western donors was prepared to stump up the necessary funds for what bore all the signs of a

classic Third World prestige white elephant in the making. "No doubt". Dr Banda is said to have observed sourly at the time, "Noah's contemporaries

also considered the Ark Help was to hand, however, in the shape of Mr John Vorster, then the South African Prime Minister, who was anxious to demonstrate the success of his new "outward-looking" policy towards black Africa. Pretoria provided the initial loan for

and has been heavily involved financially ever since. Construction began in 1968. Soon afterwards ambassadors were exchanged between the Banda made his famous visit to South Africa, a country he

the first phase of the project.

#### Election result, page 5

had last seen as a penniless teenager working in the gold mines. In 1971 Dr Vorster came to Malawi, Lilongwe remains the only black African capital with a resident South African Ambassador,

The government buildings on Capitol Hill and housing for government staff were the first parts of the project to be completed, and the new capital was officially inaugurated on January 1, 1975. The present population is put at slightly more than 130,000. and the aim is to expand this to 500,000 by the turn of the century. Although it still has the

slightly unfinished and un-lived-in air of most created capitals, Lilongwe is undeniabley attractive to look at It will be some years, however, before it will be

possible to say whether Lilongwe has truly vindicated Dr Banda, or whether it will be remembered more as a monument to the extraordinary persistence and political power which enabled him to translate the prison cell mus-ings of 20 years ago into bricks and mortar.

#### Parking fines

Motorists who leave their cars on parking meters beyond the time they have paid for in the Mayfair, Soho, Whitehall and Victoria areas of London will have to pay double the excess charge from today. The charge for the first hour after the time paid for is now £8 for parking meters that charge 40p and 60p an hour. The charge remains £4 for 20p-an-hour meters. Beyond the hour excess, drivers incur an extra £10 penalty and are liable to be

#### Nature notes

acceptable to its staff,"

Young swallows are out on the telephone wires, instantly recognizable because they lack their parents' long tail-feathers. Unlike most fledglings, they go back to their nest to roost for a week or so. Mistle-thrush families feed together in parks and playing fields; when they fly up, spreading their tails for a moment, they look more like small doves than thrushes. Skylarks are still singing over the silvery-bine of the young wheat and the jade-green of the young barley,
White, fragrant clouds of

general election, the board

clearly must comply with government policy when its now privatization Bill becomes

"I have resigned because I

cannot be party to implement-

ing this policy on the BT board.

I believe BT should have been

in my view, have achieved the

same results as the Government

wishes to see, but in a way that

would have involved less additional upheaval for the

organization and been more

law early next year.

streams. Figwort opens in the woods: its flower are like little green faces with brown, bald heads. All the campions are in flower red campion, the commonest and most brilliant; white campion with its brilliant; white campion with its rather battered-looking petals; and bladder campion, with its curious gourd behind the white flowehead. Thistleheads are opening: the pale lilac one is the creeping or field thistle, which will sprout again from any broken bit of root; the deep purple one that resembles it is the welted thistle. Small, red leaves are still opening on the boles of oak trees. Red deer fawns are growing bigger and joining up in herds; their mothers are guick to attack passing men and dogs.

DJM

#### National Day

Fireworks, flag-waving and parades typify the patriotic outburst with which Americans traditionally mark their Independence Day each mark their independence Day each July 4. Though the colony severed its ties with Britain on July 2, 1776, it is the adoption two days later of the Declaration of Independence by the Continental Congress in Phila-delphia that is celebrated as the national day holiday in the 50

ound carriageway shared between unctions 8 (M50) and 9 (Ashchurch) and between junctions 13 and 14 (Stroud and Thornbury). A429: Temporary lights at Foss Way, North of Northleach, Glouces-

tershire. M6 Resurfacing north-bound between junctions 32 and 33 M55 turnoff to Lancaster South carriageway shared north of Dur-ham between A690 and A167, A1068: Roadworks on Ainwick

ypass. Scotland: A82: Great Western Scotland: A82: Great Western Road, Glasgow: Resurfacing between Leicester Avenue and Anniesland Bridge. A77: Single lane only at junction of A719 at Whitletts, Near Ayr. M9: One carriageway shared between junctions 5 and 7 [Falkirk to Kincardine Bridge).

#### The papers

The Sunday Times suggested resterday that MP's pay could be inked to a senior civil service grade to end the perennial display of to end the "perannial display of agonized manoeuvring by successive governments". The ideal grade might be under-secretary, which would give MPs £22,000, risingunder Plowden to £26,000.

The Observer supported the idea of MP's pay linked to civil service grades.

night now become an object of hate for the right as the last bastion of liberalism. A situation might arise, for example where legislation for bringing back capital punishment could be blocked by the Lords.

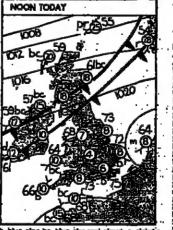

#### Parliament today

Commons (2.30): Petroleum Roy-ahies (Reliefs) Bill, second reading. Lords (2.30): Debate on report of Science and Technology Committee on engineering and research.
